APPLICANT REQUEST

Amend SP to permit an increase in the number of hotel rooms and permit the construction of a new hotel.

Zone Change

A request to amend a Specific Plan for various properties located at the northwest and northeast corners of Cleveland Street and Meridian Street (3.39 acres), to permit an increase in the number of permitted hotel rooms and permit the construction of a new hotel on the site.

Existing Zoning

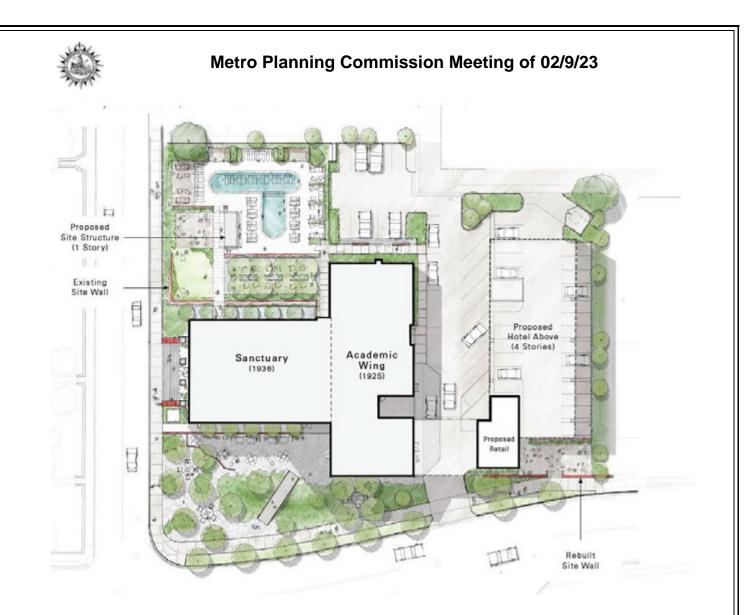

Specific Plan-Mixed Use (SP-MU) is a zoning district category that provides for additional flexibility of design, including the relationship of streets to buildings, to provide the ability to implement the specific details of the General Plan. This Specific Plan includes residential uses in addition to commercial uses.

Proposed Zoning

Specific Plan-Mixed Use (SP-MU) is a zoning district category that provides for additional flexibility of design, including the relationship of streets to buildings, to provide the ability to implement the specific details of the General Plan. This Specific Plan includes residential uses in addition to commercial uses.

EAST NASHVILLE COMMUNITY PLAN

T4 Urban Neighborhood Center (T4 NC) is intended to maintain, enhance, and create urban neighborhood centers that serve urban neighborhoods that are generally within a 5 minute walk. T4 NC areas are pedestrian friendly areas generally located at intersections of urban streets that contain commercial, mixed use, residential, and institutional land uses. Infrastructure and transportation networks may be enhanced to improve pedestrian, bicycle, and vehicular connectivity.

Proposed Preliminary SP

Supplemental Policy

The site is within a Supplemental Policy, 05-T4-NC-02, which is intended to provide more specific guidance for the SP area than the T4 NC policy. It is generally located along Meridian Street from Cleveland Street to Vaughn Street. The intent of this SPA is to ensure appropriate transitions to and livability of the surrounding residential policy areas, given that these properties are included in the National Register-eligible Cleveland Park Historic District.

SITE CONTEXT AND PLAN DETAILS

The SP is located at the northeast and northwest corners of Cleveland Street and Meridian Street and includes additional properties to the north along Meridian Street and along Vaughn Street. The SP is a total of 3.23 acres. The original SP was intended to function as a wholistic development with the properties sharing uses and parking across the entirety of the SP. The plan is broken into four subdistricts. Subdistrict A is located on the northwest corner of the intersection of Cleveland Street and Meridian Street. A final site plan for subdistrict A was approved in for 21 townhome units.

Subdistrict C, located north of subdistrict A, is the site of the McGavock House which is designated as a local Historic Landmark District. A finals site plan is currently under review for Subdistrict C to permit a brewery within the existing structure and an outdoor seating area.

Subdistrict D, located north of subdistrict C, has frontage along Vaughn Street. A final site plan has not yet been approved for this phase.

The focused amendment area is within Subdistrict B, but given the original intent of the SP to provide uses across the entire SP area, staff had this amendment processed as an amendment to the entirety of the SP. Subdistrict B is comprised of four existing parcels at the northeast corner of the intersection of Cleveland Street and Meridian Street. There is an existing structure on the site which was previously used as a religious institution. The existing structure is eligible to be listed in the National Register. The uses for Subdistrict B within the preliminary SP included up to 50 multifamily residential dwelling units; restaurant, bed and breakfast inn, hotel, community education, office, retail. The hotel use was limited to one hotel with a maximum of 35 rooms. All uses within Subdistrict B were required to be within the existing buildings. The breadth of uses permitted was to provide for flexibility in the adaptive reuse of the existing structure.

Previous amendments to the SP include an amendment in 2019 (2016SP-024-003/BL2019-1727) to increase the number of permitted restaurants to three, as it was previously limited to two.

The surrounding properties to the south are zoned RS5 and have been established with institutional uses including a Metro Fire Department and a school. The properties to the north and east are zoned Single-Family Residential (RS5) and SP. These properties are part of a large SP within the area which permitted the construction of Detached Accessory Dwelling Units (DADUs). Further to the south along Meridian Street properties are zoned Commercial Limited (CL) and have been developed with a mix of uses including non-residential and residential uses.

The proposed amendment would increase the number of permitted hotel rooms to 89 and permit the construction of a new hotel structure adjacent to the existing structure on the site. North of the existing structure is a proposed pool and surface parking area with ten vehicular parking spaces.

The existing structure would be modified to include a mix of uses including restaurant and hotel. The proposed new structure is four stories with a first floor retail space and parking spaces. The second through fourth floors would be hotel uses. A vehicular entrance is located east of the existing structure. An existing alley network at the rear of the property provides additional vehicular access.

ANALYSIS

The supplemental policy has specific guidance on the appropriate land use, building form, site design, transitions, and zoning. These key guidance points are outlined below:

- Appropriate land use: limit appropriate land uses to residential and/or small office uses for properties adjacent to residential policy areas.
- Building Form and Site Design: Provide appropriate transitions in scale, massing, building orientation, and site design to surrounding properties in residential policy areas.
- Building Form and Site Design: Limit the height generally to two stories for properties adjacent to residential policy areas.
- Transitions Infill and Adjacent Historic Structures: Provides appropriate on-site transitions to surrounding properties in residential policy areas through measures such as landscape buffering and distance between structures.
- Zoning: Design-based zoning district that, in addition to incorporating guidance described above, addresses the following: Ensures the preservation of any structures and their settings within the area of the supplemental policy.

The proposed SP amendment does meet the last guidance point above and overall works to renovate and preserve the existing structure on the site, which is a critical goal to staff; however, staff has several concerns with the proposed intensity of the development and conflicts with the supplemental policy points above, especially related to height and scale of the proposed new structure. The eastern most parcels in the site, where the new structure would be constructed are immediately adjacent to single-family residential uses within a residential policy. Based on the guidance in the supplemental policy, the proposed new structure should be limited to small scale uses, limit the height to two stories adjacent to residential policies, provide landscape buffering and increased distance between structures, and ultimately to provide a transition between the existing structure, the new structure, and residential uses and policy to the east of the site.

The intent of the original SP was primarily to renovate and rehabilitate the existing structure on the site while opening up the opportunities for new uses such as hotel and/or restaurant space. The supplemental policy area was specifically crafted for this development and the two were approved simultaneously. The proposed site plan does make improvements that weren't originally a part of the preliminary SP site plan. The original site plan had surface parking between the existing building and Cleveland Street, whereas now this area is planned for a landscaped plaza area, which is much more engaging and friendly towards the public realm at the intersection and along the street frontage. Staff's recommendation to disapprove the plan as currently proposed or defer with changes that will bring the plans closer to the guidance in the supplemental policy, indicates that staff may be able to support some level of changes to the site, but not as currently proposed. Staff would direct the applicant to make the following changes: reduce the proposed building height of the new structure and reduce the building footprint of the proposed structure substantially. Additional changes could include removing the curb cut from Cleveland Street to limit vehicular

access to alley access exclusively, provide a fully activated first floor use along the new structure, and by reducing the building footprint, making up surface parking spaces at the rear of the site, off of the alley.

HISTORIC COMMISSION RECOMMENDATION

Approve with conditions

- Materials are approved prior to review of the Final SP:
 - o Make, manufacture and materials of windows and doors;
 - Replacement glazing; and,
 - Railing design, canopy materials, and design and materials of fences/walls;
- Mechanical locations are approved prior to review of the Final SP;
- The front sanctuary stairs are not covered; and,
- Revised drawings are reviewed by MHZC staff prior to the approval of the Final SP.
- Staff finds that with these conditions, the project meets the Historic Landmark design guidelines for additions and alterations. The MHZC recognizes that the Planning Commission's review encompasses more considerations than just design and addressing those concerns may result in design revisions. Therefore, this recommendation should not be considered an "approval" and MHZC staff is available for discussions on additional revisions.

FIRE MARSHAL RECOMMENDATION

Approve with conditions

• Limited building detail, and/ or building construction information provided. Construction must meet all applicable building and fire codes. Any additional fire code or access issues will be addressed during the construction permitting process. Future development or construction may require changes to meet adopted fire and building codes.

STORMWATER RECOMMENDATION

Return for revisions

• Update C/D Note to plans: (Size driveway culverts per the design criteria set forth by the Metro Stormwater Management Manual (Minimum driveway culvert in Metro ROW is 15' RCP).)

WATER SERVICES RECOMMENDATION

Approve with conditions

Approved as a Preliminary SP only. Public and/or private Water and Sanitary Sewer construction plans must be submitted and approved prior to Final Site Plan/SP approval. The approved construction plans must match the Final Site Plan/SP plans. A minimum of 30% W&S Capacity must be paid before issuance of building permits.

NASHVILLE DOT RECOMMENDATION

Approve with conditions

- Approval for amendment only.
- Final constructions plans shall comply with the design regulations established by NDOT. Final design and improvements may vary based on actual field conditions.

- In general, on final: Callout roadway sections, ramps, sidewalks, curb & gutter, etc. per NDOT detail standards. Dimension ROW pavement widths for clarity.
- Note: A private hauler will be required for waste/recycle disposal.
- Call out alley paving and widening per ST-263, from new property line off alleys to CL of existing alleys.
- Coordinate w/ planning of MCSP requirements along Meridian.
- Provide ADA ramp at corner. Provide call out to close existing ramp on Meridian near intersection. New sidewalk will be required, once existing ramp has been closed.

TRAFFIC & PARKING RECOMMENDATION

Approve with conditions

- Approval only granted for the amendment, and the following conditions shall be shown at final;
- The minimum required parking for this site is the UZO standard for the proposed uses. Parking shall not exceed the minimum required. If a parking ratio less than the UZO standards for the uses is proposed at Final, it shall be reviewed and approved by T&P.
- Replace the existing driveway ramp on Meridian St with sidewalk.
- Improve ped ramp on the NE corner at the intersection of Meridian and Cleveland.
- Comply with all previous traffic conditions.
- Comply with Roads comments.
- Further traffic comments forthcoming at final submittal.

Staff Reviewer Staff Recommendation	Swaggart Disapprove.

APPLICANT REQUEST SP amendment to permit a mixed-use development.

Zone Change

A request to amend a Specific Plan for properties located at 2143, 2145, and 2145B Goodrich Avenue, 2125 Buena Vista Pike and various properties located between Alpine Avenue and Goodrich Avenue, approximately 290 feet northwest of Buena Vista Pike, zoned Specific Plan (SP) and One and Two-Family Residential (R8), (2.85 acres), to expand the boundary of the SP to permit 14 additional multi-family residential units for a maximum of 41 units overall and add nonresidential uses.

Existing Zoning

<u>One and Two-Family Residential (R8)</u> requires a minimum 8,000 square foot lot and is intended for single-family dwellings and duplexes at an overall density of 5.79 dwelling units per acre including 25 percent duplex lots. *R8 would permit a maximum three residential units*.

<u>Specific Plan-Residential</u> is a zoning district category that provides for additional flexibility of design, including the relationship of streets to buildings, to provide the ability to implement the specific details of the General Plan. This Specific Plan includes only one residential building type. *This SP permits a maximum of 27 multifamily units*.

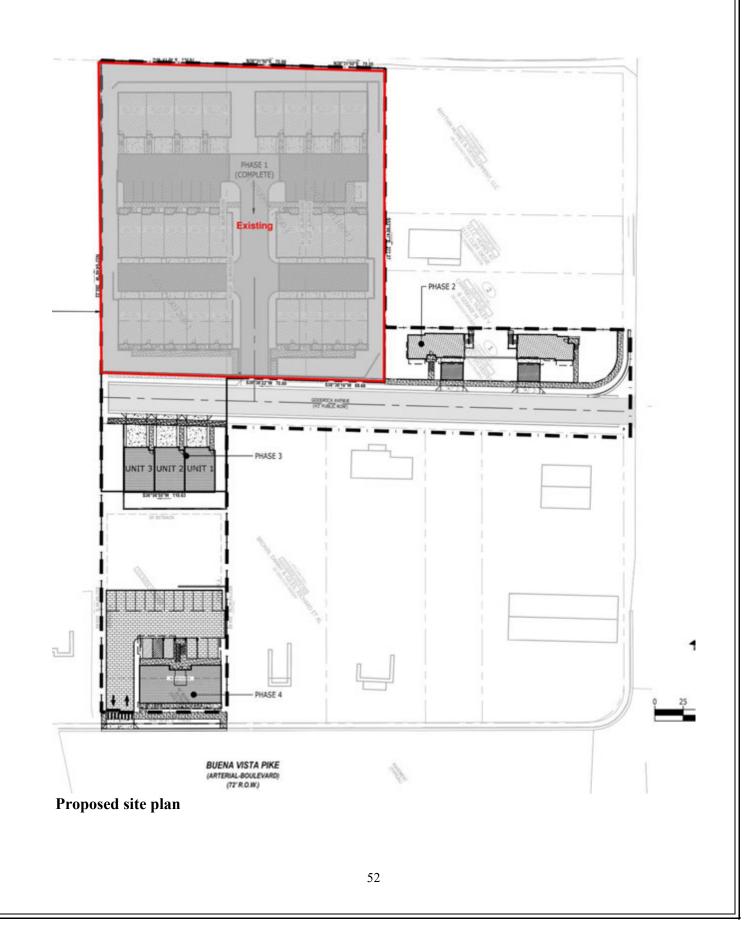

Proposed Zoning

<u>Specific Plan-Mixed Use (SP-MU)</u> is a zoning district category that provides for additional flexibility of design, including the relationship of streets to buildings, to provide the ability to implement the specific details of the General Plan. This Specific Plan includes residential uses in addition to office and/or commercial uses.

SITE CONTEXT AND PLAN DETAILS

This request is to amend an existing SP that was approved by Council in 2019 (BL2019-1629). The currently approved SP permits a maximum of 27 multifamily residential units. A final site plan was approved in 2021, and the development is under construction. The final includes 26 multifamily units.

This amendment is to add approximately a half-acre to the SP, permitting an additional 14 units as well as nonresidential uses. One of the properties to be added is located at the corner of Goodrich Avenue and Cliff Drive. One is located at the western terminus of Goodrich Avenue (under construction). The other property is located on Buena Vista Pike.

Site Plan

The plan includes the existing SP under construction as well as the proposed additions. The existing is Phase 1 and the additions are Phase 2, Phase 3, and Phase 4 (no changes are proposed to Phase 1, and the focus of this report is on the proposed additions to the SP).

Phase 2, includes two detached residential units. It is located at the northwest corner of Goodrich Avenue and Cliff Drive. The proposed maximum height is three stories in 45 feet. Units are oriented to Goodrich Avenue and each unit has an individual drive with garages oriented to Goodrich Avenue.

