Collection Systems & Diversion Activities - 2009

A * indicates a required field

Diversion Activities

*** Did your county have any household hazardous waste events?**

Yes

Disaster Recover Diversion

Comment on any disaster related solid waste activities that may have influenced diversion efforts with the county.

N/A

Source Reduction Activities

Describe source reduction and reuse activities by public or private entities by jurisdiction.

Metro Public Works in partnership with Allied Waste and the Metropolitan Public School System has been promoting school recycling since the spring of 2006. This recycling program places recycling dumpsters for fiber collection at any interested MNPS school. The dumpsters are then serviced through a contract between MNPS and Allied Waste. Public Works has distributed informational material promoting recycling, conducted classroom programs and field trips to educate children on recycling at school and at home. During 2008, Metro Beautification distributed over 1249 desk-side recycling bins to 41 schools to assist them with reducing their waste. Currently 100% MNPS schools are participating in this program or have Metro Public Works recycling drop offs located on the school property. 2009 saw the beginning of a pilot GSD curbside subscription based recycling program in Bellevue. Public Works partnered with EarthSavers to kick off this program. Plans are set to expand this program to other GSD areas in 2010. Metro Beautification has also developed a program to distribute backyard compost bins to schools, community centers and the public. Interested schools and community centers can receive backyard compost containers at no cost and compost bins are sold to individuals at Public Works' cost. Public Works continues to promote composting and provide access to composting machines at the Omohundro Convenience Center. Mayor Dean issued a 100% employee recycling mandate for city government in the spring of 2008 and this program continued at 100% participation in 2009. Public Works partnered with General Services to expand their existing program which had been cut back in 2005 due to budget constraints. City employees were provided desk-side recycling blue bins and educational material. Metro Beautification continues to provide desk side bins as well as training to requesting agencies to support Metro's in-house recycling program. Public Works also set up a webpage so that employees could learn more about the importance of recycling (<http://www.nashville.gov/Recycle/Recycling/MetroBuilding.htm>) and waste reduction. Collection containers were placed at all city buildings for employee recycling collection. Public Works also placed recycling containers on each floor of the Courthouse for visitors to recycle. Paper, cardboard, plastic bottles/cans, aluminum cans and metal cans are collected and recycled through this program.

List any restrictions the county or region places on collected wastes (Examples: No paint cans, no gas tanks, no monitors, etc.).

No radioactive waste.

Narrative:

Public Works uses different media to educate residents on the importance of recycling, waste reduction, composting, etc. Below is a list of the different media used:

1. Website - The www.nashville.gov/recycle website provides comprehensive information on all waste reduction services provided to residents. This website is monitored and updated regularly.

2. Metro Channel 3 - Metro Channel 3 runs slides daily broadcasting information on Public Works programs including drop-off sites, convenience centers, Household Hazardous Waste, brush and leaf collections.

3. Nashville Today & Tennessee Black Pages - Placed ads detailing locations of convenience centers and drop-off sites.

4. Miscellaneous - Obtained free media spots promoting the GSD subscription based curbside recycling program for Bellevue and Old Hickory/Hermitage.

Education

Target Audience Group	Projected Served	Projected Cost	Repetitions or Number
Adult/General Public			
Business/Industry			
Government/Institutional			
Children/Educators			

Narrative:

- Metro Beautification plans to continue programs described in the Past Education Efforts section for the coming year. These programs have been very successful at reaching out to children and adults through classroom presentations, field trips, community meetings, etc. These programs address litter prevention, recycling, and responsible waste management.
- Metro Beautification plans to print and distribute a booklet of educational activities during 2010, along with updated MNPS learning standards to encourage schools to participate in all of our programs and contests.
- Metro Beautification has worked closely with multiple high school and college programs to start new recycling and composting efforts. Whites Creek and Hillsboro High, Volunteer State and Nashville State Community Colleges have taken advantage of Metro Beautification classes and resources.
- Metro Beautification will continue to provide compost bins and educational resources to schools to assist with their waste reduction efforts and loan out worm bins for classroom use.
- It is the goal of Metro Beautification to be able to provide specialized educational programs for schools, community organizations, neighborhood groups and businesses.

Patch award for Girl and Boy Scouts, includes recycling requirement.

 Program Summary - 2009

A * indicates a required field

Solid Waste Planning - Detail Strategies on Diversion

The Region's 10-Year Plan outlined a strategy to manage solid waste. In lieu of developing a complete update of this Plan as required by TCA 82-211-814, answer the following questions in as much detail as possible. **These questions should be answered by the government body responsible for directly determining solid waste policy within the region.**

*** Name and title of individual(s) who answers the following questions**

Billy Lynch - Metro Nashville Public Works Director

*** Looking back on the Plan from this current year, what changes have been made in the way the county handles & prioritizes SW?**

In the Spring of 2009, Public Works signed a contract with EarthSavers to start a curbside recycling program in the Bellevue area. This program kicked off in the early part of 2009 with approximately 750 residents in Bellevue signing up for the service. Plans are under way for EarthSavers to expand to other parts of the General Services District in the coming year, targeting Old Hickory, Hermitage, the City of Goodlettsville and parts of the Nolensville Rd. area.

