| Project No.          | Request to adopt the Southeast  |
|----------------------|---|
|                      | Community Plan: 2004 Update   |
| Associated Case      | None  |
| Council Bill         | None  |
| Staff Reviewer       | Wood  |
| Staff Recommendation | Approve   |
| REQUEST              | Adopt the Southeast Community Plan: 2004 Update.  |
|                      | This plan replaces the Subarea 12 Plan: 1996 Update.  |
| Public Participation | Staff met with over 700 residents, property owners, and<br>business owners during a series of nine community<br>workshop meetings held during March – June, 2004.<br>Staff presented the final draft plan at a public meeting<br>on June 8.   |
| Highlights           | Conservation of existing developed residential areas<br>and maintenance and revitalization of existing<br>commercial areas are important goals of the plan. Thus,<br>land use policies for the developed portions of the<br>community remain substantially unchanged, although in<br>some cases the old land use policy categories used in<br>the 1996 version have been replaced by the equivalent<br>Structure Plan policy used in the new community<br>planning system. An example of this would be the<br>replacement of Major Public Open Space policy with<br>Open Space policy. Also, old Commercial Arterial<br>Existing and Retail Concentration Community policy<br>areas have been changed to the newer Community<br>Center policy.<br>The land use policies for undeveloped and developing<br>portions of the community have changed somewhat<br>more from the 1996 plan to the 2004 version. Most of<br>these undeveloped and developing areas are in the<br>southeastern portion of the community south of Bell<br>Road and between Nolensville Pike and I-24. This is<br>where most of the community's growth is expected to<br>occur. |
|                      | Although community participants largely accepted the fact that the Southeast community is and will continue to be one of the county's fastest growing areas, they still hope to preserve some of the community's rural  |

character. To this end, a Rural policy area has been set aside in the southeast corner of the community near Cane Ridge Park. This area is not served by sewer, and under the policy will remain unserved.

Another difference between the 1996 plan and the current draft for this southeastern portion of the community is that several Residential Medium Density policy areas, which are located around the edges of the area in question, are recommended to be changed to Neighborhood General policy with an average density limitation of nine housing units per acre. This keeps the density of those policy areas the same as in the current plan, which community participants did not wish to see exceeded, while granting an incentive for quality design through the policy. Under Neighborhood General policy, if applicants do not submit a Planned Unit Development, Urban Design Overlay, or site plan along with their zone changes, they are limited to RS20 or RS15 zoning.

Also located around the periphery of the fast-growing southeast portion of the community are mixed use Neighborhood Center, Community Center, Neighborhood Urban, Corridor General, and Commercial Mixed Concentration policy areas that are intended to meet growth needs as well as to help provide diverse housing opportunities in appropriate locations.

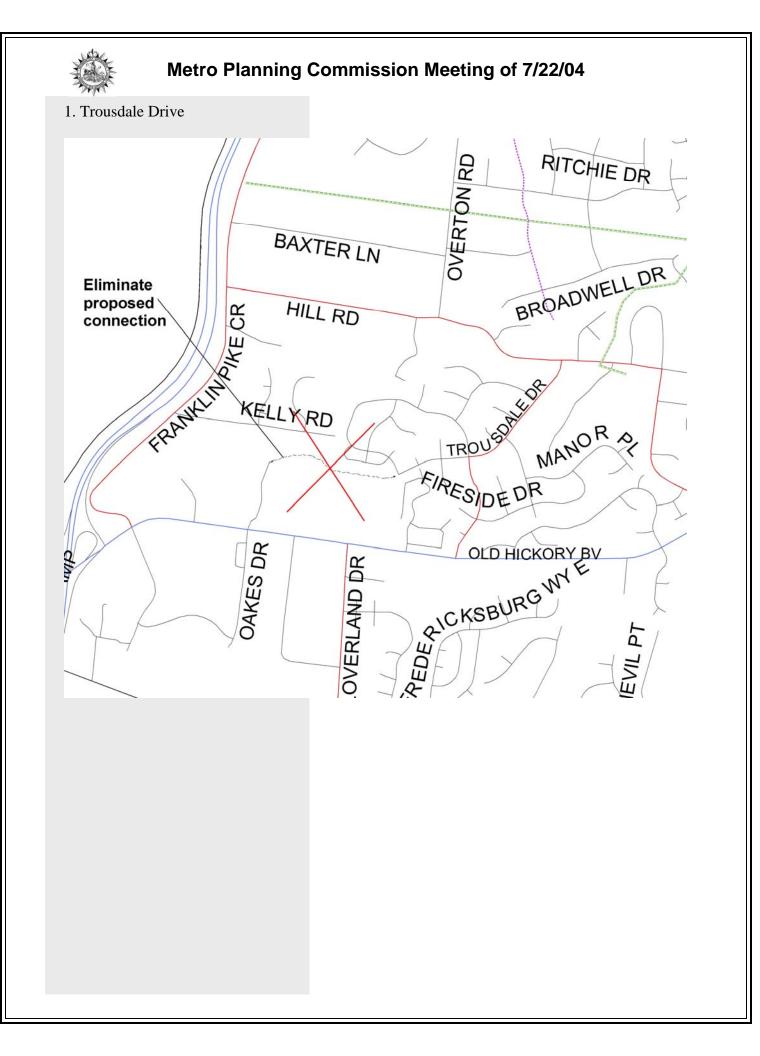

The draft community plan provides recommendations for public facilities and services such as greenways, bikeways, parks, and new street connections to serve the growing community. The majority of these will be provided through the private sector as new development takes place. There will be some exceptions, such as the planned new Southeast Arterial, which will run from Nolensville Pike at Concord Road to Hobson Pike in the Antioch-Priest Lake community and will have a new interchange with I-24 between the Hickory Hollow Parkway and Old Hickory Boulevard interchanges. This roadway will be constructed at public expense.

Staff is recommending that the final draft plan be adopted with the following two changes:

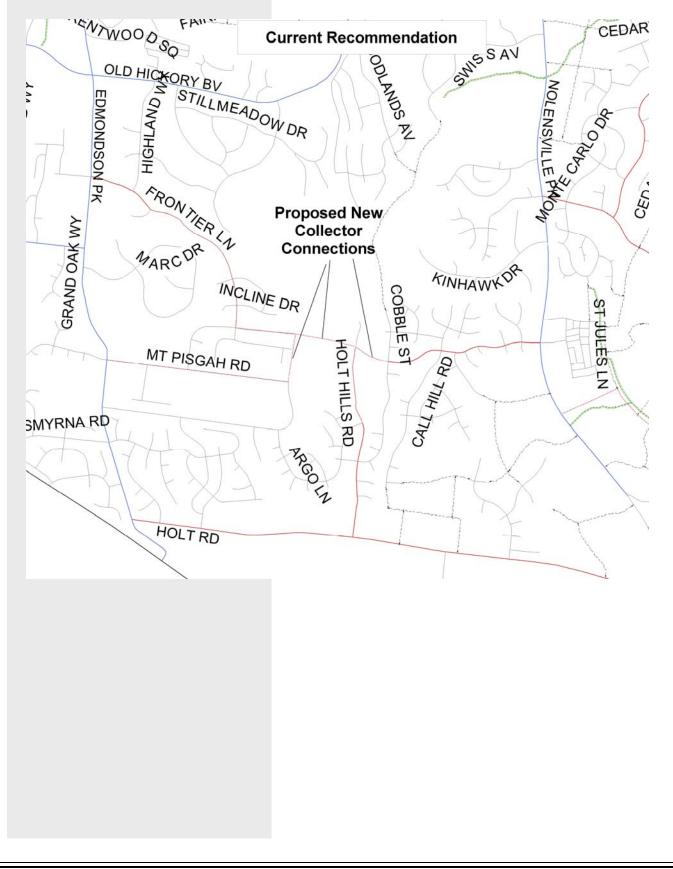

- 1. Elimination of proposed connection of Trousdale Drive to Old Hickory Boulevard: Staff has learned that all options for making this connection have now been eliminated because the owners of property where right-of-way would need to be acquired are unwilling to permit Trousdale to be extended through their land.
- 2. Change proposed collector street system involving Frontier Lane, Christiansted Lane, Mt. Pisgah Road, and proposed new connections to Holt Hills Road and Mt. Pisgah Road to a local street system. In response to local opposition to the connection of Christiansted Lane to Holt Hills Road, Bradford Hills Drive, and Mt. Pisgah Road, staff has done some additional investigation and discussion and come to the conclusion that while these remain important connections to serve this still-growing area, it would be better for the connections to be local connections rather than collectors. Christiansted Lane and Mt. Pisgah Road were built as local streets and it would be best to make the connections into them local streets as well. This would enable traffic calming measures to be employed, preferably in the original design of the new streets.