Phase 3 includes three attached residential units and is located at the western terminus of Goodrich Avenue. All three units have garage doors fronting Goodrich. The proposed maximum height is three stories in 45 feet.

Phase 4 is located along Buena Vista Pike. It includes a mixed-use building permitting up to 2,200 sq. ft. of nonresidential uses on the ground floor and nine upper floor residential units. The building is oriented to Buena Vista Pike. Surface parking is shown at the rear of the building and is accessed by a single drive off of Buena Vista Pike. The proposed maximum height is four stories in 55 feet. The third and fourth floors are required to be stepped back 15 feet from the front façade of the first to floors.

Public sidewalks are shown along Buena Vista Pike per the Major and Collector Street Plan on Phase 4. Sidewalks per the local standard are shown along Cliff Drive and Goodrich Avenue. As proposed parking includes surface as well as garage. Surface parking is provided for the building along Buena Vista Pike. Each proposed unit on Goodrich Avenue has a garage. This is not in UZO and parking is required. Calculations are based on typical standards found in the Zoning Code. The required number of spaces is a minimum and not a maximum.

BORDEAUX-WHITES CREEK-HAYNES TRINITY

<u>T4 Urban Neighborhood Evolving (T4 NE)</u> is intended to create and enhance urban residential neighborhoods that provide more housing choices, improved pedestrian, bicycle and vehicular connectivity, and moderate to high density development patterns with shallow setbacks and minimal spacing between buildings. T4 NE areas are served by high levels of connectivity with complete street networks, sidewalks, bikeways and existing or planned mass transit. T4 NE policy may be applied either to undeveloped or substantially under-developed "greenfield" areas or to developed areas where redevelopment and infill produce a different character that includes increased housing diversity and connectivity. Successful infill and redevelopment in existing neighborhoods needs to take into account considerations such as timing and some elements of the existing developed character, such as the street network and block structure and proximity to centers and corridors.

Supplemental Policy

This site is located within the Haynes Trinity Small Area Plan area of the Bordeaux-Whites Creek-Haynes Trinity Community Plan area. The intent of the supplemental policy is to create and enhance neighborhoods with greater housing choice, improved connectivity, and more creative, innovative, and environmentally sensitive development techniques. The policy calls for improvement of the existing street, sidewalk, bikeway, and stormwater infrastructure to T4 Urban Transect standards through new private-sector development.

ANALYSIS

There are several issues with the proposed plan. The first and primary issue is that the plan calls for nonresidential uses. T4 NE is a residential policy and does not support nonresidential uses. Secondary issues pertain to layout. The units in the existing SP (Phase 1) are oriented to Goodrich Avenue with garage access and parking located behind the units. The three attached units proposed in Phase 3 have garage doors facing Goodrich Avenue and are directly across the street from the units in Phase 1. This is an urban policy and is intended to create development that is urban in form, with a focus on the pedestrian realm. Some design standards that meet this goal are units being oriented to the street, shallow setbacks, sidewalks, limited curb cuts and rear parking. The proposed layout does not meet the goal and is not consistent with Phase 1, which does meet these goals and is consistent with the T4 NE land use policy. Furthermore, the drives on phases 1 and 2 do not meet design requirements for parking. The Zoning Code requires drives along Goodrich Avenue to be at least 20 feet deep. The intent of this requirement is to allow tandem parking without encroaching into the sidewalk. In addition to not meeting the depth requirements, the proposed drives also do not meet the separation requirements. Both deficiencies further compound the issues with this plan not creating a walkable community consistent with the policy. Since the plan is not consistent with the land use policy and the drives don't meet the design standards in the Zoning Code, staff is recommending disapproval.

FIRE MARSHAL RECOMMENDATION Approve

STORMWATER RECOMMENDATION Approve with conditions

• Must comply with all regulations in the Stormwater Management Manual at the time of final submittal.

WATER SERVICES RECOMMENDATION Approved with conditions

• Approved as a Preliminary SP only. Public and/or private Water and Sanitary Sewer construction plans must be submitted and approved prior to Final Site Plan/SP approval. The approved construction plans must match the Final Site Plan/SP plans. A minimum of 30% W&S Capacity must be paid before issuance of building permits

NASHVILLE DOT RECOMMENDATION Returned for corrections

• Driveway spacing off public roads is 30 ft. minimum. Consolidate driveways to meet code.

TRAFFIC AND PARKING RECOMMENDATION Returned for corrections

- Provide details on type of residential units are in each phase and the number of bedrooms per type of unit. Parking must be per code requirements.
- The driveways in Phase 3 (the three townhomes) do not meet code standards of at least 30 feet separation between driveways. Two will need to be turned into a shared driveway and ensure the distance between the shared drive and the other driveway is at least 30 feet.
- The driveway for Phase 4 also does not meet the code standard of at least 30 feet separation between driveways with the parcel to the south (left)'s driveway. Building and driveway location will need to be flipped to meet the separation distance standard.
- Additional ROW must be dedicated on Buena Vista Pike to meet MCSP requirements. Call out on site plan 51 feet from centerline to new property line. Full sidewalk must be in the public ROW.

Maximum Uses in Existing Zoning District: SP

METRO SCHOOL BOARD REPORT

Projected student generation existing R6 district: <u>0</u> Elementary <u>0</u> Middle <u>0</u> High Projected student generation proposed RM15-A-NS district: <u>2</u> Elementary <u>1</u> Middle <u>1</u> High

The proposed additional units in the SP is expected to generate four additional students than what is typically generated under the existing R8 zoning district. Students would attend Cumberland Elementary School, Haynes Middle School, and Whites Creek High School. All three schools are identified as having capacity for additional students. This information is based upon the 2020-2021 MNPS School Enrollment and Utilization report provided by Metro Schools.

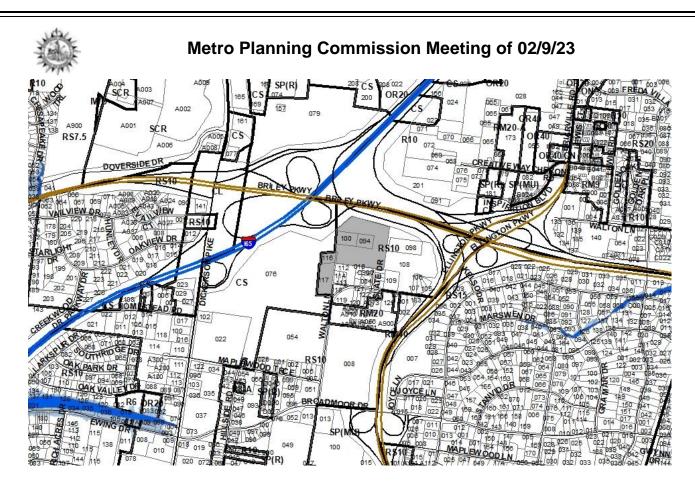

STAFF RECOMMENDATION

Staff recommends disapproval as the proposed amendment is not consistent with the T4 NE land use policy and not have approvals from all agencies.

S.(LE) & Suggs, Evelyn, Beulah M. Dotson, Albender, Donelson, May Alice Ridley and Faith is The Victory Church, Inc., owners. **Staff Reviewer** Swaggart Staff Recommendation *Approve with conditions and disapprove without all* conditions.

APPLICANT REQUEST SP to permit 175 residential units.

Zone Change

A request to rezone from Single-Family Residential (RS10) to Specific Plan (SP) zoning on properties located at 3302 Walton Lane and Walton Lane (unnumbered) and on part of 3300 and 3344 Walton Lane, approximately 211 feet west of Slate Drive, (15.2 acres), to permit 175 residential units.

History

The Planning Commission recommended that Council approve the subject SP on September 21, 2022, for 217 residential units. A bill was filed (BL2022-1558), and the bill passed first reading on November 1, 2022. Prior to the public hearing at Council, several property owners pulled their property out of the proposal. This resulted in approximately 3.16 acres being removed from the SP and required a redesign. At that point, the SP was withdrawn and referred back to Planning for review and for Planning Commission reconsideration. Updated public hearing notices were mailed.

Existing Zoning

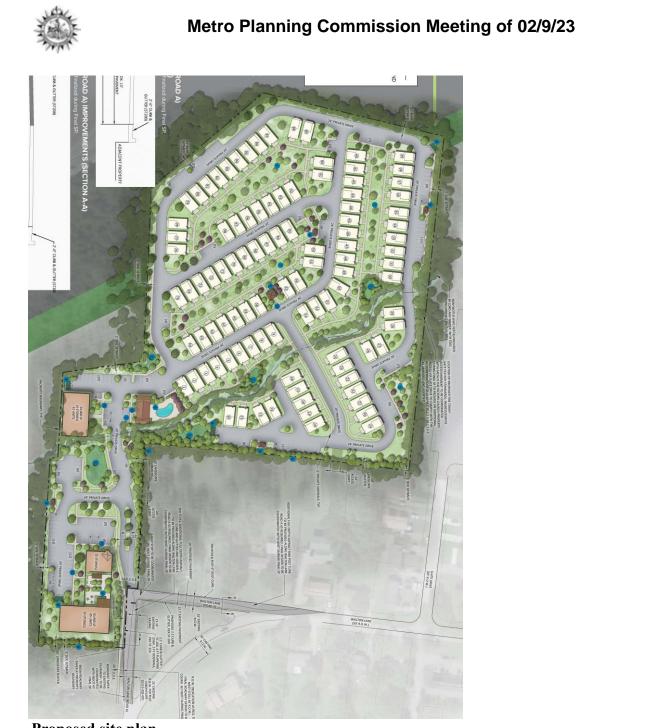

<u>Single-Family Residential (RS10)</u> requires a minimum of 10,000 square foot lot and is intended for single-family dwellings at a density of 3.7 dwelling units per acre. *RS10 would permit a maximum of 80 residential units*.

Proposed Zoning

<u>Specific Plan-Mixed Residential (SP-MR)</u> is a zoning district category that provides for additional flexibility of design, including the relationship of streets to buildings, to provide the ability to implement the specific details of the General Plan. This Specific Plan includes a mixture of housing types.

SITE CONTEXT AND PLAN DETAILS

The approximately 15-acre site is located near the northern end of Walton Lane approximately half a mile north of Broadmoor Drive. Adjacent zoning includes RS10 and a commercial PUD, zoned

Proposed site plan

CS abuts the western site boundary. Surrounding uses include single single-family, a church and vacant commercial land. The terrain on the site various and Metro records does not indicate any large areas with steep slopes. A stream bisects the property and runs northeast to southwest. The site includes some areas of open field and dense tree canopy.

Site Plan

The site plan includes a total of 175 residential units with a density of approximately 11.5 units per acre. Units include a mixture of attached and detached units and flats. The plan specifies the following unit types and count:

- Detached Homes: 98
- Flats: 77

All detached units front onto private streets and or open space. Elevations are not provided, but the SP includes design standards pertaining to entry ways, glazing, materials, foundations, and porches. As proposed, the plan includes the following height standards:

- Detached: 3 stories in 45'
- Flats: 4 stories in 60'

Access into the site is from Walton Lane. All drives are private. Parking includes a mixture of surface and garage spaces. An internal sidewalk network is provided, and a new public sidewalk is provided along Walton Lane. The plan is setup to allow for access from two points into the site from adjacent parcels when developed. Landscaping and tree density are per Metro Zoning requirements. Buffer yards are provided and specified on the plan.

The stream that bisects the site is located within Stormwater buffers and should be left undisturbed with the exception of stream crossings for private drives and pedestrian paths.

EAST NASHVILLE COMMUNITY PLAN

T4 Urban Neighborhood Evolving (T4 NE) is intended to create and enhance urban residential neighborhoods that provide more housing choices, improved pedestrian, bicycle and vehicular connectivity, and moderate to high density development patterns with shallow setbacks and minimal spacing between buildings. T4 NE areas are served by high levels of connectivity with complete street networks, sidewalks, bikeways and existing or planned mass transit. T4 NE policy may be applied either to undeveloped or substantially under-developed "greenfield" areas or to developed areas where redevelopment and infill produce a different character that includes increased housing diversity and connectivity. Successful infill and redevelopment in existing neighborhoods needs to take into account considerations such as timing and some elements of the existing developed character, such as the street network and block structure and proximity to centers and corridors.

<u>T4 Urban Community Center (T4 CC)</u> is intended to maintain, enhance and create urban community centers that contain commercial, mixed use, and institutional land uses, with residential land uses in mixed use buildings or serving as a transition to adjoining Community Character Policies. T4 Urban Community Centers serve urban communities generally within a 5 minute drive or a 5 to 10 minute walk. T4 CC areas are pedestrian friendly areas, generally located at

intersections of prominent urban streets. Infrastructure and transportation networks may be enhanced to improve pedestrian, bicycle, and vehicular connectivity.

ANALYSIS

As proposed, staff finds that the plan is consistent with the T4 NE and T4 CC land use policies that apply to the site. The plan provides for a mixture of housing types. Attached and detached townhomes are located in the T4 NE policy area while the flats are located in the T4 CC area. The plan provides ample open space with many units fronting onto the open space areas providing for immediate outdoor recreational opportunities. The plan also preserves the stream and utilizes it as an asset. The plan allows for walkability through an internal sidewalk network which connects to the new public sidewalk proposed along Walton Lane. The project will extend the public sidewalk down Walton Lane to an existing sidewalk that extends to Maplewood High School and further to Broadmoor Drive. Staff considered a new public street connection to the west; however, the adjacent parcel is in a commercial Planned Unit Development (PUD) and the connection would require an amendment to the PUD which may be unlikely. The topography on the adjacent parcel would also make a public road connection difficult.

It is important to note that the Fire Marshal has recommend approval with conditions. The current plan does not meet Fire Code requirements for access. The Fire Marshal's condition requires any final site plan to provide access per Fire Code requirements. The applicant has indicated that the project will obtain additional access to meet Fire Code requirements through the adjacent church property. At this time, the church has not agreed to allow access but has indicated that it is under consideration. While the SP is for 175 residential units, not providing adequate access could lead to a significant reduction in density.

FIRE MARSHAL RECOMMENDATION

Approved with conditions

• Secondary access via access easement agreement with Faith In Victory Church to be provided as part of Final SP.

STORMWATER RECOMMENDATION Approve with conditions

• Must comply with all regulations in the Stormwater Management Manual at the time of final submittal.

WATER SERVICES RECOMMENDATION

Approved with conditions

• Approved as a Preliminary SP only. Public and/or private water and sanitary sewer construction plans must be submitted and approved prior to Final Site Plan/SP approval. A minimum of 30% W&S Capacity fees must be paid before issuance of building permits. (Water & Sewer Capacity Fee Permit No's. T2022032593 & T2022032599).

NASHVILLE DOT RECOMMENDATION

Approve with conditions

• Final constructions plans shall comply with the design regulations established by NDOT. Final design and improvements may vary based on actual field conditions.

- In general, on final: Callout roadway sections, ramps, sidewalks, curb & gutter, etc. per NDOT detail standards.
- Dimension ROW pavement widths for clarity. Submit SSD exhibits for intersections.
- Note: A private hauler will be required for waste/recycle disposal.
- Prior to final, Coordinate w/ NDOT on ST-251 road section transitioning into Walton Lane (Curved)-stop control, sight distance, etc.

TRAFFIC AND PARKING RECOMMENDATION

Approve with conditions

- Parking is to be per metro code.
- At each approach on Walton Ln (Road A), traffic control signs and pavement marking shall be installed at appropriate locations per MUTCD guidance.
- Internal traffic control signs and pavement markings will be required, per MUTCD guidance.
- The applicant shall construct 200 ft of additional offsite sidewalk from the development's Southern property line to the existing sidewalk that is on the West side of Walton Ln. The applicant shall also install a pedestrian crossing on Walton Ln near the location of Maplewood High School that shall be per MUTCD guidance. The exact location can be determined at Final SP and adjustments to existing striping may be required.
- At final confirm the intersection movements/operations for the Broadmoor Dr and Dickerson Pike intersection, signal retiming may be required.

