Disaster	Recover	Diversion

Comment on any disaster related solid waste activities that may have influenced diversion efforts with the county.

N/A

Source Reduction Activities

Describe source reduction and reuse activities by public or private entities by jurisdiction.

Metro Public Works in partnership with Allied Waste and the Metropolitan Public School System has been promoting school recycling since the spring of 2006. This recycling program places recycling dumpsters for fiber collection at any interested MNPS school. The dumpsters are then serviced though a contract between MNPS and Allied Waste. Public Works has distributed informational material promoting recycling, conducted classroom programs and field trips to educate children on recycling at school and at home. During 2008, Metro Beautification distributed over 1249 desk-side recycling bins to 41 schools to assist them with reducing their waste. Currently 100% MNPS schools are participating in this program or have Metro Public Works recycling drop offs located on the school property.

Metro Beautification has also developed a program to distribute backyard compost bins to schools, community centers and the public. Interested schools and community centers can receive backyard compost containers at no cost and compost bins are sold to individuals at Public Works' cost. In 2008, 547 Earth Machines, 27 Green Cones, 78 Compost Thermometers and 169 Kitchen Collection Containers where sold or donated. Public Works has estimated over 65 tons were diverted from the waste stream by this backyard composting program in 2008.

Mayor Dean issued a 100% employee recycling mandate for city government in the spring of 2008. Public Works partnered with General Services to expand their existing program which had been cut back in 2005 due to budget constraints. City employees were provided desk-side recycling blue bins and educational material. Public Works also set up a webpage so that employees could learn more about the importance of recycling (http://www.nashville.gov/Recycle/Recycling/MetroBuilding.htm) and waste reduction. Collection containers were placed at all city buildings for employee recycling collection. Public Works also placed recycling containers on each floor of the Courthouse for visitors to recycle. Paper, cardboard, plastic bottles/cans, aluminum cans and metal cans are collected and recycled through this program. Recycling tons for this program more than doubled in CY08 (400.30 tons) over CY07 (167.97 tons).

List any restrictions the county or region places on collected wastes (Examples: No paint cans, no gas tanks, no monitors, etc.).

No radioactive waste		
I No radioactive waste.		

Convenience Centers

* Have there been any changes to the number of Convenience Centers or the way they are operated by the county?

Narrative:

Public Works uses different media to educate residents on the importance of recycling, waste reduction, composting, etc. Below is a list of the different media used:

- 1. Website The www.nashville.gov/recycle website provides comprehensive information on all waste reduction services provided to residents. This website is updated regularly.
- 2. Metro Channel 3 Metro Channel 3 runs slides daily broadcasting information on Public Works programs including recycling drop-off sites and convenience centers, HHW, brush and leaf collection.
- 3. Tennessean The Tennessean has promotional material on recycling on their web page and as banner ads in the newspaper. During 2008 these ads have resulted in over 1.1 million impressions.
- 4. Channel 2 Channel 2 runs recycling ads on their web page which have resulted in 381,719 impressions during 2008.

Public Works plans to continue using the media to promote recycling, composting and all waste reduction programs during 2009 as funding is available.

Education

Target Audience Group	Projected Served	Projected Cost	Repetitions or Number
Adult/General Public			
Business/Industry			
Government/Institutional			
Children/Educators			

Narrative:

Children/Educators: Metro Beautification plans to continue programs described in the Past Education Efforts section for the coming year. These programs have been very successful at reaching out to children and adults though classroom presentations, field trips, community meetings, etc. Beautification plans to print and distribute a booklet of educational activities during 2009 along with updated MNPS learning standards to encourage schools to participate in recycling awareness programs.

Metro Beautification has also worked closely with Lockeland Elementary Design Center and other schools to provide outdoor compost bins and instruction lunch waste composting and composting used for science studies and in conjunction with school gardens. Beautification will continue to provide compost bins and educational resources to schools to assist with their waste reduction efforts and loan out worm bins for classroom use.

Colleges/Universities: During 2008, Metro Beautification staff began conducting special programs for college students. Classes at TSU and Belmont University learned about waste management and recycling.

Business/Industry: Public Works provides brochures, lists of area recyclers and waste reduction tips to businesses. Waste Management staff also consult with developers, architects and business managers as requested to review sound waste management practices. Additionally, Public Works plans to hold an exploratory meeting with business/industry leaders to educate on the Metro region recycling options and discuss how we as a local government can work together with the private sector to assist the Metro Region with source reduction, reuse, and with achieving higher recycling levels.

🦈 Residential Solid Waste - 🥾 Annual Material Tonnage - 2008

- 🦈 Program Summary 2008
- A * indicates a required field

Improvements Remediation

* Facility Improvements - Project any facility improvements needed for processing and/or managing solid waste and diversion efforts.