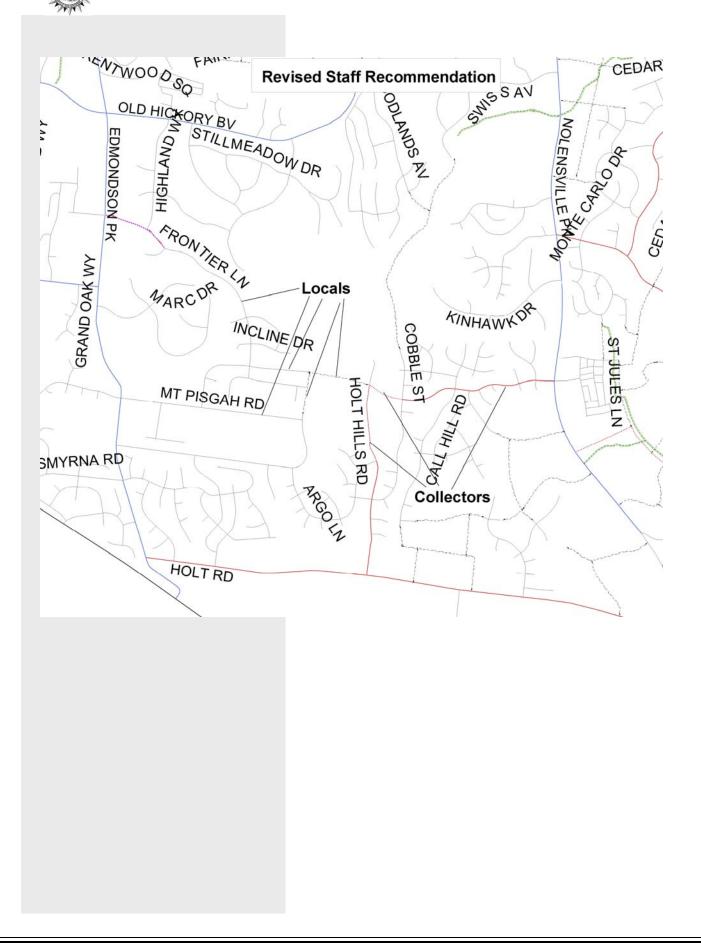

The two changes are detailed below.

2. Frontier Lane-Christiansted Lane-Mt. Pisgah Road to Holt Hills Road and Bradford Hills Drive:

| -  |
|--|
| <b>Zone Change 2004Z-059G-13</b><br>None<br>None<br>32 – Coleman<br>6 – Awipi<br>Laura Digan, applicant for Randall Smith, owner.<br>Deferred from the July 8, 2004 Commission meeting   |
| Harris<br>Disapprove as contrary to the General Plan   |
| Rezone 5.15 acres from agricultural/residential<br>(AR2a) to commercial service (CS) district property<br>at 4046 LaVergne Couchville Pike, south of<br>Hamilton Church Road.  |
| <u>Agricultural/residential</u> requires a minimum lot size of 2 acres and intended for uses that generally occur in rural areas, including single-family, two-family, and mobile homes at a density of one dwelling unit per 2 acres. This AR2a district allows approximately 2 dwelling units.   |
| <u>Commercial Service</u> is intended for a variety of<br>commercial uses, including retail trade, consumer<br>services, financial institutions, general and fast food<br>restaurants, auto-repair, auto sales, self-storage, and<br>light manufacturing and small warehouse uses.   |
|  |
| NG is intended to apply to existing areas that are,<br>and are envisioned to remain, predominantly<br>residential in character, and the emerging and future<br>areas that are planned to be predominantly<br>residential. NG areas include single family<br>residential and public benefit activities. The<br>predominant development type is single-family<br>homes, although some townhomes and other forms<br>of attached housing may be appropriate. |
|  |

| Policy Conflict  | <ul> <li>The proposed zoning district (CS) is not consistent with the NG policy, which is intended for primarily residential development. It is also not consistent with the surrounding zoning pattern in the area. This property currently has no connection to public sewer and may not meet Metro Health Department's standards for a septic field.</li> <li>There is CS zoning north of this property (parcel 021) that was rezoned from AR2a in June 2002, by Council. This property also has no connection to public sewer and did not meet Metro Health Department's requirements for a septic field at the time of this rezoning. The Commission recommended disapproval as contrary to the general plan in January 2002. There is also an undeveloped commercial Planned Unit Development (Four Corners Lodge—176-73-G) to the north was approved for a motel, nightclub, and a swimming pool in 1973.</li> </ul> |
|------------------|---|
| RECENT REZONINGS | Parcel 021 was rezoned from AR2a to CS in June 2002.<br>The Planning Commission recommended disapproval<br>in January 2002.   |
| TRAFFIC          |   |

### TRAFFIC PUBLIC WORKS RECOMMENDATION

With the submittal of Final Development Plans and review by the Traffic Engineer, a Traffic Impact Study may be required to determine the additional traffic generated by the proposed level of development and required mitigations.

#### Typical Uses in Existing Zoning District: AR2a

| Land Use<br>(ITE Code)      | Acres | Density | Total<br>Number of<br>Lots | Daily Trips<br>(weekday) | AM Peak<br>Hour | PM Peak<br>Hour |
|-----------------------------|-------|---------|----------------------------|--------------------------|-----------------|-----------------|
| Single-family detached(210) | 5.15  | 0.5     | 3                          | 28                       | 3               | 3               |

| 2 Martin  |  |
|---|--|
| Project No.<br>Associated Case<br>Council Bill<br>Council District<br>School District<br>Requested by<br>Deferral | Zone Change 2004Z-076G-03<br>None<br>None<br>3 – Hughes<br>3 – Garrett<br>Ralph Monroe, Angel City Development Corporation,<br>applicant for William E. Delaney, III<br>This item was deferred from the June 24, 2004, meeting<br>at the request of the applicant. The applicant has since<br>amended the application to increase the acreage<br>requested for rezoning from 48 acres to 60 acres. |
| Staff Reviewer<br>Staff Recommendation  | Harris<br>Disapprove   |
| APPLICANT REQUEST   | Rezone 60 acres from residential single-family<br>(RS20) to residential single-family (RS10) district at<br>3512 Knight Drive.   |
| Existing Zoning<br>RS20 district  | <u>RS20</u> requires a minimum 20,000 square foot lot and is intended for single-family dwellings at a density of 1.85 dwelling units per acre. This would permit 111 total dwelling units on this site currently.   |
| <b>Proposed Zoning</b><br>RS10 district   | <u>RS10</u> requires a minimum of 10,000 square foot lot and<br>is intended for single-family dwellings at a density of<br>3.7 dwelling units per acre. This would permit 222<br>total dwelling units on this site currently.  |
| <b>Bordeaux-Whites Creek</b><br><b>Community Plan Policy</b><br>Residential Low Medium (RLM)                      | RLM policy is intended to accommodate residential<br>development within a density range of two to four<br>dwelling units per acre. The predominant development<br>type is single-family homes, although some townhomes<br>and other forms of attached housing may be<br>appropriate.   |
| Policy Conflict   | Yes. The proposed RS10 district is not consistent with<br>the RLM policy in this area. Typically, the RLM policy<br>allows for two to four dwelling units per acre, but the<br>Community Plan for this Subarea includes a special<br>policy that limits the density on this property.  |

| Special RLM Policy | The newly adopted Bordeaux-Whites Creek community<br>plan includes a special policy recommending that the<br>maximum density in this area be limited to two<br>dwelling units per acre due to the steep slopes in the<br>area.                      |
|--------------------|---|
| RECENT REZONINGS   | Yes. The Planning Commission recommended the<br>property to the rear of this property, fronting Whites<br>Creek Pike, for approval for RS10 with a PUD on July<br>8, 2004. That property falls within an RLM policy area<br>with no special policy. |
| TRAFFIC            |   |

### TRAFFIC PUBLIC WORKS RECOMMENDATION

With the submittal of Final Development Plans and review by the Traffic Engineer, a Traffic Impact Study may be required to determine the additional traffic generated by the proposed level of development and required mitigations.