Land Use (ITE Code)	Acres	FAR/Density	Total Floor Area/Lots/Units	Daily Trips (weekday)	AM Peak Hour	PM Peak Hour
Single-Family Residential (210)	15.2	4.356 D	80 U	719	52	70

METRO SCHOOL BOARD REPORT

Projected student generation existing RS10 zoning districts: <u>9</u> Elementary <u>8</u> Middle 1<u>0</u> High Projected student generation proposed SP district: <u>28</u> Elementary <u>17</u> Middle <u>18</u> High

The proposed SP zoning is expected to generate 36 additional students than what is generated by existing RS10 zoning. Students would attend Chadwell Elementary School, Jere Baxter Middle

School, and Maplewood High School. All schools have been identified as having additional capacity. This information is based upon the 2020-2021 MNPS School Enrollment and Utilization report provided by Metro Schools.

STAFF RECOMMENDATION

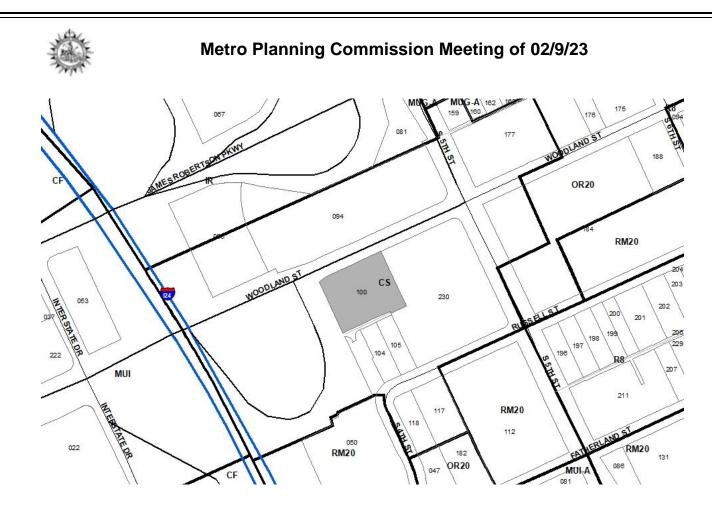

Staff recommends approval with conditions and disapproval without all conditions.

CONDITIONS

- 1. Permitted uses shall be limited to a maximum of 175 multi-family residential units. Short-term rental property, not-owner occupied shall be prohibited.
- 2. The ultimate number of units is dependent on the final site plan providing adequate access per Metro Fire Code; otherwise, the number of permitted units shall be reduced such that the final site plan does comply with Metro Fire Code. Final determination will be made with submittal of the final site plan.
- 3. A public sidewalk connection to the existing sidewalk along Walton Lane shall be provided and shall meet the local street standard.
- 4. Generally, all units on the final site plan shall front an internal private drive or open space and not be oriented to a property line.
- 5. The requirements of the Metro Fire Marshal's Office for emergency vehicle access and adequate water supply for fire protection must be met prior to the issuance of any building permits.
- 6. Comply with all conditions and requirements of Metro reviewing agencies.
- 7. If a development standard, not including permitted uses, is absent from the SP plan and/or Council approval, the property shall be subject to the standards, regulations and requirements of the RM20 zoning district as of the date of the applicable request or application.
- 8. A corrected copy of the preliminary SP plan incorporating the conditions of approval by Metro Council shall be provided to the Planning Department prior to or with final site plan application.
- 9. Minor modifications to the preliminary SP plan may be approved by the Planning Commission or its designee based upon final architectural, engineering or site design and actual site conditions. All modifications shall be consistent with the principles and further the objectives of the approved plan. Modifications shall not be permitted, except through an ordinance approved by Metro Council that increase the permitted density or floor area, add uses not otherwise permitted, eliminate specific conditions or requirements contained in the plan as adopted through this enacting ordinance, or add vehicular access points not currently present or approved.

Staff Reviewer Staff Recommendation	Anthony <i>Approve with conditions and disapprove without all</i> <i>conditions</i> .				

APPLICANT REQUEST Preliminary SP to permit a hotel.

Preliminary SP

A request to rezone from Commercial Service (CS) to Specific Plan (SP) on property located at 408 Woodland Street (0.79 acres), located within the East Bank Redevelopment District, to permit a hotel use.

Existing Zoning

<u>Commercial Service (CS)</u> is intended for retail, consumer service, financial, restaurant, office, self-storage, light manufacturing and small warehouse uses.

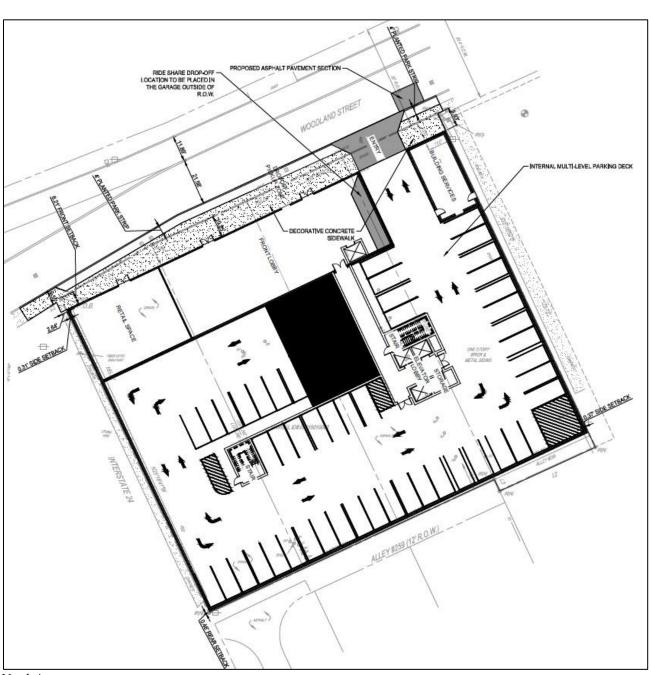

Proposed Zoning

<u>Specific Plan-Commercial (SP-C)</u> is a zoning district category that provides for additional flexibility of design, including the relationship of streets to buildings, to provide the ability to implement the specific details of the General Plan. *This Specific Plan includes commercial uses such as hotel and retail.*

EAST NASHVILLE COMMUNITY PLAN

<u>T5 Center Mixed Use Neighborhood (T5 MU)</u> is intended to maintain, enhance, and create highintensity urban mixed use neighborhoods with a development pattern that contains a diverse mix of residential and non-residential land uses. T5 MU areas are intended to be among the most intense areas in Davidson County. T5 MU areas include some of Nashville's major employment centers such as Midtown that represent several sectors of the economy including health care, finance, retail, the music industry, and lodging. T5 MU areas also include locations that are planned to evolve to a similar form and function.

North 🛦

Proposed Preliminary SP

SITE CONTEXT AND PLAN DETAILS

The preliminary SP application is for a 0.79-acre parcel located along the south side of Woodland Street east of Interstate 24 and west of South Fifth Street. The property is currently zoned CS. A one-story commercial building is currently located on the property. All adjacent properties are zoned CS. Adjacent land uses include: institutional (church and school) on the north; mixed use on the east; vacant property on the south; and Interstate 24 right-of-way on the west.

The preliminary SP application is for an eleven-story hotel. The proposed building footprint would cover the lot. Proposed setbacks are zero on the east, south, and west sides. Along the Woodland Street frontage, the structure would be built to the back of the sidewalk. The proposed sidewalk would mirror that of the recently-constructed Eastside Heights building, which is adjacent to the subject property on the east; the sidewalk would taper slightly at the western end of the property's frontage. Woodland Street right-of-way would extend to the back of the sidewalk. Bike lanes are planned for Woodland Street as part of the "East Nashville Backbones" project. Vehicular access to the site would be via a single driveway located on the east end of the building's front facade on Woodland Street. Parking would be provided in an internal parking garage; no surface parking is proposed in the plan.

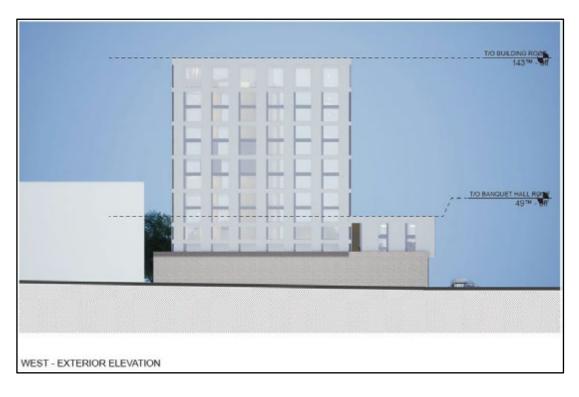

Proposed maximum building height would be eleven stories or 143 feet. The elevations submitted by the applicant show two outdoor terraces, one above the second floor and another above the eleventh floor. As shown on the elevations, windows will be vertically-oriented. The SP limits building materials to brick, brick veneer, stone, cast stone, cementitious siding, glass, and other similar materials. The primary entrances to the building would be located along the Woodland Street frontage. The plan also shows a retail space at the northwest corner of the building with a separate entrance. The following elevation shows the proposed building as it would appear from Woodland Street.

The building would also be highly visible from public right-of-way on both the south and west. On the east, an adjacent six-story building would screen the lower portion of the proposed building; however, the upper stories would be visible from public right-of-way. The following elevations show the proposed building as it would appear from the south, west, and east, respectively.

ANALYSIS

The T5 MU policy is characterized in part by vertical mixed-use development, buildings built to the back edge of the sidewalk with minimal spacing between buildings, and high levels of connectivity. A wide range of uses—including residential and commercial—are appropriate within the T5 MU policy area. The T5 MU policy emphasizes higher intensity development with high lot coverage.

Building heights in the T5 MU policy area may range from two to 20 stories or greater. Among the factors that should be taken into account when determining appropriate building height are: the relationship of the height of the building to the width of the street and sidewalks; prominence of the street and its role in the T5 MU area's street hierarchy; and the planned heights of surrounding buildings and impact of adjacent historic structures.

The proposed elevations show a height of eleven stories and 143 feet from finished grade. The structure would include a stepback at 49 feet. The current Woodland Street pavement width for the travel lanes is approximately 35 feet. Total building height would be approximately four times the pavement width. Creating a height stepback above the second-floor banquet hall would create an immediate height below the stepback of 49 feet, comparable to the right-of-way and pavement width.

The highest adjacent building is the Eastside Heights building located east of the subject property. Constructed in 2017, Eastside Heights is a five-story residential building with ground-floor retail uses. The building is constructed to the back of the sidewalk on both Woodland Street and South Fifth Street. The subject property is also located near a historic property, St. Ann's Episcopal Church. St. Ann's is a two-story brick structure located approximately 70 feet north of the Woodland Street right-of-way, northeast of the subject property. The St. Ann's building is most immediately impacted by Eastside Heights, which lies directly south of St. Ann's. Though the

proposed building would be the highest in the immediate area, both the stepback and distance from the two-story church should help mitigate any height incompatibility.

The proposed plan is generally consistent with T5 MU policy. Commercial use—including hotel use—is consistent with the policy. The eleven-story height falls within the range recommended in the T5 MU policy area. While the subject property is not a corner lot, it is located adjacent to Interstate 24; as the area between the subject property and Interstate 24 is State-owned right-of-way, it is unlikely to develop, giving the subject property some characteristics of a corner lot. Generally, higher buildings are supported at intersections. Because the proposed SP is consistent with stated policy goals, staff recommends approval.

FIRE MARSHAL RECOMMENDATION

Approve with conditions

• Limited building detail, and/ or building construction information provided. Construction must meet all applicable building and fire codes. Any additional fire code or access issues will be addressed during the construction permitting process. Future development or construction may require changes to meet adopted fire and building codes. Provide building elevations as part of future submittals.

STORMWATER RECOMMENDATION

Approve with conditions

- After the construction drawings are approved, then show the Stormwater features to the plat (water quality, etc.).
- Once recorded, cite the Maintenance Agreement to the plat.

METRO WATER SERVICES RECOMMENDATION

Approve with conditions

• Approved as a Preliminary SP only. Public and/or private Water and Sanitary Sewer construction plans must be submitted and approved prior to Final Site Plan/SP approval. The approved construction plans must match the Final Site Plan/SP plans. Submittal of an availability study is required before the Final SP can be reviewed. Once this study has been submitted, the applicant will need to address any outstanding issues brought forth by the results of this study. A minimum of 30% W&S Capacity must be paid before issuance of building permits.

NASHVILLE DOT RECOMMENDATION

Approve with conditions

- Final constructions plans shall comply with the design regulations established by NDOT. Final design and improvements may vary based on actual field conditions. In general, on final: Callout roadway sections, ramps, sidewalks, curb & gutter, etc. per NDOT detail standards. Note: A private hauler will be required for waste/recycle disposal.
- Site plan shall utilize Alternative 1 proposed: Pull-off and Loading/unloading operations are to take place internally via the garage. (cont.) Apply to T&P to have the frontage signed no parking/loading zone. Comply w/ traffic comments.

TRAFFIC & PARKING RECOMMENDATION Approve with conditions

- Off-site improvements and contributions to multimodal projects in the vicinity of the site will be finalized with NDOT prior to Final SP submittal. These improvements will be reflected in the finalized traffic study.
- Comply with Roads comments.

Maximum Uses in Existing Zoning District: CS

STAFF RECOMMENDATION

Staff recommends approval with conditions and disapproval without all conditions.

CONDITIONS

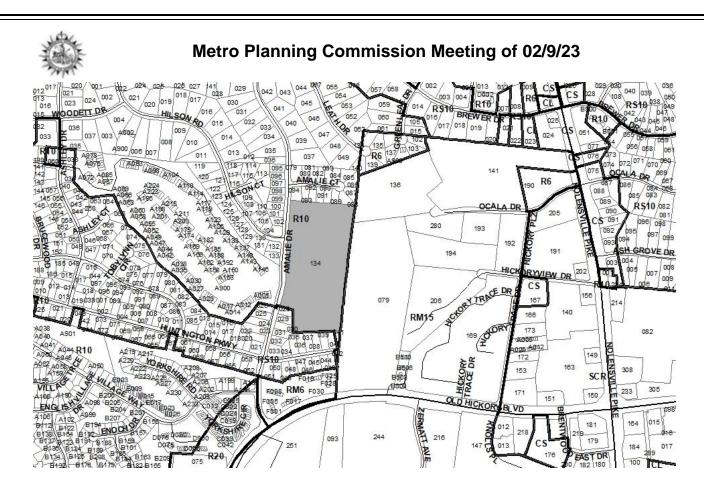

- 1. Permitted uses shall be limited to hotel with structured parking and all other uses permitted in the CS zoning district.
- 2. Comply with all conditions and requirements of Metro reviewing agencies.
- 3. A corrected copy of the Preliminary SP plan, incorporating the conditions of approval by Metro Council, shall be provided to the Planning Department prior to or with final site plan application.

- 4. If a development standard, not including permitted uses, is absent from the SP plan and/or Council approval, the property shall be subject to the standards, regulations and requirements of the CS zoning district as of the date of the applicable request or application. Uses are limited as described in the Council ordinance.
- 5. The final site plan shall label all internal driveways as "Private Driveways". A note shall be added to the final site plan that the driveways shall be maintained by the Homeowner's Association
- 6. The final site plan shall depict the required public sidewalks, any required grass strip or frontage zone and the location of all existing and proposed vertical obstructions within the required sidewalk and grass strip or frontage zone. Prior to the issuance of use and occupancy permits, existing vertical obstructions shall be relocated outside of the required sidewalk. Vertical obstructions are only permitted within the required grass strip or frontage zone.
- 7. The Preliminary SP plan is the site plan and associated documents. If applicable, remove all notes and references that indicate that the site plan is illustrative, conceptual, etc.
- 8. Minor modifications to the Preliminary SP plan may be approved by the Planning Commission or its designee based upon final architectural, engineering or site design and actual site conditions. All modifications shall be consistent with the principles and further the objectives of the approved plan. Modifications shall not be permitted, except through an ordinance approved by Metro Council, that increase the permitted density or floor area, add uses not otherwise permitted, eliminate specific conditions or requirements contained in the plan as adopted through this enacting ordinance, or add vehicular access points not currently present or approved.
- 9. The requirements of the Metro Fire Marshal's Office for emergency vehicle access and adequate water supply for fire protection must be met prior to the issuance of any building permits.
- 10. Maximum building height shall not exceed that of elevations included in the preliminary SP.
- 11. The building shall incorporate a stepback with 15-feet depth above the second floor on the Woodland Street frontage. The stepback shall be no higher than 43 feet from finished grade.
- 12. Building elevations submitted with final SP shall have building design—including massing, glazing, and façade articulation—that is substantially similar to the elevations approved with the preliminary SP.
- 13. Parking calculations shall be reviewed with final SP.
- 14. The applicant shall submit plans to MDHA DRC for review and obtain approval prior to final SP approval.

