Paving

Notice of milling and paving on a Metro roadway is required to be handled by the contractor via door hanger or mailing prior to the commencement of the project. Additional notification is required to be presented to the homeowner if a construction sign is going to be placed on their property. Report any violations directly to [hubNashville](http://hubNashville.gov) [hub.Nashville.gov].

- [2022 Spring Paving Projects](#) - These projects were funded in 2021 and will be completed this spring before we begin work on the Summer 2022 Paving Projects.
- [2022 Summer Paving Projects](#) - Summer 2022 paving is expected to begin in late March/early April, weather dependent.

NOTE: All paving projects are weather dependent.

Roadway Closures Information

The right-of-way closures map allows the public to see where street, lane and sidewalk closures exist. It also allows motorist to plan their routes based upon active lane and street closures. **The map is updated every two hours.** You can access the map on the Roadway Closures webpage, <https://www.nashville.gov/departments/transportation/road-closures>.

***The information does not reflect unplanned closures or restrictions due to traffic collisions or other emergencies. Road closures are subject to change.**

Projects Underway the Week of 7/3/2022 – 7/9/2022

| KEY | |
|-----------------------------|--|
| Casting Adjustments | Adjustment (lowering) of utilities to allow milling machines to traverse the roadway without damaging utility assets. Re-adjustment (raising) of utilities so that they will again be flush with the new surface that will be applied. |
| Milling/Undercutting | Removal (milling) of old surface using a milling machine. All milled surfaces must be cleaned by the milling contractor and marked appropriately to safely direct traffic. During undercutting the old surface that has failed is cut out and new material is put back in before it is resurfaced. |
| Infrared | A technique where infrared heating systems apply heat to pavement surfaces and aid in the removal of existing material and replacement with new asphalt mixture. |
| Signal Loop Wires | Signal Loop Wires are installed under the pavement. They are used to detect vehicles passing or arriving at a traffic light. |
| Crack Seal | A sealant put into the construction joint to keep water out so the road will not depreciate. |
| Fog Seal | A sealing put on the road to give the road an extended period before it gets paved. |