Typical Uses in Existing Zoning District: RS20

| Land Use<br>(ITE Code)             | Acres | Units Per<br>Acre | Total<br>Number of<br>Units | Daily Trips<br>(weekday) | AM Peak<br>Hour | PM Peak<br>Hour |
|------------------------------------|-------|-------------------|-----------------------------|--------------------------|-----------------|-----------------|
| Single-family<br>detached<br>(210) | 60    | 1.85              | 111                         | 1,062                    |                 |                 |

#### Typical Uses in Proposed Zoning District: RS10

| Land Use<br>(ITE Code)             | Acres | Units Per acre | Total<br>Number of<br>Units | Daily Trips<br>(weekday) | AM Peak<br>Hour | PM Peak<br>Hour |
|------------------------------------|-------|----------------|-----------------------------|--------------------------|-----------------|-----------------|
| Single-Family<br>detached<br>(210) | 60    | 3.7            | 222                         | 2,125                    |                 |                 |

Change in Traffic Between Typical Uses in Existing and Proposed Zoning District

| Land Use<br>(ITE Code) | Acres |       | Total<br>Number of<br>Units | Daily Trips<br>(weekday) | AM Peak<br>Hour | PM Peak<br>Hour |
|------------------------|-------|-------|-----------------------------|--------------------------|-----------------|-----------------|
|                        |       | +1.85 | +111                        | +1,062                   |                 |                 |

### METRO SCHOOL BOARD REPORT

**Projected student generation** 

### <u>30 Elementary 17 Middle 19 High</u>

**Schools Over/Under Capacity** 

Students would attend Alex Green Elementary School, Ewing Park Middle School, or Whites Creek High School. Ewing Park has been identified as being over

capacity by the Metro School Board. There is capacity at a middle school within the cluster. This information is based upon data from the school board last updated January 16, 2004.

| Project No.<br>Project Name<br>Associated Cases<br>Council District<br>School District<br>Requested By<br>Deferral | Subdivision 2002S-278G-13<br>Arbor Crest<br>None<br>33 - Bradley<br>6 – Awipi<br>Tim Turner, engineer.<br>Deferred from the July 8, 2004 meeting at the request<br>of the Councilman and the applicant.   |
|--|---|
| Staff Reviewer<br>Staff Recommendation   | Fuller<br>Approve   |
| APPLICANT REQUEST  | This is a request to remove a condition from a<br>subdivision previously approved by the Commission<br>on November 14, 2002, which named Metro Water<br>Services as the utility district for an alternative<br>sewer system.  |
|  | On April 27, 2004 Scott Potter, Director of Water<br>Services, issued a letter indicating that since the<br>location of the subdivision is so remote from Metro's<br>existing infrastructure, the Water Services Department<br>did not think it presently is fiscally feasible to provide<br>sewer service to the area. |
|  | The applicant has contracted with Tennessee<br>Wastewater Systems, Inc. to be the private utility<br>provider and the State of Tennessee will be the<br>approving agency for the permit. Metro Water Services<br>and the Metro Health Department agree with this<br>arrangement.  |
|  | Staff recommends approval of this request. The<br>subdivision plan is not changed in any way. All that is<br>changed is that the entity responsible for operating the<br>alternative sewer system is a private company instead<br>of Metro Water Services.  |
|  | To refresh the Commission's recollection as to the details of this project, the staff report from the November 14, 2002, Commission meeting has been set out below:   |
| PRELIMINARY PLAT   | Subdivide 47.56 acres into a 66-lot cluster lot subdivision, at a proposed density of 1.39 dwelling units per acre.   |

| ZONING                                      | RS15 district requiring minimum lot size of 15,000   |
|---|--|
|   | square feet.   |
| CLUSTER LOT OPTION                          | The cluster lot option allows the applicant to reduce<br>minimum lot sizes two base zone districts from the bas<br>zone classification of RS15 (minimum 15,000 sq. ft.<br>lots) to RS7.5 (minimum 7,500 sq. ft. lots). Proposed<br>lots range from 8,950 sq. ft. to 17,563 sq. ft.<br>Pursuant to Section 17.12.080(D) of the Metro Zoning<br>Ordinance, cluster lot subdivisions require a minimum<br>of 15% open space. The applicant successfully<br>complies with this requirement by proposing a total of<br>22.5 acres (47%) of open space – which far exceeds the<br>minimum open space acreage required. |
| SUBDIVISION DETAILS<br>Alternative Sewerage | The Arbor Crest Subdivision will be served by a sand<br>filter and drip irrigation system that will treat sewage<br>generated by each home in a common subsurface<br>sewage disposal system. Sewage is treated in a two-<br>compartment airtight septic tank and then sent to a larg<br>sand filter for further treatment. The treated effluent is<br>then pumped to drip irrigation fields in which drip line<br>distribute effluent at relatively shallow depths (6") into<br>the soil for disposal.   |
|   | Metro Water Services has stated that when the system<br>functions as designed there will be little if any impact<br>on the Long Hunter State Park. This system is<br>preferable to a conventional septic tank system in that<br>the effluent is treated prior to discharge into the ground   |
| TRAFFIC<br>Traffic Study Submitted          | None required.   |
| Traffic Engineer's Recommendation           | The existing section of Bakers Grove Lane should be<br>improved from Bakers Grove Road to Hobson Pike.<br>The improved cross section should match that of Arbon<br>Crest Avenue (46 ft. ROW and 23' roadway,<br>sidewalks). All lots (100%) of the development will us<br>Bakers Grover Road to access Hobson Pike. The<br>existing Bakers Grove Lane is approximately 400 feet<br>in length and 20 feet wide.   |

| - March                    |  |
|----------------------------|--|
| CONDITIONS from 11/14/2002 | <ol> <li>A revised plat must be received prior to the Planning<br/>Commission meeting showing the following:         <ul> <li>Curb, gutter and grass strip shown along Bakers<br/>Grove Road.</li> <li>The classification of all roadways (Minor Local,<br/>Local, etc.) shown.</li> <li>The plat must be stamped with professional seal.</li> <li>Add the Subdivision Number 2002S-278G to<br/>the plat.</li> <li>The temporary dead-ends at the end of Arbor<br/>Crest Avenue and Majestic Way need to be<br/>labeled: "Temporary Dead-End Streets will be<br/>extended in the future."</li> </ul> </li> </ol> |
|                            | 2. An agreement between the developer and Metro<br>Water Services is being drafted to pay for the<br>maintenance of the On Site Sewer System based on<br>a percentage of the revenues collected from the<br>residents in Arbor Crest. This agreement must<br>receive Metro Council approval prior to the<br>issuance of any grading permits.   |
|                            | 3. Information has been received that there is a private cemetery located on the adjoining parcel to the north (Map 23 Parcel 123). The applicant shall verify that no disturbance will take place within 10 feet of the gravesites. The fence proposed at the property line may need to be relocated to stay out of the 10-foot setback although the gravesite is located on the adjoining property.  |
|                            | 4. Two small discrepancies exist between the<br>boundary of the subdivision plat and the boundary<br>as shown on the Metro Property Maps. This<br>discrepancy will need to be resolved by the<br>applicant prior to the approval of any final plats.<br>The Metro property maps include additional<br>property that the preliminary plat does not account<br>for. If any surplus exists, the land shall be counted<br>toward open space.   |
|                            | 5. The existing section of Bakers Grove Lane should<br>be improved from Bakers Grove Road to Hobson<br>Pike. The improved cross section should match that<br>of Arbor Crest Avenue (46 ft. ROW and 23'<br>roadway, sidewalks). Construction plans shall be<br>submitted for bonds with the final plat for phase 1.   |

6. With the final plats for each phase, bonds will be required for the extension of streets and sidewalks, public utilities and landscape buffer yards.

| Staff Reviewer<br>Staff Recommendation   | Mitchell<br>Approve with a recommendation to grant a waiver for<br>Lot Resubdivision Comparability since the property is<br>located within <sup>1</sup> / <sub>2</sub> mile of a Regional Activity Center,<br>and a recommendation to approve the requested<br>sidewalk variance based on Metro Public Works'<br>comments   |
| APPLICANT REQUEST<br>Preliminary & Final Plat  | Subdivide a 0.89-acre tract into a 2-lot subdivision,<br>at a proposed density of 2.2 dwellings units per acre.<br>The applicant is also seeking a sidewalk variance for<br>the requirement to construct a Metro-standard<br>sidewalk along Hillmont Drive fronting the two new<br>lots.  |
| ZONING<br>R10 district   | <u>R10 district</u> requiring a minimum lot size of 10,000 square feet  |
| SUBAREA 10 POLICY<br>RL (Residential Low-Density)  | This subdivision falls within the Subarea 10 Plan's<br>Residential Low-Density (RL) policy. The RL policy<br>was applied to this area because it is developed<br>residentially with densities at or below 2 dwelling units<br>per acre. According to the Subarea 10 Plan, "the intent<br>of this plan is to ensure that future development of infill<br>sites conform with the existing character of surrounding<br>areasand the plan recommends that the prevailing<br>character and densities of these areas be conserved." |
| February 10, 2003<br>Glen Echo / Hillmont<br>Community Meeting   | On February 10, 2003, planning staff met with<br>Councilman Shulman and invited citizens at the Green   |