Item #22	Specific Plan 2022SP-084-001
Project Name	5646 Amalie Drive
Council District	27 – Nash
School District	02 - Elrod
Requested by	Catalyst Design Group, applicant; Amalie Property, LLC, owners.
Deferrals	This item was deferred at the January 12, 2023, Planning Commission meeting. No public hearing was held.
Staff Reviewer Staff Recommendation	Lewis <i>Approve with conditions and disapprove without all</i> conditions.

APPLICANT REQUEST Preliminary SP to permit 189 multi-family units.

Zone Change

A request to rezone from One and Two Family Residential (R10) to Specific Plan (SP) zoning for property located at 5646 Amalie Drive, approximately 560 feet north of Huntington Parkway, (17.66 acres), to permit a multi-family residential development.

Existing Zoning

<u>One and Two-Family Residential (R10)</u> requires a minimum 10,000 square foot lot and is intended for single -family dwellings and duplexes at an overall density of 4.63 dwelling units per acre including 25 percent duplex lots. *R10 would permit a maximum of 65 lots with 16 duplex lots for a total of 81 units, based on acreage alone. This does not account for compliance with Subdivision Regulations.*

Proposed Zoning

<u>Specific Plan – Residential (SP-R)</u> is a zoning district category that provides for additional flexibility of design, including the relationship of streets to buildings, to provide the ability to implement the specific details of the General Plan.

SOUTH NASHVILLE COMMUNITY PLAN

<u>T3 Suburban Neighborhood Evolving (T3 NE)</u> is intended to create and enhance suburban residential neighborhoods with more housing choices, improved pedestrian, bicycle and vehicular connectivity, and moderate density development patterns with moderate setbacks and spacing between buildings. T3 NE policy may be applied either to undeveloped or substantially underdeveloped "greenfield" areas or to developed areas where redevelopment and infill produce a different character that includes increased housing diversity and connectivity. Successful infill and redevelopment in existing neighborhoods needs to take into account considerations such as timing and some elements of the existing developed character, such as the street network, block structure, and proximity to centers and corridors. T3 NE areas are developed with creative thinking in environmentally sensitive building and site development techniques to balance the increased growth and density with its impact on area streams and rivers.

Proposed Preliminary SP

<u>Conservation (CO)</u> is intended to preserve environmentally sensitive land features through protection and remediation. CO policy applies in all Transect Categories except T1 Natural, T5 Center, and T6 Downtown. CO policy identifies land with sensitive environmental features including, but not limited to, steep slopes, floodway/floodplains, rare or special plant or animal habitats, wetlands, and unstable or problem soils. The guidance for preserving or enhancing these features varies with what Transect they are in and whether or not they have already been disturbed.

SITE CONTEXT AND PLAN DETAILS

The 17.66 acre site is located on the east side of Amalie Drive, south of Amalie Court. The site has been developed with 109 multi-family units which would remain with the proposed development. The existing units are primarily located in the middle and southern area of the site. The northern portion of the site is currently undeveloped. The site is currently zoned R10. The proposed SP would retain the existing units on the site and permit the addition of 80 multi-family units, for a maximum of 189 units on the site, in the area of the site currently undeveloped. The existing units are referred to as District 1 in the proposed SP, while District 2 refers to the proposed new development.

The surrounding properties are primarily residential. To the north and south of the site the surrounding properties are zoned R10 and have been developed with one and two-family residential uses. The properties on the west side of Amalie Drive and to the east of the subject site are zoned R10 and Multi-Family Residential (RM15) and have been developed with multi-family units.

The proposed plan shows five structures in District 2. Two structures are oriented towards Amalie Drive, while the other structures are oriented internally. The structures are limited to 3 stories and 45 feet in height. The existing units in District 1 are oriented internally to the site and are 2-3 story split level structures. There is an existing vehicular entrance along Amalie Drive to serve the existing units. A proposed second vehicular entrance would be added to serve the proposed units, and the two drives would be connected internally. A proposed 6 foot wide sidewalk and 6 foot wide planting strip are shown across the entirety of the site frontage.

ANALYSIS

There are two policies on the site. The Suburban Neighborhood Evolving (T3 NE) is intended to create and enhance suburban neighborhood with greater housing choice, improved connectivity, and more creative, innovative, and environmentally sensitive development techniques. Development patterns in T3-NE areas will have higher densities than classic suburban neighborhoods and/or smaller lot sizes, with a broader range of housing types providing housing choice. This reflects the scarcity of easily developable land without sensitive environmental features and the cost of developing housing—challenges that were not faced when the original classic, suburban neighborhoods were built. Overall, the proposed density on the site is just under 11 units per acre, which is a density that can be supported by the T3 NE Policy.

The second policy on the site, Conservation (CO) is on the site due to grades ranging from 15 percent to greater than 25 percent. The existing units are constructed on the top of the grade on the site. The remaining, undeveloped portion of the site slopes down to Amalie Drive, with approximately 50 feet of grade change. The steepest grade is located along the boundary line between the proposed District 1 and District 2. The proposed site plan primarily locates the

structures on the northwest and northern areas of the site, where the slopes are less intense. Between the two districts, with the most intense slopes, the site has been engineered to avoid grading in this area.

FIRE MARSHAL RECOMMENDATION

Approve with conditions

• Limited building detail, and/ or building construction information provided. Construction must meet all applicable building and fire codes. Any additional fire code or access issues will be addressed during the construction permitting process. Future development or construction may require changes to meet adopted fire and building codes.

STORMWATER RECOMMENDATION

Approve with conditions

• Must comply with all regulations in the Stormwater Management Manual at the time of final submittal.

WATER SERVICES RECOMMENDATION

Approve with conditions

• Approved as a Preliminary SP only. Public and/or private Water and Sanitary Sewer construction plans must be submitted and approved prior to Final Site Plan/SP approval. The approved construction plans must match the Final Site Plan/SP plans. A minimum of 30% W&S Capacity must be paid before issuance of building permits.

NASHVILLE DOT RECOMMENDATION

Approve with conditions

• Final constructions plans shall comply with the design regulations established by NDOT. Final design and improvements may vary based on actual field conditions. In general, with a final: Callout any roadway sections, ramps, sidewalks, curb & gutter, etc. per NDOT detail standards. Dimension ROW pavement widths for clarity. Note: A private hauler will be required for waste/recycle disposal. Approval comments: Refer to NDOT's conditions of approval for revised striping and a speed study for Amalie Dr.

TRAFFIC & PARKING RECOMMENDATION

Approve with conditions

- The applicant shall submit the previously scoped speed study for Amalie Drive once the data has been recollected. After review of the speed study the applicant may be required to implement necessary traffic calming measures on Amalie Drive. Further coordination with NDOT will be required.
- The applicant shall re-stripe Amalie Dr. from Old Hickory Boulevard to McMurray Drive. Modifications to the existing striping configurations on Amalie Drive may be required. Further coordination with NDOT will be required.
- All MCSP requirements along the frontage of Amalie Drive shall be shown.
- Parking shall be per Metro Code.
- Comply with Roads conditions.
- Ensure final design complies will all the codes and requirements of all Metro agencies.

METRO SCHOOL BOARD REPORT

Projected student generation existing R10 district: <u>7</u> Elementary <u>5</u> Middle <u>5</u> High Projected student generation proposed SP district: <u>14</u> Elementary <u>10</u> Middle <u>6</u> High

The proposed zoning expected to generate 13 additional students than the existing zoning district. Students would attend Granberry Elementary School, Oliver Middle School, and Overton High School. All schools are identified as being at capacity. This information is based upon the 2020-2021 MNPS School Enrollment and Utilization report provided by Metro Schools.

STAFF RECOMMENDATION

Staff recommends approval with conditions and disapproval without all conditions.

CONDITIONS

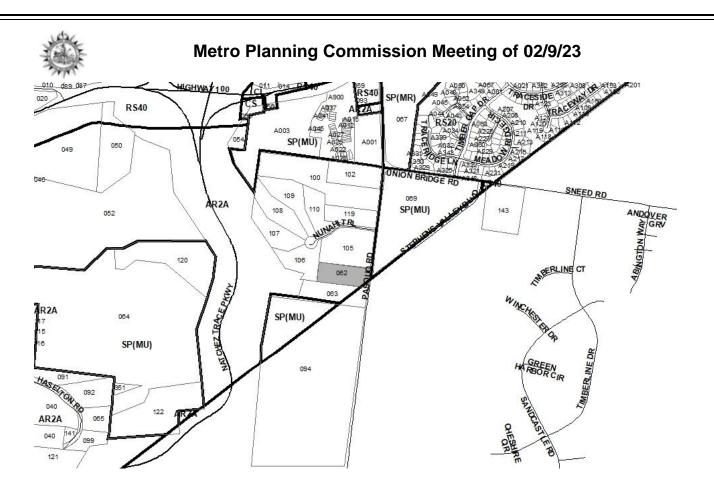

- 1. Permitted uses shall be limited to a maximum of 189 multi-family units. Short term rental property, owner occupied and short term rental property, not owner occupied shall be prohibited.
- 2. On the corrected plan set, District 1 uses shall be revised to "109 multi-family units. Short term rental property (owner occupied) and short term rental property (not owner occupied) shall be prohibited.
- 3. On the corrected plan set, District 2 uses shall be revised to "80 multi-family units. Short term rental property (owner occupied) and short term rental property (not owner occupied) shall be prohibited.
- 4. On the corrected plan set, for District 1, architectural standard note 3 shall be revised to: Building facades shall be constructed of brick, brick veneer, stone, cast stone, cementitious siding, glass, or materials substantially similar in form and function, unless otherwise approved on detailed building elevations included with the preliminary SP.

- 5. On the corrected plan set, references to fallback zoning shall be corrected to RM15.
- 6. On page 9, remove note 28 under Development Notes.
- 7. On the corrected plan please indicate the following: Along the norther property line, the 30' Type C Buffer Yard shall be located outside the existing drainage easement. No conflicts between the 2 shall occur.
- 8. Comply with all conditions and requirements of Metro reviewing agencies.
- 9. A corrected copy of the Preliminary SP plan, incorporating the conditions of approval by Metro Council, shall be provided to the Planning Department prior to or with final site plan application.
- 10. If a development standard, not including permitted uses, is absent from the SP plan and/or Council approval, the property shall be subject to the standards, regulations and requirements of the RM15 zoning district as of the date of the applicable request or application. Uses are limited as described in the Council ordinance.
- 11. The final site plan shall depict the required public sidewalks, any required grass strip or frontage zone and the location of all existing and proposed vertical obstructions within the required sidewalk and grass strip or frontage zone. Prior to the issuance of use and occupancy permits, existing vertical obstructions shall be relocated outside of the required sidewalk. Vertical obstructions are only permitted within the required grass strip or frontage zone.
- 12. The Preliminary SP plan is the site plan and associated documents. If applicable, remove all notes and references that indicate that the site plan is illustrative, conceptual, etc.
- 13. Minor modifications to the Preliminary SP plan may be approved by the Planning Commission or its designee based upon final architectural, engineering or site design and actual site conditions. All modifications shall be consistent with the principles and further the objectives of the approved plan. Modifications shall not be permitted, except through an ordinance approved by Metro Council, that increase the permitted density or floor area, add uses not otherwise permitted, eliminate specific conditions or requirements contained in the plan as adopted through this enacting ordinance, or add vehicular access points not currently present or approved.
- 14. The requirements of the Metro Fire Marshal's Office for emergency vehicle access and adequate water supply for fire protection must be met prior to the issuance of any building permits.

6010 PASQUO ROAD SP Map 169, Parcel(s) 62 06, Bellevue 35 (Dave Rosenberg)

1 Added	
Item #23	Specific Plan 2022SP-087-001
Project Name	6010 Pasquo Road SP
Council District	35 – Rosenberg
School District	09 – Tylor
Requested by	Dale and Associates, applicant; Estate of Nancy Tritschler, owner.
Deferrals	This item was deferred at the December 8, 2022, and January 12, 2023, Planning Commission meetings. No public hearing was held.
Staff Reviewer Staff Recommendation	Anthony <i>Approve with conditions and disapprove without all</i> <i>conditions</i> .

APPLICANT REQUEST Preliminary SP to permit 20 residential units.

Preliminary SP

A request to rezone from Agricultural/Residential (AR2a) to Specific Plan (SP) on property located at 6010 Pasquo Road, approximately 520 feet south of Nunahi Trail (5.3 acres), to permit 20 multi-family residential units.

Existing Zoning

<u>Agricultural/Residential (AR2a)</u> requires a minimum lot size of two acres and intended for uses that generally occur in rural areas, including single-family, two-family, and mobile homes at a density of one dwelling unit per two acres. The AR2a District is intended to implement the natural conservation or rural land use policies of the general plan. *AR2a would permit a maximum of 2 lots with 2 duplex lots for a total of 4 units. Codes makes the final determination for duplex eligibility.*

Proposed Zoning

<u>Specific Plan-Residential (SP-R)</u> is a zoning district category that provides for additional flexibility of design, including the relationship of streets to buildings, to provide the ability to implement the specific details of the General Plan. *This Specific Plan includes 20 detached multi-family units*.

BELLEVUE COMMUNITY PLAN

<u>T3 Suburban Neighborhood Evolving (T3 NE)</u> is intended to create and enhance suburban residential neighborhoods with more housing choices, improved pedestrian, bicycle and vehicular connectivity, and moderate density development patterns with moderate setbacks and spacing between buildings. T3 NE policy may be applied either to undeveloped or substantially underdeveloped "greenfield" areas or to developed areas where redevelopment and infill produce a different character that includes increased housing diversity and connectivity. Successful infill and redevelopment in existing neighborhoods needs to take into account considerations such as timing and some elements of the existing developed character, such as the street network, block structure, and proximity to centers and corridors. T3 NE areas are developed with creative thinking in

Proposed Preliminary SP

environmentally sensitive building and site development techniques to balance the increased growth and density with its impact on area streams and rivers.

SITE CONTEXT AND PLAN DETAILS

The preliminary SP application is for a 4-acre portion of a 5.3-acre parcel located along the west side of Pasquo Road, approximately 520 feet south of Nunahi Trail. The property lies adjacent to the Davidson County – Williamson County boundary, and approximately 5,000 square feet of the property lies within Williamson County; no development is proposed for the portion of the property located in Williamson County.

The property is currently zoned AR2a. One single-family residential unit is located on the property. Adjacent zoning includes: AR2a on the north, west, and southwest; SP on the southwest; and SP on the northeast. Adjacent land uses include institutional (church) on the north and single-family residential on the remaining sides. The Stephens Valley subdivision—a single-family residential development—is located southeast of the subject property in Williamson County.

The proposed SP includes 20 detached residential units and an amenities area. Each residential unit would have frontage on a gated private street, which would connect to Pasquo Road on the east. A sidewalk would be constructed along the Pasquo Road frontage. The private street serving the development would terminate in a hammerhead turnaround.

As shown on the elevations below, each unit would be two stories in height, have a front-entry garage, and have brick or masonry equivalent as the primary exterior material with cementitious and wood siding as accent materials.

