Capital Projects

Public Works Capital Projects

Madison Station Blvd Project

Sewer manhole work started in front of 50 Forward. Concrete islands near the roundabout and conduit for irrigation along bike path and sidewalk are being installed. The slopes along the east leg of the roundabout are being dressed up and excavating and embanking adjacent to Hardees for the installation of the new driveway continues. ROW closings continue in Phase 2.

North Nashville - Capital Bikeways Project

Work accomplished 7/31/14 – 8/6/21:

- No North Nashville Bikeway work this week.

Two-Week look ahead as weather allows:

- Vulcan to begin sign installation and then delineators once striping is complete.
- PRI to begin MMA installation on 28th Ave N as weather allows as high temperatures and high humidity cause curing issues.
- We do not have a schedule for Special Operations to begin milling on Monroe St at this time.

Sidewalk Café/Outdoor Dining Permit

Reminder: Metro Codes, in coordination with other Metro departments, is facilitating the sidewalk cafe/outdoor dining permit. Businesses all around Nashville can apply for this permit to expand their outdoor dining space. KEY	
Casting Adjustments	Adjustment (lowering) of utilities to allow milling machines to traverse the roadway without damaging utility assets. Re-adjustment (raising) of utilities so that they will again be flush with the new surface that will be applied.
Milling/Undercutting	Removal (milling) of old surface using a milling machine. All milled surfaces must be cleaned by the milling contractor and marked appropriately to safely direct traffic. During undercutting the old surface that has failed is cut out and new material is put back in before it is resurfaced.
Infrared	A technique where infrared heating systems apply heat to pavement surfaces and aid in the removal of existing material and replacement with new asphalt mixture.
Signal Loop Wires	Signal Loop Wires are installed under the pavement. They are used to detect vehicles passing or arriving at a traffic light.
Crack Seal	A sealant put into the construction joint to keep water out so the road will not depreciate.
Fog Seal	A sealing put on the road to give the road an extended period before it gets paved.