| Dela .  |  |
|---|--|
|   | Hills Branch Library to discuss the development<br>options for this area of Green Hills. The citizens<br>expressed that: single-family homes were preferred<br>over duplexes; increased density for their neighborhood<br>may be acceptable under an RLM land use policy; and<br>the applicant's (previous) request – to subdivide Lot 12<br>into three lots – was unacceptable because of the<br>considerable size difference between the proposed lots<br>and existing lots on Hillmont Drive. Staff concluded<br>after that meeting that an extension of the RLM policy<br>should be seriously considered south of the zoning line<br>between Graybar Lane and Hillmont Drive and<br>inclusive of all lots along Glen Echo Road and Benham<br>Avenue. |
| SUBDIVISION DETAILS   |  |
|   | The 0.89-acre tract lies along the north margin of<br>Hillmont Drive, and just north of Glen Echo Road. The<br>applicant is proposing two lots, each 72.52 feet in width<br>and lot sizes of 19,036 and 19,776 square feet. This<br>plan proposes a density of 2.2 dwelling units per acre.<br>Although this density still exceeds the Subarea 10<br>Plan's RL policy of 0-2 units per acre, staff believes it<br>may be appropriate to update the policy for this area to<br>support greater infill developing. In addition, at<br>previous neighborhood meetings, some residents of this<br>area recommended that the applicant return to the<br>Planning Commission with a 2-lot subdivision in lieu of<br>the previously proposed 3-lot subdivision. |
| SUBDIVISION VARIANCES   |  |
| SUBDIVISION VARIANCES<br>Sec. 2-4.7, Lot Comparability (Waiver) | The proposed two lots fail the lot comparability<br>requirements for minimum lot width requirement. The<br>comparability test, which takes into account the lot<br>frontage on lots within 300 feet of the subject lot,<br>requires that each lot provide not less than 103 feet of<br>lot frontage. Both lots also fail lot comparability for<br>minimum lot size by not providing a minimum lot size<br>of 28,230 square feet. On April 24, 2003, the<br>Commission disapproved this proposed subdivision,<br>based largely on concerns about the appropriateness of<br>granting a variance for the regulations' comparability<br>provisions.  |

In September 2003, the Commission adopted an amendment to Section 2-4.7 of the Subdivision Regulations that allows the Commission to grant a waiver to those provisions when, "in the opinion of the Planning Commission a smaller lot size is consistent with the General Plan." Several criteria may be applied by the Commission to determine whether a smaller lot size is appropriate. One factor is whether the property is located within <sup>1</sup>/<sub>2</sub> mile of a designated Regional Activity Center. The purpose of this provision is to give the Commission discretion to permit higher intensity residential development within walking distance of the goods and services provided in a Regional Activity Center. Staff recommends that the Commission approve a waiver of the lot comparability requirements for this subdivision because the proposed lots are located within <sup>1</sup>/<sub>2</sub> mile of Subarea 10's Green Hills Regional Activity Center.

The applicant has requested a sidewalk variance due to the absence of sidewalks along Hillmont Drive, due to the amount of drainage construction that would be required to meet Metro Public Works sidewalk construction standards, and due to the possibility of having to relocate or remove a utility pole and existing trees.

The subdivision regulations require a 5-foot wide public sidewalk and a 4-foot wide grass strip along the frontage of the residential properties less than 20,000 square feet in size to be located within the public rightof-way. Should an applicant believe that the installation of sidewalks creates an undue hardship; a variance may be requested by the Planning Commission. The Planning Commission will make findings based upon the evidence to determine if a claimed hardship is true. In making a recommendation to the Planning Commission, staff has reviewed the criteria and determined that:

- The conditions upon which the request for this variance is based are not unique to the subject property and are applicable to other surrounding properties.
- The physical surroundings, shape of the lot frontage, and topography of the grassy swale

Sec. 2-6.1, Sidewalks

| fronting the subject property do not create an<br>undue hardship to the owner of this property.   |
|---|
| The Metro Public Works' Sidewalk Constructability<br>Report states that currently there is a grassy swale, one<br>utility pole at or near the northeast corner of the parcel,<br>and that the street currently has no sidewalk, nor curb<br>and gutter system. Construction of a standard Metro<br>sidewalk along this lot would require the installation of<br>a curb and gutter and possible relocation of one utility<br>pole. |
|   |
|   |
| At the owner's request, Public Works made an<br>additional site visit to review and reevaluate the<br>previously submitted constructability report from 2003.<br>This was done based upon additional information<br>supplied by the applicant's engineer.   |
| Due to the grades, (in this case flat vs. steep grades)<br>significant offsite grading will be required along<br>Hillmont to Glen Echo Drive deepening the ditch line<br>to obtain positive drainage, thus creating a negative<br>impact offsite.   |
| Hillmont Drive is a loop street with this proposed<br>subdivision being on the outside loop along with the<br>utility poles. After reviewing the area with the utility<br>poles, grades, and a shorter distance on the inside loop,<br>(170 feet shorter on the inside loop) it is likely that with<br>any Metro sidewalk project, sidewalks would be<br>installed on the inside curve opposite the subject<br>property.          |
| Subject to this latest review, Public Works could<br>support the applicant's variance request in this<br>particular case.   |
|   |
|   |

| THE   |   |
|---|---|
| Project No.<br>Associated Case<br>Council Bill<br>Council District<br>School District<br>Requested by | Zone Change 2004Z-085G-13<br>None<br>None<br>32– Coleman<br>6 – Awipi<br>Joe McConnell, MEC, Inc., applicant for Luther Marie<br>Vaughn, owner  |
| Staff Reviewer<br>Staff Recommendation  | Harris<br>Disapprove, unless a revised site plan is submitted<br>prior to the MPC meeting.  |
| APPLICANT REQUEST   | Rezone 60.41 acres from agricultural/residential<br>(AR2a) to residential multi-family (RM6) district at<br>Old Hickory Boulevard (unnumbered),<br>approximately 1,650 feet north of Logistics Way.   |
| Existing Zoning<br>AR2a district  | <u>Agricultural/residential</u> requires a minimum lot size of 2 acres and intended for uses that generally occur in rural areas, including single-family, two-family, and mobile homes at a density of one dwelling unit per 2 acres. This zoning district would permit approximately 30 dwelling units total on this site.  |
| Proposed Zoning<br>RM6 district   | <u>RM6</u> is intended for single-family, duplex, and multi-<br>family dwellings at a density of 6 dwelling units per<br>acre. The proposed zoning district would permit<br>approximately 362 dwelling units total on this site.  |
| ANTIOCH-PRIEST LAKE<br>COMMUNITY PLAN POLICY  |   |
| Neighborhood General (NG)   | NG is intended to apply to existing areas that are, and<br>are envisioned to remain, predominantly residential in<br>character, and the emerging and future areas that are<br>planned to be predominantly residential. NG areas<br>include single family residential and public benefit<br>activities. Residential development other than single<br>family is also appropriate provided the location and the<br>particular type of residential development proposed are<br>supported by a detailed neighborhood design plan or,<br>for areas lacking a design plan, a special policy or site<br>plan. |

| Policy Conflict  | The proposed RM6 district is not consistent with the<br>NG policy in this area because the site plan submitted<br>does not conform to the intent of the NG policy.<br>According to the newly adopted LUPA document, the<br>NG policy is intended to "contain a mix and<br>arrangement of development that is appropriate to the<br>site based on where it is situated within the<br>neighborhood with respect to the center and edge of the<br>neighborhood as envisioned in the Structure Plan." The<br>site plan does not provide for a mixture of housing<br>types and does not provide the required street<br>connections shown in the subarea plan. The site plan<br>does, however, provide a 15 acre park donation to the<br>north of the property. |
|------------------|---|
| RECENT REZONINGS | Parcel 104 to the south was rezoned from IR to IG in January 2004, by Council. The Planning Commission recommended approval in September 2003.  |
|                  |   |

### TRAFFIC

With the submittal of Final Development Plans and review by the Traffic Engineer, a Traffic Impact Study may be required to determine the additional traffic generated by the proposed level of development and required mitigations.