Gross density of the development would be five units per acre. While the proposed density is greater than the adjacent lots to the west and south, it is comparable to approved developments in the area, including the Stephens Valley subdivision (Williamson County) to the southeast, Stephens Valley West subdivision to the north, and Traceside to the northwest. Proposed setbacks include 60 feet on the front, 20 feet on the rear, and 10 feet on the sides. Stormwater detention ponds would be situated on the east side of the property between the proposed development and Pasquo Road. A

twelve-foot landscape buffer is proposed along the perimeter of the property. Existing trees along the Pasquo Road frontage will be preserved as well.

ANALYSIS

The T3 NE policy is characterized in part by moderate-density residential development, a diverse housing mix, and moderate to high levels of connectivity. Recommended building types include a range of housing choices including single-family residential units, low and mid-rise townhouses, and low and mid-rise flats.

The T3 NE policy emphasizes consistent landscaping and inviting, functional, and accessible open space within the development. The proposed plan includes a twelve-foot landscape buffer around the perimeter of the property. It also includes a pavilion and swimming pool for residents' use; the pavilion and pool would be located near the center of the development, within a short walking distance of all the residential units. The property itself is located approximately 1,000 feet east of the Natchez Trace Parkway and 400 feet from Parkway-associated property owned by the National Park Service.

The proposed plan is generally consistent with the T3 NE Policy. The proposed housing type, density, building height, and other characteristics of the development align with the T3 NE policy. While the proposed development would be of a higher density than the rural residential areas on the south and west, it would be consistent with the densities of newer and recently approved residential developments in the area. Because the proposed SP is consistent with stated policy goals, staff recommends approval.

FIRE MARSHAL RECOMMENDATION

Approve with conditions

- Position gate to allow 45' perpendicular approach and departure for fire apparatus access.
- RF operated 'Click-2-Enter' gate operation is required.
- T-turnaround shall be marked and signed as fire lane.
- Verify turning radius meets the requirements for fire apparatus (26' inside, 48' outside).

STORMWATER RECOMMENDATION

Approve with conditions

• Must comply with all regulations in the Stormwater Management Manual at the time of final submittal.

NASHVILLE DOT RECOMMENDATION Approve with conditions

• Final constructions plans shall comply with the design regulations established by NDOT. Final design and improvements may vary based on actual field conditions. In general, on final: Callout roadway sections, ramps, sidewalks, curb & gutter, etc. per NDOT detail standards. Dimension ROW pavement widths for clarity. Note: A private hauler will be required for waste/recycle disposal. Provide half ST-252 road section along Pasquo frontage.

TRAFFIC & PARKING RECOMMENDATION Approve with conditions

- Shift vehicular turnaround on private access a minimum of 20' measured from the ROW Line.
- Divider/median on private road will need to be flush with the pavement to meet Metro Parking Design Standards.
- Parking shall be per Metro Code.
- Comply with Roads comments.

Projected student generation existing AR2a district: <u>0</u> Elementary <u>0</u> Middle <u>0</u> High Projected student generation proposed SP-R district: <u>1</u> Elementary <u>1</u> Middle <u>1</u> High

The proposed SP is anticipated to generate 3 additional students beyond what is generated under the current SP zoning. Students would attend Harpeth Valley Elementary, Bellevue Middle School, and Hillwood High School. All three schools have been identified as having additional capacity. This information is based upon the 2020-2021 MNPS School Enrollment and Utilization report provided by Metro Schools.

STAFF RECOMMENDATION

Staff recommends approval with conditions and disapproval without all conditions.

CONDITIONS

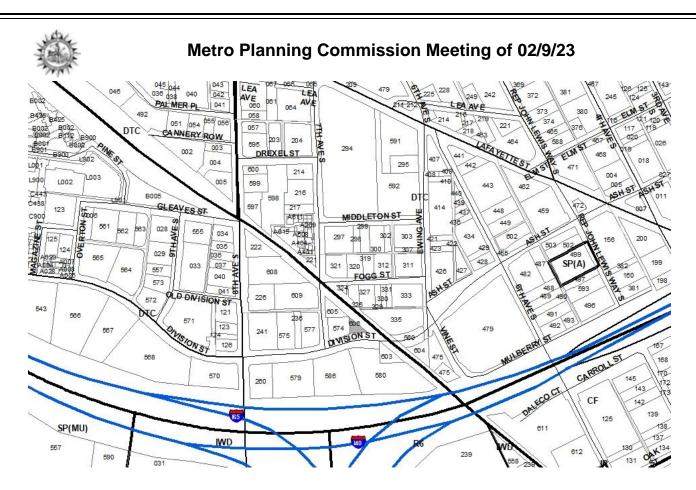

- 1. Permitted uses shall be limited to a maximum of 20 residential units. Short-term rental property, owner-occupied and short-term rental property, not-owner occupied shall be prohibited.
- 2. Comply with all conditions and requirements of Metro reviewing agencies.

- 3. A corrected copy of the Preliminary SP plan, incorporating the conditions of approval by Metro Council, shall be provided to the Planning Department prior to or with final site plan application.
- 4. If a development standard, not including permitted uses, is absent from the SP plan and/or Council approval, the property shall be subject to the standards, regulations and requirements of the RM15-A-NS zoning district as of the date of the applicable request or application. Uses are limited as described in the Council ordinance.
- 5. The final site plan shall label all internal driveways as "Private Driveways". A note shall be added to the final site plan that the driveways shall be maintained by the Homeowner's Association
- 6. The final site plan shall depict the required public sidewalks, any required grass strip or frontage zone and the location of all existing and proposed vertical obstructions within the required sidewalk and grass strip or frontage zone. Prior to the issuance of use and occupancy permits, existing vertical obstructions shall be relocated outside of the required sidewalk. Vertical obstructions are only permitted within the required grass strip or frontage zone.
- 7. The Preliminary SP plan is the site plan and associated documents. If applicable, remove all notes and references that indicate that the site plan is illustrative, conceptual, etc.
- 8. Minor modifications to the Preliminary SP plan may be approved by the Planning Commission or its designee based upon final architectural, engineering or site design and actual site conditions. All modifications shall be consistent with the principles and further the objectives of the approved plan. Modifications shall not be permitted, except through an ordinance approved by Metro Council, that increase the permitted density or floor area, add uses not otherwise permitted, eliminate specific conditions or requirements contained in the plan as adopted through this enacting ordinance, or add vehicular access points not currently present or approved.
- 9. The requirements of the Metro Fire Marshal's Office for emergency vehicle access and adequate water supply for fire protection must be met prior to the issuance of any building permits.
- 10. Maximum building height shall not exceed that shown on elevations included in the preliminary SP.

630 DIVISION STREET Map 093-14, Parcel(s) 606 09, Downtown 19 (Freddie O'Connell)

Item #24 Project Name Associated Case Council District School District Requested by

Staff Reviewer Staff Recommendation Specific Plan 2023SP-003-001 630 Division Street 2023SP-003-001 19 – O'Connell 05 – Buggs Chisel Workshop, applicant, Jim & Candace Higgins owners.

Ventura Approve with conditions and disapproval without all conditions.

APPLICANT REQUEST Preliminary Specific Plan to permit a mixed-use development.

Zone Change

A request to rezone from Downtown Code (DTC) to Specific Plan (SP) zoning for property located at 630 Division Street, approximately 130 feet east of 7th Avenue South, (0.09 acres), to permit a mixed-use development.

Existing Zoning

<u>Downtown Code (DTC)</u> is a zoning district category that is intended for high intensity office, retail, restaurant, amusement, and residential use and is designed to create walkable neighborhoods using appropriate building placement and bulk standards.

Proposed Zoning

<u>Specific Plan (SP)</u> is a zoning district category that provides for additional flexibility of design, including the relationship of streets to buildings, to provide the ability to implement the specific details of the General Plan. This Specific Plan includes mixed-use building containing residential and commercial uses.

DOWNTOWN NASHVILLE COMMUNITY PLAN

Existing Policy

<u>T6 Downtown Neighborhood (T6 DN)</u> is intended to maintain and create downtown neighborhoods comprised of diverse development characteristics, that contain a mix of uses such as residential, commercial, and institutional uses. The policy seeks to appropriately transition from less intense areas of T6 DN areas to the more intense T6 Downtown Core policy areas. The neighborhoods are comprised of high levels of connectivity and complete street networks, sidewalks, bikeways, and transit.

Gulch South Neighborhood Supplemental Policy

<u>09-T6-DN-GS-Division Street</u> is intended to accommodate a mix of uses limited to mid-rise developments. The supplemental policy identifies vital gateways, intersections where additional building height may be considered, as well as opportunities to provide recreation and leisure.

T PROPOSED SITE PLAN

SITE CONTEXT AND PLAN DETAILS

The approximately .09-acre site is located approximately 638 feet due East from the intersection of Division Street and 8th Street Ave South. The site contains one street frontage, Division Street. Division Street is classified as an Arterial Boulevard in the Major and Collector Street Plan (MCSP). The surrounding area consists of multi-family residential and commercial uses.

Proposed Site Plan for the Regulatory SP

The site plan proposes an approximately 3,800 square foot mixed-use building. The first floor consists of retail or a restaurant space, and vehicular entry and access to the two parking spaces and a shared area for loading and unloading for the retail tenant and penthouse owner. The second floor is planned to be a one multi-family residential unit, referenced as the penthouse in the site plan.

The proposed building is situated on property that is irregularly shaped. It is enclosed by railroad tracks to the Northeast and a medical office to the West. The property's access is limited to Division Street. The building will have a separate entry drive which is positioned closest to the southwest corner of the site, making use of an existing curb cut that will be shared with the adjacent property. The existing sidewalk will remain as the site is partially constrained by the Division Street Bridge. The proposed design intends to have dining tables and seating fronting the retail or restaurant, which will require a mandatory referral for the encroachment within the Right-of-Way.

ANALYSIS

The site was created in 2019 from railroad right-of-way; The DTC designates property created by the abandonment of right-of-way to be zoned as Open Space Subdistrict. Rezoning the property to SP would allow the flexibility for the property to use the development standards of the Gulch South Subdistrict of the Downtown Code, bringing the site and proposal into compliance with the development standards of its surrounding neighborhood.

FIRE MARSHAL RECOMMENDATION

Approve with conditions

• Limited building detail, and/ or building construction information provided. Construction must meet all applicable building and fire codes. Any additional fire code or access issues will be addressed during the construction permitting process. Future development or construction may require changes to meet adopted fire and building codes.

STORMWATER RECOMMENDATION

Approve with conditions

• Applicant to submit for grading permit exemption prior to building permit approval.

WATER SERVICES RECOMMENDATION

Approve with conditions

• Approved as a Preliminary SP only. Public and/or private Water and Sanitary Sewer construction plans must be submitted and approved prior to Final Site Plan/SP approval. The approved construction plans must match the Final Site Plan/SP plans. A minimum of 30% W&S Capacity must be paid before issuance of building permits.

GREENWAYS RECOMMENDATION

Approve

• No greenway easement is being required due to surrounding obstruction and topography.

NASHVILLE DOT RECOMMENDATION

Approve with conditions

- Prior to final, proof of ownership and possible abandonment of excess ROW, between existing property line and Division St., shall be worked out. If aforementioned ROW was purchased and currently owned by Metro, coordinate w/ NDOT.
- Provide a site waste management (loading and unloading) plan. Loading/unloading will not be allowed curbside from Division St. ROW. Apply to Traffic & Parking to sign 'No loading/unloading zone' curbside along Division St. ROW frontage.
- Due to proximity of Division St. bridge, vehicular backing-out movements, via proposed access ramp, will not be allowed.

TRAFFIC AND PARKING RECOMMENDATION

Approve with conditions

- Remove the call-out for Division St ROW abandonment. This request shall be done separately from the SP and shall be finalized prior to Final SP approval.
- The shared curb cut with the neighboring parcel to the West, shall not exceed 35'.
- Due to the proximity of this development to the Division Street Bridge, backing out of this access is prohibited and shall not occur in any circumstance.
- Comply with Roads comments.

METRO SCHOOL BOARD REPORT

Existing student generation existing DTC district: <u>0</u> Elementary <u>0</u> Middle <u>0</u> High Projected student generation proposed SP district: <u>0</u> Elementary <u>0</u> Middle <u>0</u> High

The proposed SP zoning district is not expected to generate additional students than what is typically generated under the existing DTC zoning district. Students would attend Jose Paideia Elementary Magnet School, John Early Middle School, and Pearl-Cohn High School. All schools are under capacity. This information is based upon the 2020-2021 MNPS School Enrollment and Utilization report provided by Metro Schools.

STAFF RECOMMENDATION

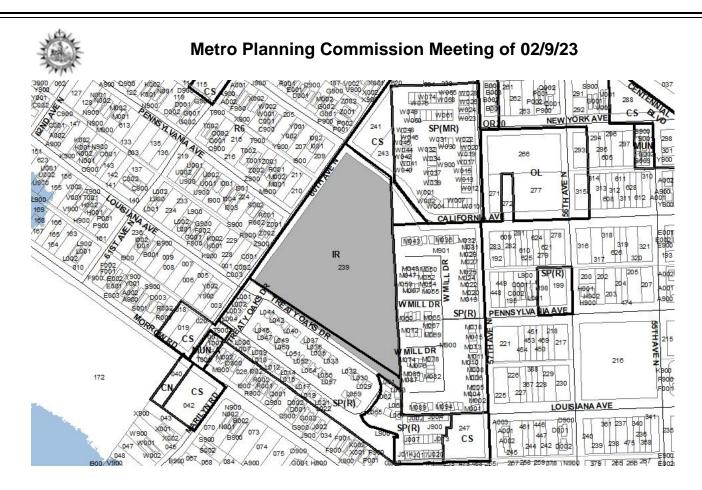

Staff recommends approval with conditions and disapproval without all conditions.

CONDITIONS

- 1. Permitted uses shall be per the Downtown Code West Area.
- 2. Building height should be a minimum of 25 feet at the street.
- 3. If any public street element, including but not limited to the planting strip, sidewalk, bridge, etc. is damaged during the construction of the proposed building, the owner must ensure the damage is repaired.

- 4. With the submittal of the final site plan, provide architectural elevations complying with all architectural standards outlined on the preliminary SP for review and approval by Planning Staff.
- 5. Comply with all conditions of Metro reviewing agencies.
- 6. The Preliminary SP plan is the site plan and associated documents. If applicable, remove all notes and references that indicate that the site plan is illustrative, conceptual, etc.
- 7. The requirements of the Metro Fire Marshal's Office for emergency vehicle access and adequate water supply for fire protection must be met prior to the issuance of any building permits.
- 8. If a development standard, not including permitted uses, is absent from the SP plan and/or Council approval, the property shall be subject to the standards, regulations, and requirements of the Gulch South Subdistrict of the Downtown Code zoning district as of the date of the applicable request or application. Uses are limited as described in the Council ordinance.
- 9. A corrected copy of the preliminary SP plan incorporating the conditions of approval by Metro Council shall be provided to the Planning Department prior to or with final site plan application.
- 10. Minor modifications to the preliminary SP plan may be approved by the Planning Commission or its designee based upon final architectural, engineering or site design and actual site conditions. All modifications shall be consistent with the principles and further the objectives of the approved plan. Modifications shall not be permitted, except through an ordinance approved by Metro Council that increase the permitted density or floor area, add uses not otherwise permitted, eliminate specific conditions or requirements contained in the plan as adopted through this enacting ordinance, or add vehicular access points not currently present or approved.

20 – Roberts 05 – Buggs Fulmer Lucas, applicant; Skylight Land, LP, owner.

Shane *Approve with conditions and disapprove without all conditions.*

APPLICANT REQUEST Preliminary SP to permit a mixed-use development.

Zone Change

A request to rezone from Industrial Restrictive (IR) to Specific Plan (SP) zoning for property located at 5901 California Avenue, at the southeast corner of 60th Avenue North and California Avenue (8.12 acres), to permit a mixed-use development.