*** List and discuss the three largest obstacles to your solid waste disposal system.**

1. The 2009/10 fiscal year saw another cut in Public Works funding for all divisions. Public Works has maintained the same levels of services but with some reduced frequencies.
2. While overall funding was cut again in 2009, Public Works, working with all Metro Depts. has achieved 100% In-House recycling opportunities. It is important for Metro Government to lead by example Expanding recycling collection to all city buildings with a challenge from the Mayor for 100% employee participation shows our dedication to waste reduction in the county. 100% participation will be difficult to maintain considering on-going budget reductions.
3. Lack of a permitted food composting site in the area.

*** In the coming years, how do you plan to handle disposal of waste differently to better address these issues?**

1. Increased subscription based recycling possibilities in the General Services District.
2. Increasing Drop-Off recycling locations and Convenience Centers would be ideal but are problematic given the lack of available land sufficient to meet these needs.

*** List and discuss the three largest obstacles to your waste reduction/recycling system.**

1. Land needed for additional Drop-Off and Convenience Center locations.
2. Funding for equipment and manpower to service these new locations.

DRAFT

3. Lack of State legislation mandating that all recycling companies report their annual tonnage figures to TDEC.

*** In the coming years, what new programs, or modifications to existing programs, will be enacted to increase the amounts of material being reduced/recycled?**

1. Cooperative program with Coca-Cola to enhance curbside recycling.
2. Legislation to mandate Business recycling.
3. Implement C & D policies to promote recycling.
4. Enforce existing policies that require waste reduction, recycling and re-use plans as part of the building permit process.
5. Provide curbside recycling opportunities in the General Services District.
6. Mandatory commercial food waste composting.
7. Pilot program for residential food waste composting.

Improvements Remediation

*** Facility Improvements - Project any facility improvements needed for processing and/or managing solid waste and diversion efforts.**

Need for additional Drop Off and Convenience Center locations given land availability and budgetary increases for equipment and manpower to service these locations.

*** Monitoring Cost Projections - Project any future monitoring, remediation, or mandated improvements over the next five years by the county for county owned solid waste facilities, including convenience centers or transfer stations.**

Bordeaux = \$ 51,555
Ash Monofill = \$37,517
Due West = \$11,778
Lebanon Road = \$21,776
Compost Facility = \$2,457

Waste Stream Estimate

Give approximate percentages of each category of waste that make up your county's MSW stream.

* Residential	* Commercial	* Institutional	* Industrial
26.00%	53.00%	0.00%	21.00%

Successes and Setbacks

*** Describe any setbacks encountered in your solid waste management program and how these setbacks will be resolved in future plans.**

The biggest setback was the decline in 2008 in market prices for recyclables. This affected the projected revenue for FY09. While market prices have seen a slow increase in 2009, budgeting for the up coming fiscal year will reflect a much more conservative projection of revenue.

*** Describe your successes in the implementation of your Solid Waste Management Plan. What are you doing well to promote waste reduction?**

DRAFT

In the Spring of 2008, Mayor Dean issued a 100% employee recycling mandate. While Public Works had provided recycling to many city buildings, budget cuts in 2005 had made expansion of this program challenging. Public Works provided collection containers at all city buildings and desk-side blue recycling bins as requested. During 2008, Public Works saw over a 100% increase in recycling tons at city buildings from 2007. Public Works expanded the recycling drop-off program in 2008 by adding 3 new drop-off sites at McGavock High School, the Northwest Family YMCA and Tennessee State University. In addition, 2 recycling drop-off points were added in the downtown area for residents in multi-family buildings. Recycling tons in 2008 increased 20% over 2007 tons. During the past calendar year, there was an increase in demand for recycling at events. Public Works has a loaner program for event recycling containers and will supply a recycling trailer for larger events. Public Works assisted with recycling at 80 events including the CMA Festival, the Country Music Marathon, and all Tennessee Titans home games.

*** Describe how you manage each of the following problem wastes: batteries, paint, electronic scrap, tires, oil and antifreeze. Please include information on any difficulties you have had with each.**

Nashville and Davidson County residents have access to recycling and waste disposal, including household hazardous waste, seven days/week at the East Convenience Center. Public Works expanded the HHW program to include 2 mobile collection events held in the spring and fall at several of the recycling drop-off sites. These mobile events allowed residents to drop-off CFL's, batteries, unused medications, mercury thermometers, and other items for proper recycling or disposal. Public Works has also signed a contract with an electronics recycling company to recycle TV's. With the switch to digital signals, it is anticipated that many residents will dispose of older televisions. Currently, residents can bring old TV's to the East Convenience Center where they will be recycled along with other electronics and computers.