#### Typical Uses in Existing Zoning District: AR2a

| Land Use<br>(ITE Code)             | Acres | Density per<br>acre | Total<br>Number of<br>Lots | Daily Trips<br>(weekday) | AM Peak<br>Hour | PM Peak<br>Hour |

## METRO SCHOOL BOARD REPORT **Projected student generation** 25 Elementary 18 Middle 14 High **Schools Over/Under Capacity** Students would attend Mt. View Elementary School, Kennedy Middle School, or Antioch High School. All three schools have been identified as being over capacity by the Metro School Board. This information is based upon data from the school board last updated January 16, 2004. There is capacity at an elementary school within the cluster and a high school at an adjacent cluster (McGavock, Maplewood, Whites Creek, and Stratford). There are no middle schools with capacity in the Antioch cluster. This information is based upon data from the school board last updated January 16, 2004. **Fiscal Liability** The Metro School Board reports that due to the overcrowded condition of the school(s) impacted by this proposed rezoning and the lack of capacity of other middle schools within the cluster, approval of the rezoning and the development permitted by the rezoning will generate a capital need liability of \$234,000 approximately for additional school capacity in this cluster. A new middle school is presently programmed in the 10 year school capital plan. This estimate is based on maintaining current school zone boundaries. **Planned School Capital** Improvements Land was purchased on Pettus Road in FY 03-04 in the Antioch cluster for a new middle school and a new elementary school. The School Board's proposed capital budget for FY 04-05 includes money to construct the middle and elementary schools and to purchase land for a new high school.

| Project No.<br>Associated Case<br>Council Bill<br>Council District<br>School Board District<br>Requested By | Zone Change 2004Z-092G-14<br>2004P-018G-14<br>None<br>12 - Gotto<br>4 - Nevill<br>Lose & Associates, Inc., applicant, for Eatherly Family<br>Holdings, owner.  |
| Staff Reviewer<br>Staff Recommendation  | Mitchell<br>Approve, with conditions subject to traffic<br>recommendation from Public Works prior to the<br>Planning Commission meeting.   |
| APPLICANT REQUEST   | Rezone 16.54 acres from residential (RS10) to<br>residential (RM6) a portion of property at Lebanon<br>Pike (unnumbered), as part of a requested new<br>Planned Unit Development. The property is located<br>along the south side of Lebanon Pike, just west of<br>the Wilson County line.   |
| Existing Zoning<br>RS10 district  | <u>RS10</u> requires a minimum of 10,000 square foot lot and<br>is intended for single-family dwellings at a density of<br>3.7 dwelling units per acre.  |
| Proposed Zoning<br>RM6 district   | <u>RM6</u> is intended for single-family, duplex and multi-<br>family dwellings at a density of 6 dwelling units per<br>acre.  |
| SUBAREA 14 PLAN<br>Residential Low-Medium (RLM)   | RLM policy is a policy category designed to<br>accommodate residential development within a density<br>range of about 2 to 4 dwelling units per acre. The<br>predominant development type in RLM areas is single-<br>family, although some townhomes and other forms of<br>attached housing may be appropriate. The Subarea 14<br>Plan specifically states that the intent is to promote<br>development in accordance with the standard RLM<br>policies. |
| Policy Conflict   | Yes. The associated PUD plan proposes to develop a larger tract than just the 16.54 acres associated with this rezoning request. The total subdivision acreage is proposed at 52.23 acres and includes a portion of  |

Wilson County. The PUD plan proposes a total of 180 living units in Davidson County (90 townhouses and 90 single-family lots). Although the overall density is proposed at 4 units per acre, which includes the 32 single-family lots in Wilson County, the Davidson County portion is 4.2 units per acre. Additionally, the northernmost portion of the subject parcel has hillside slopes at and above 25%. Approval of this zone change should be conditioned on the overall density for the proposed development, including the portion in Wilson County, remaining at or below 4 units per acre

### **RECENT REZONINGS**

No

### TRAFFIC PUBLIC WORKS' RECOMMENDATION:

Since the applicant did not submit the required Traffic Impact Study until the end of the day on July 12, 2004, the Metro Public Work Department has not made a recommendation on this proposal.

Typical Uses in Existing Zoning District: RS10

| Land Use<br>(ITE Code)          | Acres | Units Per<br>Acre | Total<br>Number of<br>Lots | Daily Trips<br>(weekday) | AM Peak<br>Hour | PM Peak<br>Hour |

|---|---|
| Staff Reviewer<br>Staff Recommendation  | Mitchell<br>Approve, subject to traffic recommendation from Public<br>Works prior to the Planning Commission meeting, and<br>subject to the plan being revised prior to Third Reading<br>at Council. If the plan is not revised, the<br>recommendation is to disapprove.  |
| APPLICANT REQUEST<br>Preliminary PUD  | Request to adopt a preliminary Planned Unit<br>Development to allow for 90 townhouses and 90<br>single-family lots on 42.83 acres within Davidson<br>County. The site is located along the south side of<br>Lebanon Pike at the Davidson / Wilson County line.  |
| <b>PLAN DETAILS</b><br>Site Design  | The plan proposes a total of 209 units where 90 units<br>will be townhouses and 119 units will be single-family<br>lots. The subdivision includes 29 single family units in<br>Wilson County and, 90 single-family in Davidson<br>County. All 90 of the townhouses will be located in<br>Davidson County. The townhouses are proposed in the<br>northernmost portion of the property, just south of<br>Lebanon Pike. This area is proposed to be rezoned<br>from the current RS10 district to RM6 district.   |
| Access Issues   | <ul> <li>Access to the subdivision development will be via the following points: <ul> <li>a) Public roadway off of Lebanon Pike that will continue through the entire site to connect to the southernmost property line, which could possibly provide connection to Rowena Drive.</li> <li>b) Oak Leaf Drive makes a T-type intersection in Wilson County. The southern leg of that intersection will abut the majority of the 32 lots within Wilson County and then re-enter Davidson County in the far southeast corner of the property.</li> </ul> </li> </ul> |

The following connections were not made by the applicant, but were requested by Planning Department staff during the plan review process:

- a) Rehnea Drive, to the north, stubs out at the central portion of the property. The applicant is proposing an amenities center adjacent to this possible connection. In lieu of providing the connection, a parking lot is proposed to service this amenities area. The alignment of the proposed parking area and Rehnea Drive is perfectly situated for a street connection.
- b) The applicant proposes townhouses along private street 'C'. This street should be converted to a public street since parking for each townhouse unit is accommodated on-site. In addition, the topography of the site, particularly at this location, is suitable for a roadway connection to the west where the adjacent land is undeveloped. Staff recommends the plan be revised to include a stub street to the west (parcel 10) prior to third reading by Metro Council. If the plan is not revised, then staff's recommendation is to disapprove the application.
- c) It was requested that private street 'A' and 'B' connect to rid street 'A' of the permanently-stubbed end.

Although this site is encumbered by hillside, the majority of the slopes do not exceed 12 to 14%. Based on staff calculations, however, the northernmost portion of the site exceeds 25% slope. This is approximately where the townhouses associated with private street 'A' are located. The Metro Zoning Code requires that areas of 25% or greater slope be preserved and recorded as open space. Accordingly, the townhouses on 25% or greater slopes must be relocated and those areas preserved and recorded as common open space. If the plan does not change, the applicant will need to seek a variance from the Board of Zoning Appeals (BZA). Since the Zoning Code requires the Planning Commission to make a recommendation to the BZA, staff recommends disapproval of a hillside development variance.

A "B" buffer yard with a minimum width of 10 feet is also required by the Zoning Code between the RM6 and