Existing Zoning

<u>Industrial Restrictive (IR)</u> is intended for a wide range of light manufacturing uses at moderate intensities within enclosed structures.

Proposed Zoning

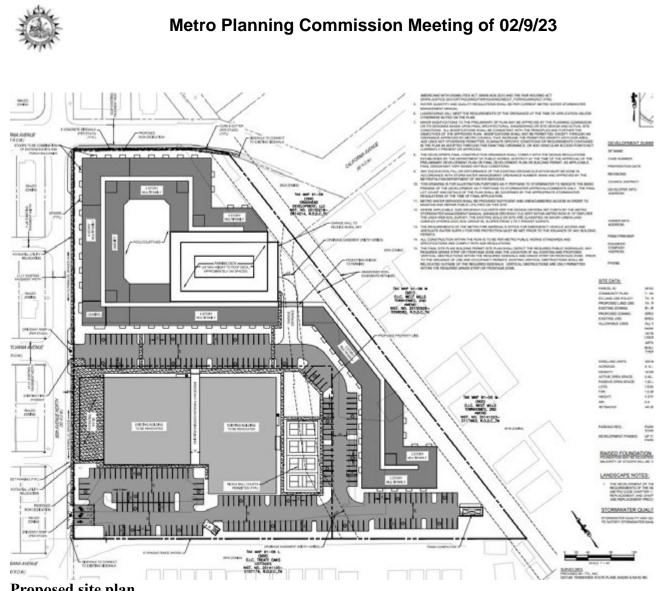

<u>Specific Plan-Mixed Use (SP-MU)</u> is a zoning district category that provides for additional flexibility of design, including the relationship of streets to buildings, to provide the ability to implement the specific details of the General Plan. This Specific Plan includes residential uses in addition to office and/or commercial uses.

SITE CONTEXT AND PLAN DETAILS

The application consists of one parcel (Map 091-02, Parcel 239) totaling 8.12 acres and bounded by California Avenue on the northeast, 60th Avenue North on the northwest, Treaty Oaks Drive on the southwest, and the West Mill Townhomes development on the east. The multi-family developments to the east and south are zoned SP. To the north across California Avenue is an area of CS zoning that governs a restaurant and a single-family home. The residential area across 60th Avenue North is zoned R6. The subject property contains a light manufacturing use that features a community mural along the 60th Avenue North frontage.

Site Plan

The SP is intended to create a mixed-use development. The plan authorizes the creation of 300 multi-family residential units (density of 16.55 units/acre) and commercial square footage based on a FAR of 1.5. The SP includes a site plan as well as bulk standards, a grading/drainage plan, and a landscaping plan with a note that the final site plan will meet the requirements of Code (with the exception of the southern buffer yard, which will be reduced to a Type A from the required Type B because of space constraints). A note indicates parking will not be provided in excess of the UZO maximum standard. Existing industrial buildings in the southern half of the site will remain and be

Proposed site plan

repurposed for commercial activities on a separate parcel. East and north of these buildings are the multi-family units, housed in two buildings not to exceed four stories in height. These units will be parked by a parking garage wrapped on three sides. Amenities include pickle ball courts interior to the site and a patio dining area along 60th Avenue North. The leasing office corner along 60th Avenue North will be architecturally significant. The internal drives will feature surface parking. A pool and courtyard will be provided internal to the multi-family buildings. Five-foot sidewalks and parallel parking will be provided along the 60th Avenue North frontage. ROW will be dedicated, and a grass strip constructed along California Avenue.

WEST NASHVILLE COMMUNITY PLAN

T4 Urban Neighborhood Maintenance (T4 NM) is intended to maintain the general character of existing urban residential neighborhoods. T4 NM areas will experience some change over time, primarily when buildings are expanded or replaced. When this occurs, efforts should be made to retain the existing character of the neighborhood. T4 NM areas are served by high levels of connectivity with complete street networks, sidewalks, bikeways and existing or planned mass transit. Enhancements may be made to improve pedestrian, bicycle and vehicular connectivity.

<u>Conservation (CO)</u> is intended to preserve environmentally sensitive land features through protection and remediation. CO policy applies in all Transect Categories except T1 Natural, T5 Center, and T6 Downtown. CO policy identifies land with sensitive environmental features including, but not limited to, steep slopes, floodway/floodplains, rare or special plant or animal habitats, wetlands, and unstable or problem soils. The guidance for preserving or enhancing these features varies with what Transect they are in and whether or not they have already been disturbed.

ANALYSIS

The property is within the T4 Urban Neighborhood Maintenance (T4 NM) policy area. (A small area of Conservation policy exists along 60th Avenue North but the feature it was intended to protect appears to have been removed.) T4 NM policy is intended to maintain urban neighborhoods as characterized by their moderate- to high-density residential development pattern, building form/types, setbacks, and building rhythm along the street. T4 NM areas will experience some changes over time, primarily when buildings are expanded or replaced. The existing context of the site and neighborhood is mixed-use in character, with medium-density multi-family present in SP zone districts, industrial buildings currently on site, and commercial uses in the vicinity. The application proposes to retain some of this existing built fabric by converting it to commercial use and integrating multi-family in a way that allows the site to retain its prominence while better interfacing with the surrounding streetscape. Medium-density uses are appropriate for T4 NM areas, especially in situations such as this where adjacent attached units are already present and where the existing industrial uses are being replaced by commercial and residential uses.

In addition, infill areas such as this are identified in the policy as being suitable for a more diverse mix of housing than similar locations that are also interior to the neighborhood. The stacked flats character of the development is an appropriate step up in intensity from the context based on this infill guidance but will not overwhelm the existing neighborhood because of the special characteristics and prominence of the site. The policy states that when sites contain uses not consistent with the T4 NM policy guidance (such as the existing industrial use on site), rezonings that otherwise might be considered inappropriate can be approved to achieve closer conformance with policy. The multi-family and commercial uses within the proposed SP would accomplish this goal.

The development will be within easy walking distance of a WeGo Route (19 Herman) and will be well integrated into the existing urban streetscape, thus featuring high levels of connectivity. The buildings will address the sidewalk with shallow setbacks, with parking being located internal to the site rather than between buildings and the ROW.

Staff recommends approval with conditions and disapproval without all conditions. The proposed SP allows an appropriately intense mixed use development that achieves the intent of the urban policy areas within which it is located. The proposal will maximize this prominent location within the neighborhood while also providing more opportunities to meet the existing needs of the surrounding community.

FIRE MARSHAL RECOMMENDATION Approve with conditions

• Limited building detail, and/ or building construction information provided. Construction must meet all applicable building and fire codes. Any additional fire code or access issues will be addressed during the construction permitting process. Future development or construction may require changes to meet adopted fire and building codes.

STORMWATER RECOMMENDATION

Approve with conditions

- Any improvements other than standard at grade paving or greenspace may require an encroachment agreement with Metro Water Services. This shall be determined upon application for grading permit and verified prior to Final SP approval.
- Must comply with all regulations in the Stormwater Management Manual at the time of final submittal.

WATER SERVICES RECOMMENDATION

Approve with conditions

• Approved as a Preliminary SP only. Public and/or private Water and Sanitary Sewer construction plans must be submitted and approved prior to Final Site Plan/SP approval. The approved construction plans must match the Final Site Plan/SP plans. Submittal of an availability study is required before the Final SP can be reviewed. Once this study has been submitted, the applicant will need to address any outstanding issues brought forth by the results of this study. A minimum of 30% W&S Capacity must be paid before issuance of building permits.

NASHVILLE DOT RECOMMENDATION

Approve with conditions

- With final: Callout roadway sections, (access and ADA) ramps, sidewalks, curb & gutter, etc. per NDOT detail standards. Show 'Now Entering Private Drive' signage where applicable off public roads. Provide stop control at intersections. Provide stopping sight distance exhibits at any relevant intersections and accesses. Dimension ROW pavement widths for clarity. Provide waste plan for site. Note: A private hauler will be required for waste/recycle disposal. Add note: There shall be no vertical obstructions in new sidewalks, ROW pavement and/or curb & gutter. If necessary, coordinate with NES to have existing utility poles relocated to either the furnishing zone or orient sidewalks to the rear of poles. (cont.) If needed, dedicate additional ROW to accommodate sidewalks jogs beyond MCSP requirements. Comply w/ NDOT traffic comments.
- Roads approval comments:
 - California Ave: Provide half the ST-252B (55 ft. ROW) section, from CL, along property frontage and call out on site plan.
 - 60th Ave: Provide half the ST-252 (50 ft. ROW), from CL, along frontage and call out on site plan.
 - Provide new curb and gutter, per ST-200, along entire ROW frontage.

TRAFFIC AND PARKING RECOMMENDATION Approve with conditions

- The southern driveway close to Louisiana Ave needs to be reduced to a 1 ingress/1 egress. Reduce width of the driveway to a max of 24'.
- The preliminary traffic memo assessed pedestrian infrastructure in the area. All of the infrastructure needs in the area outlined in that memo shall be constructed by this development in addition to any other outcomes from the full traffic that is to be submitted. These initial infrastructure improvements include the following:
 - Morrow & Tennessee:
 - Construct pedestrian curb ramps on Morrow Rd & Tennessee Ave for existing crosswalk.
 - Extend curbs for a shorter crosswalk distance.
 - An enhanced pedestrian crossing may be required per FHWA Guidance.
 - Morrow & 60th:
 - Install a crosswalk on the east leg with ADA compliant ramps and detectable warning mats.
 - Extend curbs on the Northern side of Marrow for each approach to shorten the crossing distance while also preventing parking near the intersection.
 - Install a crosswalk on the Northern leg of the intersection across 60th Ave with adequate ADA ramps and detectable warning mats.
 - 60th & California:
 - Install a crosswalk on the north & east legs with ADA compliance and detectable warning mats.
 - Add sidewalk on the South side of California Ave (to provide a continuous sidewalk between 60th Ave N and 58th Ave N).
 - Add sidewalk on the east side of 60th Ave N (to complete a gap and provide connectivity to the sidewalk on Morrow Rd).
 - Add stop lines on all approaches. v. Add 'all-way' plaque to westbound stop.
 - 58th & California:
 - Install a pedestrian crossing on California with adequate ADA ramps and detectable warning mats. Advanced pedestrian crossing signage shall also be installed per MUTCD and FHWA guidance.
 - Install a crosswalk on the Western leg of the intersection across 58th Ave.
- Prior to Final SP approval, applicant shall submit a full TIS that has been properly scoped with NDOT
- Prior to Final SP approval applicant shall coordinate with relevant Metro Nashville teams, including developer services, WeGo, and Walking and Biking, to determine appropriate improvements to be built by developer. These may include but are not limited to improvements listed in the study.
- Prior to Final SP approval, applicant may complete supplementary analysis as needed to ensure the safety and feasibility of the site.

METRO SCHOOL BOARD REPORT

Projected student generation existing IR districts: <u>0</u> Elementary <u>0</u> Middle <u>0</u> High Projected student generation proposed SP-MU district: <u>23</u> Elementary <u>18</u> Middle <u>14</u> High

The proposed SP-MU zoning is expected to generate 55 more students than the existing zoning districts. Students would attend Cockrill Elementary School, McKissack Middle School, and Pearl-Cohn High School. All three schools are identified as having capacity for additional students. This information is based upon the 2020-2021 MNPS School Enrollment and Utilization report provided by Metro Schools.

STAFF RECOMMENDATION

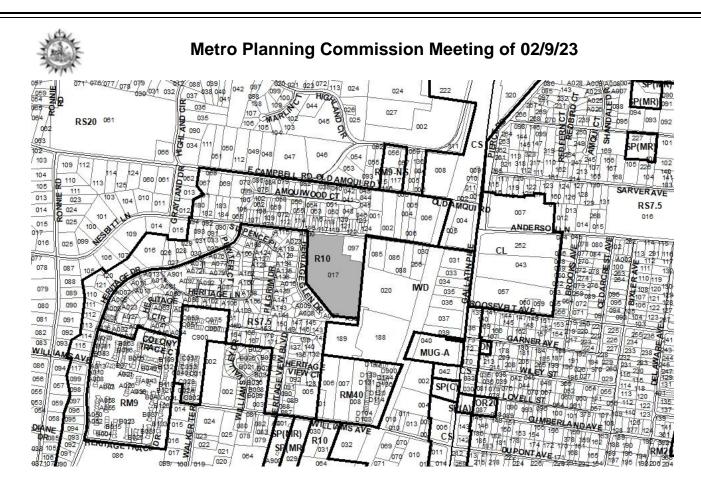

Approve with conditions and disapprove without all conditions.

CONDITIONS

1. Permitted uses shall be limited to 300 multi-family residential units and a maximum FAR of 1.5 for non-residential uses as specified on the Specific Plan. Short term rental properties, owner occupied and short term rental properties, not-owner occupied shall be prohibited.

- 2. At final site plan, comply with any architectural refinements from staff for the leasing office corner.
- 3. The Preliminary SP plan is the site plan and associated documents. If applicable, remove all notes and references that indicate that the site plan is illustrative, conceptual, etc.
- 4. The final site plan shall label all internal driveways as "Private Driveways." A note shall be added to the final site plan that the driveways shall be maintained by the Homeowner's Association.
- 5. The requirements of the Metro Fire Marshal's Office for emergency vehicle access and adequate water supply for fire protection must be met prior to the issuance of any building permits.
- 6. Comply with all conditions and requirements of Metro reviewing agencies.
- 7. If a development standard, not including permitted uses, is absent from the SP plan and/or Council approval, the property shall be subject to the standards, regulations and requirements of the MUL-A zoning district as of the date of the applicable request or application. Uses are limited as described in the Council ordinance.
- 8. A corrected copy of the preliminary SP plan incorporating the conditions of approval by Metro Council shall be provided to the Planning Department prior to or with final site plan application.
- 9. Minor modifications to the preliminary SP plan may be approved by the Planning Commission or its designee based upon final architectural, engineering or site design and actual site conditions. All modifications shall be consistent with the principles and further the objectives of the approved plan. Modifications shall not be permitted, except through an ordinance approved by Metro Council that increase the permitted density or floor area, add uses not otherwise permitted, eliminate specific conditions or requirements contained in the plan as adopted through this enacting ordinance, or add vehicular access points not currently present or approved.

Anthony *Approve with conditions and disapprove without all conditions.*

APPLICANT REQUEST Preliminary SP to permit a mixed use development.

Preliminary SP

A request to rezone from One and Two-Family Residential (R10) to Specific Plan (SP) zoning for property located at 253 Nesbitt Lane, near the southeast corner of Heritage Glen Drive and Nesbitt Lane (9.88 acres), to permit a mixed use development with 194 multifamily residential units and nonresidential uses.

Existing Zoning

<u>One and Two-Family Residential (R10)</u> requires a minimum 10,000 square foot lot and is intended for single -family dwellings and duplexes at an overall density of 4.63 dwelling units per acre including 25 percent duplex lots. *R10 would permit a maximum of 43 lots with 10 duplex lots for a total of 53 units. Codes makes the final determination on duplex eligibility.*

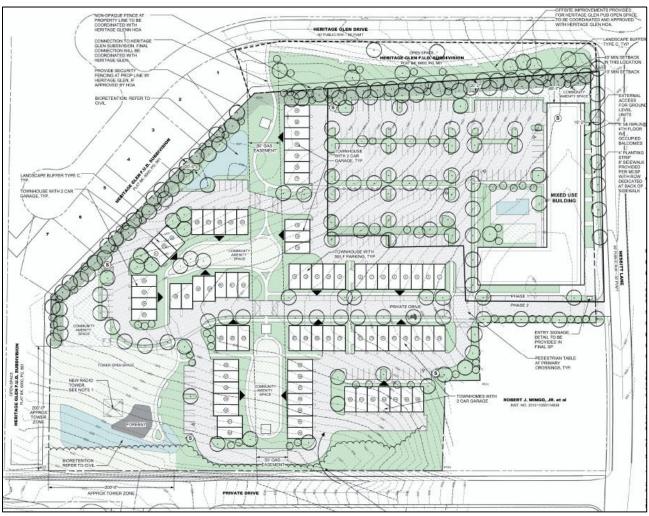

Proposed Zoning

<u>Specific Plan-Mixed Use (SP-MU)</u> is a zoning district category that provides for additional flexibility of design, including the relationship of streets to buildings, to provide the ability to implement the specific details of the General Plan. *This Specific Plan includes 194 multifamily residential units in addition to 7,000 square feet for commercial uses.*

MADISON COMMUNITY PLAN

<u>T4 Urban Mixed Use Neighborhood (T4 MU)</u> is intended to maintain, enhance, and create urban, mixed use neighborhoods with a development pattern that contains a variety of housing along with mixed use, commercial, institutional, and even light industrial development. T4 MU areas are served by high levels of connectivity with complete street networks, sidewalks, bikeways, and existing or planned mass transit.