During 2008, the surface of the brush and yard waste processing pad was repaved.

* Monitoring Cost Projections - Project any future monitoring, remediation, or mandated improvements over the next five years by the county for county owned solid waste facilities, including convenience centers or transfer stations.

Bordeaux = \$49,000 Ash Monofill = \$30,000 Due West = \$26,000 Lebanon Road = \$22,000 Compost Facility = \$2,500

Diversion Strategy - Detail Strategies on Diversion

* The Region's 10-Year Plan outlined a strategy to manage solid waste. Looking back on the Plan from this current year, what changes have been made in the way the Region handles & prioritizes SW?

In the fall of 2008, Public Works signed a contract with EarthSavers to start a curbside recycling program in the Bellevue area. This program will kick off in the early part of 2009 but approximately 600 to 700 residents in Bellevue have signed-up for the service. The Bellevue curbside recycling program with EarthSavers, if successful, may be expanded to other parts of the General Services District of Davidson County in the coming months and year.

* What changes to your solid waste plan will be expected and how will these changes be measured to determine successes?

The Davidson County Region Solid Waste Board will be submitting an updated 10 Year Plan to TDEC. The updated 10 Year Plan will provide a list of options for the future to reduce waste. The Davidson County Region Solid Waste Board has proposed a 60% diversion from any landfill over the 1995 base year by 2018.

- * List the three largest obstacles to your SW program. Include the solid waste plan goals and any specific county identified goals for solid waste management.
 - 1. The 2008/09 fiscal year saw a cut in Public Works funding for all divisions. Due to the budget cut, Public Works reduced the number of brush collections for residents in the County from 5 times/year to 3 times/year.
 - 2. While not directly an obstacle, during the last year the Waste Management Division and the Streets and Road Division of Public Works were combined for greater efficiency. This was a challenge for staff in both divisions but overtime, with increased efficiency and streamlined operations it will prove to be a benefit to Davidson County residents in reduced costs.
 - 3. While overall funding was cut in 2008, Public Works was asked to expand certain operations including our Inhouse Recycling program. It is important for Metro Government to lead by example Expanding recycling collection to all city buildings with a challenge from the Mayor for 100% employee participation shows our

Waste Stream Estimate

Give approximate percentages of each category of waste that make up your county's MSW stream.

* Residential	* Commercial	* Institutional	* Industrial
20.00%	45.00%	0.00%	35.00%

Successes and Setbacks

* Describe the difficulties you encountered concerning problem wastes for each of the following (auto fluids, gasoline tanks, tires, paint) and how you are dealing with each.

Nashville and Davidson County residents have access to recycling and waste disposal, including household hazardous waste, seven days/week at the East Convenience Center. Public Works expanded the HHW program to include 2 mobile collection events held in the spring and fall at several of the recycling drop-off sites. These mobile events allowed residents to drop-off CFL's, batteries, unused medications, mercury thermometers, and other items for proper recycling or disposal.

Public Works has also signed a contract with an electronics recycling company to recycle TV's. With the switch to digital signals, it is anticipated that many residents will dispose of older televisions. Currently, residents can bring old TV's to the East Convenience Center where they will be recycled along with other electronics and computers.

* Describe any setbacks encountered in your solid waste management program and how these setbacks will be resolved in future plans.

The biggest setback during 2008 was the sudden fall in market prices for recyclables. This affected the projected revenue for the rest of FY09. While market prices have seen a slow increase in the first few months of 2009, budgeting for the up coming fiscal year will reflect a much more conservative projection of revenue.

* Describe your successes in the implementation of your Solid Waste Management Plan. What are you doing well to promote waste reduction?

In the Spring of 2008, Mayor Dean issued a 100% employee recycling mandate. While Public Works had provided recycling to many city buildings, budget cuts in 2005 had made expansion of this program challenging. Public Works provided collection containers at all city buildings and desk-side blue recycling bins as requested. During 2008, Public Works saw over a 100% increase in recycling tons at city buildings from 2007.

Public Works expanded the recycling drop-off program in 2008 by adding 3 new drop-off sites at McGavock High School, the Northwest Family YMCA and Tennessee State University. In addition, 2 recycling drop-off points were added in the downtown area for residents in multi-family buildings. Recycling tons in 2008 increased 20% over 2007 tons.

During the past calendar year, there was an increase in demand for recycling at events. Public Works has a loaner program for event recycling containers and will supply a recycling trailer for larger events. Public Works assisted with recycling at 80 events including the CMA Festival, the Country Music Marathon, and all Tennessee Titans home games.

🦈 Residential Recycling - 🗸 Annual Material Tonnage - 2008

The figures presented below are annual totals for your jurisdiction. They have been normalized from other units (if any) to tons.