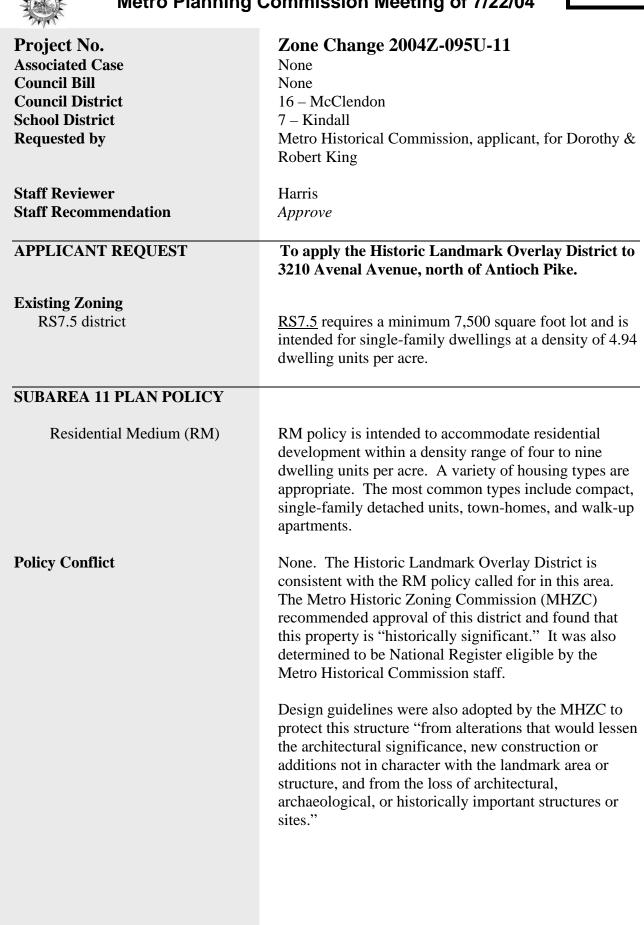

Variances/ Environmental Concern

| the R10 zoning behind the units on Private Street B.  |
|---|
| Currently, the plan does not show this required buffer<br>yard. Staff also recommends that the plan be revised to<br>include this buffer yard. If it is not revised, staff will<br>recommend disapproval of this buffer yard variance to<br>the BZA. No hardship has been identified by the<br>applicant. |
| This request for preliminary PUD approval is<br>associated with a zone change request to change the<br>northern section of the property (parcel 82) from RS10<br>to RM6 to allow for the development of the<br>townhouses.  |
| The RLM policy calls for residential development at 2 to 4 dwelling units per acre. This PUD plan proposes an overall density of 4 dwelling units per acre; however, that number jumps to 4.2 units per acre in Davidson County alone.  |
| The applicant did not submit the required Traffic<br>Impact Study until the end of the day on July 12, 2004.<br>As of July 15, 2004, the Metro Public Work<br>Department has not made a recommendation on this<br>proposal.   |
| <ol> <li>Private Street 'C' must be converted to a public<br/>street with a stub connection to the abutting<br/>property to the west of this site.</li> </ol>   |
| 2. All townhomes proposed along Private Street 'A' must be relocated elsewhere within the site so as to preserve areas of topography that exceed 25% slope.   |
| 3. A 'B' landscape buffer yard must be installed, at least 10 feet in width, along the south side of the townhome units proposed along Private Street 'B'.  |
| <ol> <li>A Tree Preservation / Removal and Grading<br/>Boundary Plan (24x36) must be submitted prior to,<br/>or in conjunction with, the submittal of the Final<br/>PUD application.</li> </ol>   |
|   |

- 5. This preliminary plan is based upon the stated acreage. The actual number of dwelling units to be constructed may be reduced upon approval of a final site development plan if a boundary survey confirms there is less site acreage.
- 6. Prior to third reading at the Metro Council, the plan must be revised to include a stub-street to Parcel 10 to the west. If the plan is not revised to include this stub street, the staff recommendation is to disapprove.

| RECENT REZONINGS             | This property was rezoned from R8 to RS7.5 in<br>November 2003, by Council. The Planning<br>Commission recommended approval in October 2003. |
|------------------------------|--|
| TRAFFIC                      | This rezoning is not expected to have a significant effect on traffic in these areas.  |
| METRO SCHOOL BOARD<br>REPORT | This rezoning is not expected to have a significant effect<br>on student generation projections.   |
|                              |  |
|                              |  |

| DM40 is intended for single family dupley and multi-   |
| <u>RM40</u> is intended for single-family, duplex, and multi-<br>family dwellings at a density of 40 dwelling units per<br>acre.   |
| <u>Office/Residential</u> is intended for office and/or multi-<br>family residential units at up to 20 dwelling units per<br>acre.   |
| <u>RS5</u> requires a minimum 5,000 square foot lot and is intended for single-family dwellings at a density of 7.41 dwelling units per acre.  |
|  |
| RM policy is intended to accommodate residential<br>development within a density range of four to nine<br>dwelling units per acre. A variety of housing types are<br>appropriate. The most common types include compact,<br>single-family detached units, town-homes, and walk-up<br>apartments.   |
| The proposed RS5 district is consistent with the RM policy intended for residential development at a density of four to nine dwelling units per acre. It is also consistent with the development pattern in the area   |
|  |

which is predominantly single-family homes. The RM40, RM20, and OR20 zoning districts are not consistent with RM policy because they permit more than nine dwelling units per acre.

Section 17.40.650 of the Zoning Code states "a structure containing a two-family *nonconforming* use within an RS district may be restored within one year regardless of percentage of damage or destruction."

|                              | regardless of percentage of damage or destruction."  |

| Project No.<br>Project Name<br>Associated Case<br>Council Bill<br>Council District<br>School Board District<br>Requested By | Subdivision 2004S-188U-05<br>Inglewood Place, Resubdivision of Lot 14<br>None<br>None<br>7 - Cole<br>5 - Hunt<br>R.L. Montoya, surveyor, applicant, for Edwin R.<br>Fulcher, owner   |
|---|--|
| Staff Reviewer<br>Staff Recommendation  | Mitchell<br>Approve final plat, and approve following variance<br>requests: 1) Variance for sidewalk construction along<br>Kirkland Avenue, and 2) Variance for Lot Depth-to-<br>Width Ratio.  |
| APPLICANT REQUEST<br>Final Plat with Variance Requests  | Request for preliminary and final plat approval for<br>a 2-lot subdivision, and a request for variances for<br>sidewalk construction on Kirkland Avenue and for<br>Lot Depth-to-Width Ratio. The property is located<br>along the south side of Kirkland Avenue,<br>approximately one-quarter mile east of Gallatin<br>Pike.   |
| <b>ZONING</b><br>RS7.5 district   | <u>RS7.5</u> district requires a minimum lot size of 7,500 square feet and is intended for single-family dwellings at an overall density of 4.9 dwelling units per acre.   |
| VARIANCE REQUESTS<br>Section 2-6.1<br>Sidewalk Construction:  | The applicant is requesting a variance for sidewalk<br>construction along the south side of Kirkland Avenue<br>fronting the newly-created lot. The stated hardship is<br>that "there are no sidewalks in the area, plus there is a<br>storm grate in the same location [as the required<br>sidewalk]."<br>A section of sidewalk approximately 50 feet in length<br>will require significant reconstruction of the roadway<br>by construction of a curb and gutter system for a<br>relatively short section of sidewalk in a mid-block<br>location, which is inconsistent with good planning and<br>design. In addition, staff researched the Sidewalk<br>Priority Program, as published by Metro Public Works, |

|   | and found that Kirkland Avenue is not scheduled for<br>new sidewalks within any future timeframe.  |
|---|--|
| Section 2-6.2.1<br>Lot Depth-to-Width Ratio | The applicant is requesting a variance from the<br>Subdivision Regulation requirement that the average lot<br>width cannot be less than 25% of the average lot depth.                |
|   | Staff supports granting this variance since all the lots<br>along Kirkland Avenue, on both sides of the street, are<br>very deep lots and have historically been platted as<br>such. |

| Project No.<br>Project Name<br>Associated Cases<br>Council District<br>School District<br>Requested By | Subdivision 2004S-214G-14<br>Cooks Landing<br>None<br>12 - Gotto<br>4 - Nevill<br>Cooks Landing Partnership, owner/developer, and<br>Joseph G. Petrosky Associates, LLC, surveyor.  |
| Staff Reviewer<br>Staff Recommendation   | Leeman<br>Approve with conditions   |
| APPLICANT REQUEST<br>Preliminary Plat  | Subdivide 17.13 acres into 42 single-family lots<br>along the south side of Stewarts Ferry Pike, east of<br>Old Hickory Boulevard.  |
| <b>ZONING</b><br>RS15 district   | <u>RS15</u> district, requiring a minimum lot size of 15,000 square feet and intended for single-family dwellings at an overall density of 2.47 dwelling units per acre. The RS15 district permits a maximum of 42 single-family lots on this property.   |
| SUBDIVISION DETAILS  | This plat is consistent with the Subarea 14 Plan's<br>Residential Low Medium (RLM) policy calling for two<br>to four dwelling units per acre. Proposed lot sizes<br>range from 10,000 square feet to 18,300 square feet.<br>The proposed subdivision provides 2.57 acres (15%) of<br>open space. While there is no floodplain on this<br>property, several lots are designated as Critical Lots due<br>to steep topography.   |
| Connectivity   | One stub-street is provided to the large tract of land to<br>the south. Staff considered requiring more connectivity,<br>but since there are limitations on future development in<br>this area, it was determined that no additional stub-<br>streets were necessary. The limitations were mainly the<br>steep topography and the proximity to Percy Priest<br>Lake to the south, which limits overall connectivity in<br>the future. Staff also considered requiring a stub-street<br>to the west that would tie into Old Hickory Boulevard,<br>but because Old Hickory Boulevard dead-ends into the<br>lake, it was deemed unnecessary. |
|  | Sidewalks are proposed along the frontage of Stewarts<br>Ferry Pike, as well as along both sides of Cooks<br>Landing Drive and all of the new internal streets.   |