North►

Proposed Preliminary SP

SITE CONTEXT AND PLAN DETAILS

The preliminary SP application is for a 9.88-acre property located along the south side of Nesbitt Lane, approximately 40 feet east of Heritage Glen Drive. The property is currently zoned R10. Four radio towers are currently situated on the property. Adjacent properties are zoned: R10 on the north and northeast; IWD on the east; and RS7.5 and PUD on the south and west. Adjacent land uses include: two-family residential on the north; industrial on the west; open space for the Heritage Glen PUD Subdivision on the southeast and west; and single-family residential on the northeast and southwest. The site has frontage on Nesbitt Lane; however, no paved access currently exists on the site. The east property line—which lies adjacent to an industrial zoning district and uses—is lined with a dense, mature tree row.

The proposed SP includes: a 100,000-square foot mixed use building with up to 115 multifamily residential units and 7,000 square feet of commercial space; 79 townhouses; and a single radio tower situated at the southeast corner of the property. The mixed use building would have frontage on Nesbitt Lane and would have a height of four stories (55 feet). The building would have a stepback six feet in width above the third floor; residential balconies would be permitted within the stepback area. All residential units in the mixed use building would have one or two bedrooms.

The townhouse units would be located south of the mixed-use building and would have height of up to three stories (35 feet). All townhouse units would have two bedrooms. Of the 79 townhouse units, 70 would have two-car garages, while the remaining nine would be surface-parked. A large parking lot primarily serving the mixed use building would be located on the west side of the property, and parking rows primarily serving the townhouse units would be scattered throughout the development. Using the Zoning Code's parking standards, 196 spaces would be required for this development; 216 spaces are shown on the plan.

All streets within the development would be private. Access to the site would be via a single access point on Nesbitt Lane. The development includes an internal sidewalk network as well as an eight-foot sidewalk and four-foot planting strip along the Nesbitt Lane frontage. A 20-foot wide Type C landscape buffer would be installed along the western and southern boundaries where the development lies adjacent to the Heritage Glen PUD subdivision and associated open space. One radio tower would remain on the site; it would be situated near the location of an existing tower at the southeastern corner of the property and would have a 200-foot fall zone on all sides. The proposed radio tower would be subject to standards set forth in Chapter 17.16, Article II, of the Zoning Code.

The primary exterior materials for all structures would be brick and/or stone masonry; 45 percent or greater of each façade would consist of primary materials. Cementitious siding would be a secondary material and could constitute up to 35 percent of each façade. Prefinished metal panels would be incorporated as accent materials and would constitute no more than 20 percent of each façade. Other architectural components would follow MUL-A standards.

ANAYLSIS

The T4 MU policy is characterized in part by: high levels of connectivity and complete street networks; moderate to high density residential development, mixed use, commercial, light industrial, and institutional uses; parking behind or beside buildings and generally accessed by side

streets or alleys; and buildings constructed to the back edge of the sidewalk, creating a pedestrianfriendly environment. The policy further supports mixed use buildings with first floor tenant space of 10,000 square feet or less.

The subject property is located along Nesbitt Lane, which is identified as a mixed use collector avenue on the Major and Collector Street Plan (MCSP). A 59-foot right-of-way is required; the SP includes right-of-way dedication to satisfy the MCSP requirement. The site lies approximately onequarter of a mile west of Gallatin Pike. NashvilleNext identifies Gallatin Pike as an immediate-need high capacity transit corridor; this indicates that more frequent transit already operates in the area, and routes are likely to be upgraded to accommodate higher capacity transit in the future.

The proposed residential density (19.6 residential units per acre), uses, and parking layout are generally consistent with the T4 MU policy. The mixed use building fronting Nesbitt Lane would have 7,000 square feet of ground floor commercial space; this complies with the policy's guidance for first floor tenant spaces. The front façade of the mixed use building would be located approximately ten feet behind the sidewalk, providing a transition from the more suburban residential development on the west and north to the higher-intensity commercial development along Gallatin Pike to the east. Because the proposed SP is consistent with applicable policy goals, staff recommends approval.

FIRE MARSHAL RECOMMENDATION

Approve with conditions

• Limited building detail, and/ or building construction information provided. Construction must meet all applicable building and fire codes. Any additional fire code or access issues will be addressed during the construction permitting process. Future development or construction may require changes to meet adopted fire and building codes.

STORMWATER RECOMMENDATION

Approve with conditions

• Must comply with all regulations in the Stormwater Management Manual at the time of final submittal.

METRO WATER SERVICES RECOMMENDATION

Approve with conditions

• Approved as a Preliminary SP only. Public and/or private Sanitary Sewer construction plans must be submitted and approved prior to Final Site Plan/SP approval. The approved construction plans must match the Final Site Plan/SP plans. Submittal of an availability study is required before the Final SP can be reviewed. Once this study has been submitted, the applicant will need to address any outstanding issues brought forth by the results of this study. A minimum of 30% Sanitary Sewer Capacity must be paid before issuance of building permits.

NASHVILLE DOT RECOMMENDATION

Approve with conditions

• Final constructions plans shall comply with the design regulations established by NDOT. Final design and improvements may vary based on actual field conditions. In general, on

final: Callout roadway sections (if necessary), ramps, sidewalks, curb & gutter, etc. per NDOT detail standards. Dimension ROW pavement widths for clarity. Note: A private hauler will be required for waste/recycle disposal.

- Offsite sidewalk extension and ramp along Nesbitt shall be in the public ROW. (cont.) Coordinate with Heritage Glen subdivision HOA on ROW dedication, if necessary to accommodate new intersection ramp and sidewalk extension.
- Dimension new sidewalk/grass along Nesbitt ROW. In general, reference MCSP for requirements.

TRAFFIC & PARKING RECOMMENDATION

Approve with conditions

- Phasing lines need to be adjusted to include the full roads that will be used as access points for phase 1.
- Phase 1's parking needs to all be included with Phase 1's construction. As the site plan is showing the phasing lines, Phase 1 only has 151 parking spots. Phase 1 requires 178 spots.
- Provide bedroom counts for the townhomes to confirm parking requirements. If they are all 1 or 2 bedrooms, then the requirement is being met.
- Note all off-site improvements from the finalized traffic study and include designs in building permit plan set submittal: a) If there is existing ROW at Nesbitt & Gallatin, the eastbound approach of Nesbitt should be restriped to include one left-turn lane and one right turn lane with 75 feet of storage. b) Coordinate with WeGo on transit improvement needs in the area. These improvements will be either completed by this development, or a contribution to go towards the improvements will be made. c) At Gallatin Pike & Anderson Drive, the crosswalks are to be refreshed and detectable warning mats will be added where currently missing by this development. c) At Nesbitt Lane & Gallatin Pike, add detectable warning mats, ADA ramps, and crosswalks where currently missing.

METRO SCHOOL BOARD REPORT

Projected student generation existing R10 district: <u>6</u> Elementary <u>5</u> Middle <u>6</u> High Projected student generation proposed SP-MU district: <u>20</u> Elementary <u>13</u> Middle <u>12</u> High

The proposed SP is anticipated to generate 28 additional students beyond what is generated under the current SP zoning. Students would attend Stratton Elementary, Madison Middle School, and Hunters Lane High School. All three schools have been identified as having additional capacity. This information is based upon the 2020-2021 MNPS School Enrollment and Utilization report provided by Metro Schools.

STAFF RECOMMENDATION

Staff recommends approval with conditions and disapproval without all conditions.

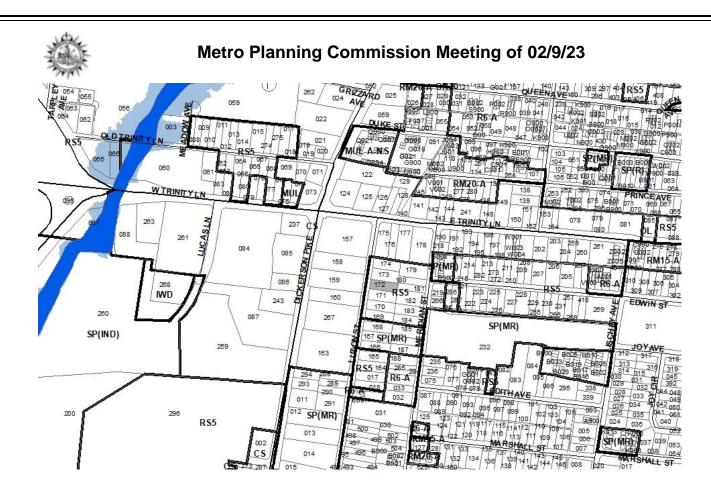

CONDITIONS

- 1. Permitted uses shall be limited to a maximum of 194 residential units and 7,000 square feet of nonresidential floor area. Short-term rental property, owner-occupied and short-term rental property, not-owner occupied shall be prohibited. Nonresidential uses are limited to those permitted in the MUL-A-NS zoning district.
- 2. Comply with all conditions and requirements of Metro reviewing agencies.
- 3. A corrected copy of the Preliminary SP plan, incorporating the conditions of approval by Metro Council, shall be provided to the Planning Department prior to or with final site plan application.
- 4. If a development standard, not including permitted uses, is absent from the SP plan and/or Council approval, the property shall be subject to the standards, regulations and requirements of the MUL-A-NS zoning district as of the date of the applicable request or application. Uses are limited as described in the Council ordinance.
- 5. The final site plan shall label all internal driveways as "Private Driveways". A note shall be added to the final site plan that the driveways shall be maintained by the Homeowner's Association
- 6. The final site plan shall depict the required public sidewalks, any required grass strip or frontage zone and the location of all existing and proposed vertical obstructions within the required sidewalk and grass strip or frontage zone. Prior to the issuance of use and occupancy permits, existing vertical obstructions shall be relocated outside of the required sidewalk. Vertical obstructions are only permitted within the required grass strip or frontage zone.
- 7. The Preliminary SP plan is the site plan and associated documents. If applicable, remove all notes and references that indicate that the site plan is illustrative, conceptual, etc.
- 8. Minor modifications to the Preliminary SP plan may be approved by the Planning Commission or its designee based upon final architectural, engineering or site design and actual site conditions. All modifications shall be consistent with the principles and further the objectives of the approved plan. Modifications shall not be permitted, except through an ordinance approved

by Metro Council, that increase the permitted density or floor area, add uses not otherwise permitted, eliminate specific conditions or requirements contained in the plan as adopted through this enacting ordinance, or add vehicular access points not currently present or approved.

- 9. The requirements of the Metro Fire Marshal's Office for emergency vehicle access and adequate water supply for fire protection must be met prior to the issuance of any building permits.
- 10. Prior to approval of final SP for the radio tower, all standards and procedural requirements for a telecommunications facility established in Section 17.16.16.080.C of the Zoning Code shall be satisfied.
- 11. A landscape strip with minimum width of five feet shall be placed along the entire frontage of each townhouse between the unit and the sidewalk. The landscape strip shall be shown on the corrected copy of the preliminary SP.
- 12. On corrected copy of the preliminary SP, reorient north arrow on cover sheet to show correct orientation.
- 13. Prior to approval of final SP, applicant shall provide water and sewer availability/cap

Staff Reviewer Staff Recommendation	Swaggart Disapprove.

APPLICANT REQUEST Zone change from RS5 to RM15-A.

Zone Change

A request to rezone from Single-Family Residential (RS5) to Multi-Family Residential-Alternative (RM15-A) zoning for property located at 1717 Luton Street, approximately 450 feet south of East Trinity Lane (0.32 acres).

Existing Zoning

<u>Single-Family Residential (RS5)</u> requires a minimum 5,000 square foot lot and is intended for single-family dwellings at a density of 7.41 dwelling units per acre. *RS5 would permit a maximum of one unit.*

Proposed Zoning

<u>Multi-Family Residential-Alternative (RM15-A)</u> is intended for single-family, duplex, and multi-family dwellings at a density of 15 dwelling units per acre and is designed to create walkable neighborhoods through the use of appropriate building placement and bulk standards. *RM15-A would permit a maximum of five units*.

EAST NASHVILLE COMMUNITY PLAN

<u>T4 Urban Neighborhood Evolving (T4 NE)</u> is intended to create and enhance urban residential neighborhoods that provide more housing choices, improved pedestrian, bicycle and vehicular connectivity, and moderate to high density development patterns with shallow setbacks and minimal spacing between buildings. T4 NE areas are served by high levels of connectivity with complete street networks, sidewalks, bikeways and existing or planned mass transit. T4 NE policy may be applied either to undeveloped or substantially under-developed "greenfield" areas or to developed areas where redevelopment and infill produce a different character that includes increased housing diversity and connectivity. Successful infill and redevelopment in existing neighborhoods needs to take into account considerations such as timing and some elements of the existing developed character, such as the street network and block structure and proximity to centers and corridors.

Highland Heights Study Supplemental Policy

The site is within the Highland Heights Study Supplemental Policy which was approved and adopted by the Planning Commission on June 14, 2018. The Highland Heights Study was completed after an extensive community engagement process and resulted in updates to the community character policies for the area, as well as establishment of a supplementary Building regulating plan. The T4 NE land use policy applicable to this site did not change with the adoption of the Highland Heights Small Area Plan.

This site is within the R5 sub-district of the Building Regulating Plan. The intent of the R5 subdistrict is to create and enhance neighborhoods to include greater housing choice, improved connectivity, and more creative, innovative, and environmentally sensitive development techniques that form a transition from Dickerson Pike's higher density mixed use. The R5 sub-district calls for improvements to existing street, sidewalk, bikeway, and stormwater infrastructure to T4 Urban Transect standards through new private sector development. The policy anticipates that an additional means of access, increased connectivity, and a more specific and certain built environment can improve the quality of life of neighborhood residents. The R5 sub-district supports duplexes, plex or manor house, courtyard flats, low-rise flats, mid-rise flats.

The Mobility Plan establishes a neighborhood-scale street hierarchy typology and cross sections, identifies new public street connections, and identifies new public alley infrastructure. The mobility plans calls for a local street connection between Dickerson Pike and Meridian Street.

ANALYSIS

Staff finds that the proposed RM15-A zoning district is not consistent with the policy at this location at this time. The mobility plan in the Highland Heights Study Supplemental Policy calls for the enhancement and creation of new streets and alleys. This infrastructure is necessary to support additional density within the policy area. The mobility plan calls for a new alley to be constructed behind the subject property and adjacent properties located between Luton Street and Meridian Street. Currently an alley does not exist nor does the right of way for an alley. Given the lack of an alley, additional density is not appropriate. The location of the site interior to the block also makes it inappropriate for rezoning at this time as it could limit the ability to get the infrastructure as outlined in the small area plan.

Marton *Disapprove*.

APPLICANT REQUEST Zone change from RS10 to R10.

Zone Change

A request to rezone from Single Family Residential (RS10) to One and Two-Family Residential (R10) zoning for property located at 4120 Buenaview Court, west of the terminus of Bobwhite Court (.41 acres).

Existing Zoning

<u>Single Family Residential - RS10</u> requires a minimum of 10,000 square foot lot and is intended for single-family dwellings at a density of 3.7 dwelling units per acre. *RS10 would permit a maximum of 1 unit*.