| <ol> <li>Show right-of-way on Stewarts Ferry Pike.</li> <li>Revise right-of-way radius on turnarounds to 41.5 feet (30 feet of pavement + 2.5 feet of curb and gutter + 5 feet of sidewalk).</li> <li>Demonstrate adequate sight distance for proposed Cooks Landing Drive access on Stewarts Ferry Pil in Access Study.</li> <li>Cooks Landing Drive should be straightened.</li> <li>Staff recommends conditional approval of this preliminary plat, subject to the following conditions:         <ol> <li>Prior to final plat approval, adequate sight distance for the Cooks</li> </ol> </li> </ol> | TRAFFIC<br>PUBLIC WORKS'<br>RECOMMENDATION | Revise and Resubmit.  |

| Metro Planning Commission Meeting of 7/22/04   |  |
|--|--|
| Project No.<br>Project Name<br>Associated Cases<br>Council District<br>School District<br>Requested By | Subdivision 97S-014U-03<br>Forest Vale Subdivision<br>None<br>1 - Gilmore<br>1 – Thompson<br>Metropolitan Department of Law  |
| Staff Reviewer<br>Staff Recommendation   | Fuller<br>On advice from the Metropolitan Department of Law,<br>staff recommends that the prior approval be rescinded.   |
| APPLICANT REQUEST  | The Metropolitan Department of Law recommends<br>the rescission of the original approval of this<br>subdivision since it was recorded in error without a<br>bond in place. The original plat was recorded<br>without the required sewer line extension being built<br>or properly bonded.  |
| SUBDIVISION DETAILS<br>Timeline<br>July 17, 1997   | James S. Norman of Metro Water Services issued a<br>letter to the Planning Department indicating approval of<br>the Forest Vale Subdivision with the contingency for a<br>bond for the construction of sanitary sewer in the<br>amount of \$28,400.  |
| January 14, 1999   | The Forest Vale final plat was recorded without the required bond for sewer improvements.  |
| February 21, 2003  | Scott Potter, Director of Water Services, sent a letter to<br>Terry Cobb, Director of Codes Administration,<br>informing Codes of the problem and requesting that any<br>building permit applications of these properties be<br>denied. This letter was copied to Mr. Howard Fisher,<br>the developer, and identified the steps that needed to be<br>taken to rectify the situation. |
|  | <ul> <li>The steps Mr. Potter identified to correct the situation were:</li> <li>Resubmittal of sewer construction plans for approval by the State of Tennessee and Metro Water Services.</li> <li>A posting of a bond for \$40,000.</li> </ul>  |
| June 3, 2004   | Brooks Fox, Metropolitan Department of Law, issued a<br>letter to Howard Fisher, developer, informing him that<br>if the steps were not taken to comply with the   |

construction and bonding of the sewer line, then the Planning Commission could rescind the approval of the subdivision. June 8, 2004 The Department of Law issued a letter to Mr. Rick Bernhardt, Planning Director, requesting that the issue be placed on the July 22, 2004, agenda of the Planning Commission to give the developer ample time to show an intent to comply. This letter was copied to both owners of the land, Howard Fisher and Don Whitfield. Staff recommends rescission of the Forest Vale final **STAFF RECOMMENDATION** subdivision plat approval. The developer, Howard Fisher, has had ample time to construct a sewer line since the recording of the plat in 1999, and has shown no intent to comply with the requirements of the subdivision plat approval.

| Project No.<br>Project Name<br>Associated Case<br>Council Bill<br>Council District<br>School Board District<br>Requested By | Planned Unit Development 122-83-U-12<br>The Woodlands Subdivision<br>None<br>31 - Toler<br>2 - Blue<br>Prestige Homes, applicant, for Jeffrey Hitt & J.D.<br>Eatherly, owners.   |
|---|--|
| Staff Reviewer<br>Staff Recommendation  | Mitchell<br>Recommend that the MPC consider this application as<br>an amendment to the PUD, and that the Commission<br>disapprove the application.   |
| APPLICANT REQUEST<br>Revise Preliminary & Final PUD   | Request to revise the preliminary Planned Unit<br>Development and for final PUD approval to allow<br>for the development of 15 single-family lots along<br>the west side of South Woodstone Lane and to<br>remove the future southern extension of Windypine<br>Drive. The subdivision is located along the south<br>side of Old Hickory Boulevard approximately one<br>mile west of Nolensville Pike.   |
| <b>PLAN DETAILS</b><br>Site Design  | The plan proposes to 1) remove a future southern<br>extension of Windypine Drive beyond Maplesong<br>Drive to 2) allow for the development of 15 single-<br>family lots on the west side of South Woodstone Lane.<br>Two lots are proposed at the terminus of Windypine<br>Drive, where a permanent cul-de-sac would be<br>constructed. The remaining 13 lots would be<br>constructed within the hillside along the west side of<br>South Woodstone Lane extending down to the existing<br>permanent cul-de-sac.   |
| PUD Plan History  | This PUD plan was originally approved by Metro<br>Council in 1983. It was again approved by the Metro<br>Council, as an amendment, in 1986 (BL86-1400) to<br>allow for the development of 380 apartments, 200<br>townhomes, and 239 single-family homes, for a total of<br>819 residential units. The latest requests to amend the<br>PUD plan came in three (3) successive attempts in<br>1996, 1999, and 2001. Those three attempts proposed<br>to amend the southern portion of the property to allow<br>for the development of 150 townhomes where 152 |

Status of Earlier Planned Unit Developments single-family homes are currently approved per the 1986 plan. All three attempts failed to receive Council approval.

The preliminary PUD plan last approved by Metro Council allows for the southern extension of Windypine Drive with single-family lots located along the eastern side of the street. If that plan was built, in light of the current build-out, lots would be adjacent to the existing South Woodstone Lane; however, a buffer would be provided between those lots South Woodstone Lane.

Section 17.40.120(G)(2) of the Zoning Code states: "The planning commission may consider and approve minor modifications to a previously approved planned unit development subject to the following limitations. All other modifications shall be considered by the planning commission as an amendment to the previously approved planned unit development and shall be referred back to the council for approval according to the procedures of Section 17.40.120(A)(5). That portion of a planned unit development master plan being amended by the council shall adhere to all provisions of this code."

The last Council-approved plan allowed for the development of homes along the east side of the Windypine Drive extension. These homes were to be constructed on a downslope, however, since the roadway was to run along the westernmost edge of the PUD boundary.

The current request proposes to remove the roadway extension and place the lots along the east side of the existing South Woodstone Lane, which would change the lots from downslope lots to upslope lots. Section 17.40.120(G)(2)(a) provides that a changed to a PUD should be treated as an amendment - - and thus resubmitted to the Council for consideration - - if : "*In the judgment of the commission, the change does not alter the basic development concept of the PUD*." Staff recommends that the Commission consider this application to be an amendment based on the following:

1. The current Council-approved plan established that the lots to be located along the east side of the Windypine Drive extension would have a rear

|  | <ul> <li>orientation to those lots located along the east side of South Woodstone Lane. The latter lots could expect to face the rear yard and open space buffer behind the lots located along Windypine Drive.</li> <li>2. Homes constructed on a downslope are graded and developed in a very different manner than homes constructed on an upslope. If these 13 lots are allowed to be developed along the west side of South Woodstone Lane, significant retaining walls will need to be constructed. These retaining walls would be required since the homes would be constructed in the lower portion of the lot to avoid having longer, extremely steep driveways. If lots were developed along the east side of Windypine Drive extension, they would be located at the "top" of the slope and would be developed in such a way as to hold the house onto the hill versus completely retaining the earth from falling in on the house.</li> </ul>   |
|--|---|
| Recommendation Analysis                    | Staff recommends that the Planning Commission<br>consider the request as an amendment based the<br>statements above. Staff also recommends disapproval<br>of the amendment because amendments to a PUD must<br>comply with all provisions in the Metro Code. Section<br>17.28.030 (A)(2) states that: <i>"The planning<br/>commission may authorize lots on natural slopes<br/>ranging up to twenty five percentLarge contiguous<br/>areas containing natural slopes in excess of twenty-five<br/>percent should be recorded as common open space and<br/>permanently maintained in a natural state." This PUD<br/>plan would be considered a cluster lot PUD under the<br/>current Metro Code since the base zone is R15, but the<br/>lots range from 6,600 square feet to 14,000 square feet.<br/>The area where the 15 lots are now proposed ranges in<br/>slope percentages between 20 and over 36%. The<br/>Planning Commission may only authorize lots on<br/>natural slopes ranging up to 25%. Accordingly, staff<br/>recommends disapproval of the request as an<br/>amendment.</i> |
| TRAFFIC<br>PUBLIC WORKS'<br>RECOMMENDATION | No exception taken  |

| Project No.<br>Project Name<br>Associated Case<br>Council Bill<br>Council District<br>School Board District<br>Requested By | Planned Unit Development 2004P-006U-10<br>Lone Oak Village Subdivision<br>None<br>25 - Shulman<br>8 - Harkey<br>Wamble & Associates, PLLC, applicant, for Alldredge<br>Kirby Development, LLC, owner.   |
|---|---|
| Staff Reviewer<br>Staff Recommendation  | Mitchell<br>Approve with conditions   |
| APPLICANT REQUEST<br>Final PUD  | Request for final Planned Unit Development<br>approval to allow for the development of seven<br>single-family houses proposed to front a new public<br>cul-de-sac. The property is located along the west<br>side of Lone Oak Road, approximately 830 feet<br>south of Shackleford Road in the Green Hills area.  |
| <b>PLAN DETAILS</b><br><i>Site Plan</i>   | The plan proposes seven single-family lots on a new<br>public cul-de-sac that will run westward off of Lone<br>Oak Road. The plan also proposes a standard 46-foot<br>right-of-way with a sidewalk on the south side of the<br>street where the new homes are proposed.   |
| MPC Action on March 11, 2004  | As part of the request to adopt the new PUD, the<br>applicant was required to either install a sidewalk on<br>the north side of the new street or request a variance<br>from the requirement. The applicant sought the<br>variance, which the commission disapproved; however,<br>the Commission required the applicant to work with<br>Metro to come up with a suitable off-site location for<br>the sidewalk since it was agreed that a sidewalk on the<br>north side of the new street was not feasible or<br>practical. |
| Metro Council Action  | Prior to adoption of the new PUD by Metro Council, an<br>amendment was submitted that required the developer<br>to construct 180 linear feet of sidewalk, in accordance<br>with current Metro Public Works' standards, within the<br>Lone Oak Road right-of-way. This portion of sidewalk<br>will extend from the southeast corner of Shackleford<br>Road and Lone Oak Road and extend southward along  |

| ,  | the east margin of Lone Oak Road approximately 180 linear feet.   |
|--|---|
| TRAFFIC<br>PUBLIC WORKS'<br>RECOMMENDATION | All comments were adequately addressed by the applicant.  |
| CONDITIONS                                 | <ol> <li>The developer of said Planned Unit Development<br/>shall not be required to construct a sidewalk on the<br/>northern boundary of the proposed cul-de-sac<br/>shown on the plans approved by the Planning<br/>Commission. As a condition for the Council's<br/>approval of this PUD, however, the developer shall<br/>construct 180 linear feet of sidewalk, in accordance<br/>with current Metro Public Works' standards, from<br/>the southeast corner of Shackleford Road and Lone<br/>Oak Road and extending southward along the east<br/>margin of Lone Oak Road approximately 180 linear<br/>feet, ending at the existing driveway opposite the<br/>intersection of Lone Oak Road with Warfield Drive.</li> <li>This approval does not include any signs. Business<br/>accessory or development signs in commercial or<br/>industrial planned unit developments must be<br/>approved by the Metropolitan Department of Codes<br/>Administration except in specific instances when<br/>the Metropolitan Council directs the Metropolitan<br/>Planning Commission to approve such signs.</li> <li>The requirements of the Metropolitan Fire<br/>Marshal's Office for emergency vehicle access and<br/>fire flow water supply during construction must be<br/>met before the issuance of any building permits.</li> <li>Authorization for the issuance of permit<br/>applications will not be forwarded to the<br/>Department of Codes Administration until four (4)<br/>additional copies of the approved plans have been<br/>submitted to the Metropolitan Planning<br/>Commission.</li> <li>These plans as approved by the Metro Planning<br/>Commission will be used by the Department of<br/>Codes Administration to determine compliance,</li> </ol> |

both in the issuance of permits for construction and field inspection. Significant deviation from these plans will require reapproval by the Planning Commission and possibly the Metro Council.

| Project No.<br>Project Name<br>Associated Case<br>Council Bill<br>Council District<br>School Board District<br>Requested By<br>Staff Reviewer | Planned Unit Development 2003P-010U-07Jardin de Belle SubdivisionNone34 - Williams8 - HarkeyLittlejohn Engineering Associates, Inc., applicant, for<br>Tarragon Realty Investors, Inc., owner.Mitchell   |
|---|--|
| Staff Recommendation  | Approve with conditions  |
| APPLICANT REQUEST<br>Final PUD  | Request for final Planned Unit Development<br>approval to allow for the development of a 34-lot,<br>single-family, Charleston-style subdivision on 6.18<br>acres. Property is located along the north side of<br>Forrest Park Drive, east of Maybelle Lane, and west<br>of Page Road.  |
| <b>PLAN DETAILS</b><br>Site Plan  | This final PUD plan is consistent with the preliminary<br>plan as approved by the Metro Planning Commission<br>on November 13, 2003, and by the Metro Council on<br>January 21, 2004.  |
|   | The PUD plan proposes 34 single-family lots where a 29-unit apartment complex, 2 duplexes, and 2 single-family homes currently exist, on the northwest corner of Page Road and Forrest Park Drive. The development proposes a mix of Charleston-style Single Houses, Double Houses, and Georgian center-entrance homes that are more centrally balanced. The Single and Double Houses traditionally have a much thinner lot width than typical suburban residential development. Every lot is proposed to have either rear access or side access leading to a rear-located garage / carriage house. The plan proposes a single one-way street for ingress and egress off Forrest Park Drive. Only 8 lots front Forrest Park Drive, while the remaining lots front the one-way internal street. |
|   | The applicant has retained the orientation of the homes<br>toward the internal one-way street – which keeps the<br>highest portions (3-story) of the homes internal to the<br>project. Additionally, the Charleston-style home   |

|                                 | replicates the front façade to the sides and rear of the house to enhance architectural styling.   |
|---------------------------------|--|
|                                 | Stormwater management facilities are proposed in the<br>northeast corner of the site and are proposed to be<br>handled by a dry detention facility that will be heavily<br>landscaped, with a berm, along Page Road.   |
| TRAFFIC                         |  |
| PUBLIC WORKS'<br>RECOMMENDATION |  |
| RECOMPLENDATION                 | All comments were adequately addressed by the applicant.   |
| CONDITIONS                      |  |
|                                 | <ol> <li>The project shall be developed in accordance with<br/>the 'Conceptual Streetscape Elevation – Page Road<br/>&amp; Maybelle Lane', as prepared by Littlejohn<br/>Engineering Associates, Inc., and dated November<br/>7, 2003.</li> </ol>  |
|                                 | <ol> <li>The project shall be developed in accordance with<br/>the 'Conceptual Streetscape Plan – Page Road &amp;<br/>Maybelle Lane', as prepared by Littlejohn<br/>Engineering Associates, Inc., and dated November<br/>7, 2003.</li> </ol>   |
|                                 | 3. Per the submitted Tree Preservation Plan, as<br>completed by The Parke Company, and dated May<br>27, 2004, all conditions (listed A through N) for tre<br>preservation care shall be met as required by the<br>certified arborist.  |
|                                 | 4. Should any tree that is tagged, fenced, and<br>appropriately protected for preservation die within<br>one year of the issuance of the grading permit, a<br>tree of the same species, shall be planted in its<br>place. The size of the replanting, whether measure<br>using DBH (diameter at breast height) or caliper,<br>shall be determined by the certified arborist to<br>ensure survivability, healthy growth, yet also act to<br>replace the canopy of the existing shade trees. |
|                                 | 5. All construction activity, whether temporary or semi-permanent, shall enter and exit the site via Forrest Park Drive.   |

- The developer shall construct all proposed streetscape improvements, inclusive of the five-foot sidewalk and any other voluntary decorative improvements, prior to the issuance of the first Use & Occupancy Permit for the 34-lot development.
- 7. This approval does not include any signs. Business accessory or development signs in commercial or industrial planned unit developments must be approved by the Metropolitan Department of Codes Administration except in specific instances when the Metropolitan Council directs the Metropolitan Planning Commission to approve such signs.
- 8. The requirements of the Metropolitan Fire Marshal's Office for emergency vehicle access and fire flow water supply during construction must be met before the issuance of any building permits.
- 9. Authorization for the issuance of permit applications will not be forwarded to the Department of Codes Administration until four (4) additional copies of the approved plans have been submitted to the Metropolitan Planning Commission.
- 10. These plans as approved by the Metro Planning Commission will be used by the Department of Codes Administration to determine compliance, both in the issuance of permits for construction and field inspection. Significant deviation from these plans will require reapproval by the Planning Commission and possibly the Metro Council.