Proposed Zoning

<u>One and Two Family Residential - R10</u> requires a minimum 10,000 square foot lot and is intended for single -family dwellings and duplexes at an overall density of 4.63 dwelling units per acre including 25 percent duplex lots. *R10 would permit a maximum of 1 lots with 1 duplex lot for a total of 2 units. Codes makes the final determination of duplex eligibility.*

BORDEAUX – WHITES CREEK – HAYNES TRINITY COMMUNITY PLAN

<u>T3 Suburban Neighborhood Maintenance (T3 NM)</u> is intended to maintain the general character of developed suburban residential neighborhoods. T3 NM areas will experience some change over time, primarily when buildings are expanded or replaced. When this occurs, efforts should be made to retain the existing character of the neighborhood. T3 NM areas have an established development pattern consisting of low- to moderate-density residential development and institutional land uses. Enhancements may be made to improve pedestrian, bicycle, and vehicular connectivity.

<u>Conservation (CO)</u> is intended to preserve environmentally sensitive land features through protection and remediation. CO policy applies in all Transect Categories except T1 Natural, T5 Center, and T6 Downtown. CO policy identifies land with sensitive environmental features including, but not limited to, steep slopes, floodway/floodplains, rare or special plant or animal habitats, wetlands, and unstable or problem soils. The guidance for preserving or enhancing these features varies with what Transect they are in and whether or not they have already been disturbed.

ANALYSIS

The application consists of one parcel (Map 059-05, Parcel 150) totaling 0.41 acres in size located on the southern side of Buenaview Court. The property contains a single-family home built in 1971. Surrounding uses are single-family residential and all surrounding properties are zoned RS10. The properties on both sides of Buenaview Court and Buenaview Blvd are within T3 NM policy area.

The application proposes to rezone the property from RS10 to R10. The requested R10 zoning allows for single-family dwellings and duplexes. According to the Community Character Manual, T3 Suburban Neighborhood Maintenance is intended to maintain the general character of developed suburban residential neighborhoods. T3 NM areas allow for higher intensity residential buildings nearer to centers and corridors; however, this site is in the middle of the T3 NM policy area and the character of the neighborhood is not defined by a mixture of housing types. The location of this parcel is not in an area of transition and therefore introducing a higher intensity is not appropriate considering the surrounding uses and the goals of T3 NM policy. The existing zoning is appropriate and allows for development at a scale that fits with the current character of the neighborhood.

FIRE RECOMMENDATION Approve.

This item was deferred from the January 12, 2023, Planning Commission meeting. No public hearing was held.

Marton *Approve R10 with conditions.*

APPLICANT REQUEST Zone change from RS10 to R10.

Zone Change

A request to rezone from Single-Family Residential (RS10) to One and Two-Family Residential (R10) zoning for property located at 2619 Old Buena Vista Road, approximately 300 feet northwest of Day Street (.41 acres).

Existing Zoning

<u>Single Family Residential (RS10)</u> requires a minimum of 10,000 square foot lot and is intended for single-family dwellings at a density of 3.7 dwelling units per acre. *RS10 would permit a maximum of 1 unit*.

Proposed Zoning

<u>One and Two-Family Residential (R10)</u> requires a minimum 10,000 square foot lot and is intended for single -family dwellings and duplexes at an overall density of 4.63 dwelling units per acre including 25 percent duplex lots. *R10 would permit a maximum of 1 lot with 1 duplex lots for a total of 2 units. Metro Codes makes the final determination of duplex eligibility.*

BORDEAUX - WHITES CREEK - HAYNES TRINITY COMMUNITY PLAN

<u>T3 Suburban Neighborhood Maintenance (T3 NM)</u> is intended to preserve the general character of suburban neighborhoods as characterized by their development pattern, building form, land use and associated public realm. T3 NM areas will experience some change over time, primarily when buildings are expanded or replaced. When this occurs, efforts should be made to retain the existing character of the neighborhood, in terms of its development pattern, building form, land use, and the public realm. Where not present, enhancements may be made to improve pedestrian, bicycle and vehicular connectivity.

Haynes Trinity Supplemental Policy

The site is within the Haynes Trinity Supplemental Policy which was approved and adopted by the Planning Commission on January 11th, 2018. The mobility plan component of the Haynes Trinity Planning Study calls for a more connected street system to provide a strong and cohesive block structure. The Major Collector Street Plan has been updated because of the Haynes Trinity

Supplemental Policy and a planned Collector Avenue that would connect Old Buena Vista Rd and Buena Vista Pike is slated to run through the southern portion of the site.

ANALYSIS

The application consists of one parcel (Map 070-07, Parcel 001) totaling .41 acres in size located on the western side of Old Buena Vista Road. The property contains a single-family home built in 1954. Surrounding uses are residential and properties to the east and west are zoned RS10, and properties to the south were recently rezoned to RM20-A-NS.

The application proposes to rezone the property from RS10 to R10. The property is within the T3 Suburban Neighborhood Maintenance policy area. The CCM lists R10 zoning as an appropriate zoning under T3 NM policy. The proposed R10 district would allow single family and duplex dwellings next to an area that is in transition. The property's proximity to T4 RC and T4 NC Policy make the slight increase to One and Two-Family (R10) zoning more appropriate.

Staff would note that a rezone to this site should provide assurances for public infrastructure as specified in the Haynes Trinity Mobility Plan Supplemental Policy. A future collector street is planned to extend through the rear corner of the property, therefore staff's consideration for a rezone at this site is contingent on the condition to dedicate right-of-way for the future collector street.

FIRE RECOMMENDATION Approve.

Staff Reviewer Staff Recommendation	Swaggart Approve.

APPLICANT REQUEST Zone change from CL to CL-NS.

Zone Change

A request to rezone from Commercial Limited (CL) to Commercial Limited-No Short-Term Rentals (CL-NS) zoning for properties located at 2425 and 2427 Brick Church Pike, at the southeast corner of Dennis Drive and Brooklyn Avenue (6.09 acres).

Existing Zoning

<u>Commercial Limited (CL)</u> is intended for retail, consumer service, financial, restaurant, and office uses.

Proposed Zoning

<u>Commercial Limited-No Short-Term Rentals (CL-NS)</u> is intended for retail, consumer service, financial, restaurant, and office uses. Owner occupied and not-owner-occupied short-term rentals would be prohibited uses.

BORDEAUX - WHITES CREEK - HAYNES TRINITY COMMUNITY PLAN

<u>Conservation (CO)</u> is intended to preserve environmentally sensitive land features through protection and remediation. CO policy applies in all Transect Categories except T1 Natural, T5 Center, and T6 Downtown. CO policy identifies land with sensitive environmental features including, but not limited to, steep slopes, floodway/floodplains, rare or special plant or animal habitats, wetlands, and unstable or problem soils. The guidance for preserving or enhancing these features varies with what Transect they are in and whether or not they have already been disturbed.

<u>D Industrial (D IN)</u> is intended to maintain, enhance, and create industrial districts in appropriate locations. The policy creates and enhances areas that are dominated by one or more industrial activities, so that they are strategically located and thoughtfully designed to serve the overall community or region, but not at the expense of the immediate neighbors. Types of uses in D IN areas include non-hazardous manufacturing, distribution centers and mixed business parks containing compatible industrial and non-industrial uses. Uses that support the main activity and contribute to the vitality of the D IN are also found.

<u>T4 Urban Community Center (T4 CC)</u> is intended to maintain, enhance and create urban community centers that contain commercial, mixed use, and institutional land uses, with residential land uses in mixed use buildings or serving as a transition to adjoining Community Character Policies. T4 Urban Community Centers serve urban communities generally within a 5-minute drive or a 5 to 10 minute walk. T4 CC areas are pedestrian friendly areas, generally located at intersections of prominent urban streets. Infrastructure and transportation networks may be enhanced to improve pedestrian, bicycle, and vehicular connectivity.

ANALYSIS

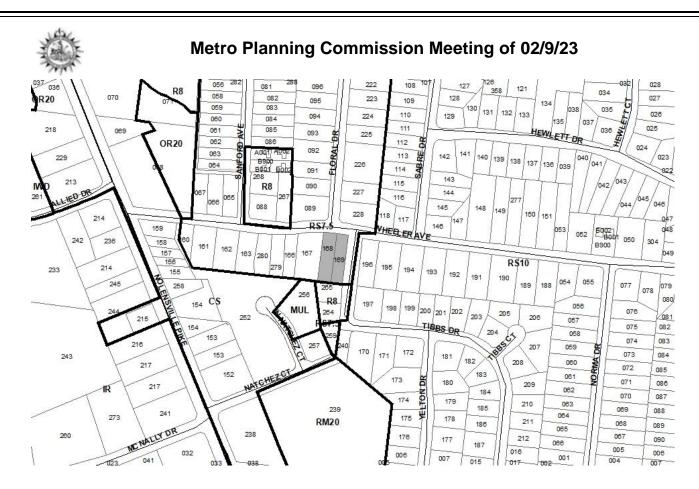

With the exception of owner occupied and not-owner-occupied short-term rentals all uses permitted in the existing CL zoning district are permitted in the proposed CL-NS zoning district. All development standards, including, but not limited to, bulk, parking, landscaping and signage are shared between the two districts. Since the only difference between the two zoning districts is that the proposed district does not permit any form of short-term rentals, staff has no issues with the proposed CL-NS zoning district.

STAFF RECOMMENDATION

Staff recommends approval.

APPLICANT REQUEST Zone change from RS7.5 to R8.

Zone Change

A request to rezone from Single Family Residential (RS7.5) to One and Two-Family Residential (R8) zoning for properties located at 232 and 233 Wheeler Avenue, at the western corner of Wheeler Avenue and Tibbs Drive (0.55 acres).

Existing Zoning

<u>Single-Family Residential (RS7.5)</u> requires a minimum 7,500 square foot lot and is intended for single-family dwellings at a density of 4.94 dwelling units per acre. RS7.5 would permit a maximum of 1 unit per each existing lot

Proposed Zoning

<u>One and Two-Family Residential (R8)</u> requires a minimum 8,000 square foot lot and is intended for single-family dwellings and duplexes at an overall density of 5.79 dwelling units per acre including 25 percent duplex lots. R8 would permit a maximum of 1 duplex per each existing lot for a total of 4 units. Duplex eligibility is made by the Codes Department.

SOUTH NASHVILLE COMMUNITY PLAN

<u>T3 Suburban Neighborhood Maintenance (T3 NM)</u> is intended to maintain the general character of developed suburban residential neighborhoods. T3 NM areas will experience some change over time, primarily when buildings are expanded or replaced. When this occurs, efforts should be made to retain the existing character of the neighborhood. T3 NM areas have an established development pattern consisting of low- to moderate-density residential development and institutional land uses. Enhancements may be made to improve pedestrian, bicycle, and vehicular connectivity.

SITE AND CONTEXT

The 0.55-acre site is located at the western corner of Wheeler Avenue and Tibbs Drive, approximately 800 feet east of Nolensville Pike. Both 232 and 233 Wheeler Avenue are occupied by single-family houses built in 1945. Surrounding uses are residential to the north (RS7.5), west (RS7.5 and R8), east (RS10), and south (R8).

ANALYSIS

The Community Character Manual lists R8 zoning as a potentially appropriate zoning category under T3 NM policy. There is precedent for this zone in the local policy context: 2 four-family quadplexes abut the site to the south along Tibbs Drive, and two-family houses are located

approximately 325 feet west at the corner of Wheeler Avenue and Sanford Avenue. This request aligns with the existing pattern of two-family houses at or near intersections in the Neighborhood Maintenance policy area. Therefore staff recommends Planning Commission approve the request for R8.

APPLICANT REQUEST Zone change from RS5 to R6.

Zone Change

A request to rezone from Single-Family Residential (RS5) to One and Two-Family Residential (R6) zoning for property located at 1210 Katie Ave approximately 260 feet north of Fern Avenue (.17 Acres).

Existing Zoning

<u>Single Family Residential (RS5)</u> requires a minimum 5,000 square foot lot and is intended for single-family dwellings at a density of 7.41 dwelling units per acre. *RS5 would permit a maximum of 1 unit*.

Proposed Zoning

<u>One and Two-Family Residential (R6)</u> requires a minimum 6,000 square foot lot and is intended for single-family dwellings and duplexes at an overall density of 7.71 dwelling units per acre including 25 percent duplex lots. *R6 would permit a maximum of 1 lot with 1 duplex lots for a total of 2 units. Final determination for duplex eligibility is made by Codes.*

BORDEAUX - WHITES CREEK - HAYNES TRINITY COMMUNITY PLAN

<u>T4 Urban Mixed Use Neighborhood (T4 MU)</u> is intended to maintain, enhance, and create urban, mixed use neighborhoods with a development pattern that contains a variety of housing along with mixed use, commercial, institutional, and even light industrial development. T4 MU areas are served by high levels of connectivity with complete street networks, sidewalks, bikeways, and existing or planned mass transit.

Haynes Trinity Supplemental Policy

The site is within the Haynes Trinity Supplemental Policy which was approved and adopted by the Planning Commission on January 11th, 2018. The mobility plan component of the Haynes Trinity Planning Study calls for a more connected street system to provide a strong and cohesive block structure.

ANALYSIS

The application consists of one parcel (Map 071-10, Parcel 112) totaling .17 acres located on the western side of Katie Avenue. The property contains a single-family home built in 1948. Surrounding uses are residential and zoned RS5 and R6.

The application proposes to rezone the property from RS5 to R6. The property is within the T4 Urban Mixed Use Neighborhood policy area. The CCM lists R6 as an appropriate zoning district under T4 MU policy. T4 MU policy intends to maintain, enhance, and create urban mixed use neighborhoods. The proposed R6 district would allow up to 2 units on the property, a slight increase in intensity from the existing zoning. Nearby lots to the west and south of the subject property have been rezoned to R6 as recently as 2020. Overall, the rezoning supports T4 MU Policy and the goals of NashvilleNext to promote a mixture of housing types.

FIRE RECOMMENDATION Approve.

APPLICANT REQUEST Zone change from RS5 to R6-A.

Zone Change

A request to rezone from Single-Family Residential (RS5) to One and Two-Family Residential-Alternative (R6-A) zoning for property located at 913 33rd Avenue North, approximately 200 feet south of Clare Avenue (0.14 acres).

Existing Zoning

<u>Single-Family Residential (RS5)</u> requires a minimum 5,000 square foot lot and is intended for single-family dwellings at a density of 7.41 dwelling units per acre. RS5 would permit a maximum of 1 unit.

Proposed Zoning

<u>One and Two Family Residential -Alternative (R6-A)</u> requires a minimum 6,000 square foot lot and is intended for single-family dwellings and duplexes at an overall density of 7.71 dwelling units per acre, including 25 percent duplex lots, and is designed to create walkable neighborhoods through the use of appropriate building placement and bulk standards. R6-A would permit a maximum of 1 lots with 1 duplex lots for a total of 2 units. Codes makes final determination on duplex eligibility.

NORTH NASHVILLE COMMUNITY PLAN

<u>T4 Urban Neighborhood Maintenance (T4 NM)</u> is intended to maintain the general character of existing urban residential neighborhoods. T4 NM areas will experience some change over time, primarily when buildings are expanded or replaced. When this occurs, efforts should be made to retain the existing character of the neighborhood. T4 NM areas are served by high levels of connectivity with complete street networks, sidewalks, bikeways and existing or planned mass transit. Enhancements may be made to improve pedestrian, bicycle and vehicular connectivity.

SITE AND CONTEXT

The 0.14 acre site is located on the south side of 33^{rd} Avenue North approximately 200 feet south of Clare Avenue. The site is vacant with no structures. Properties abutting or adjacent to the north, south, east and west are all zoned RS5. The property abutting the northern property line is vacant. The property along the southern property line is occupied by a single-family house. The properties abutting the western property line (across an alley) are occupied by single-family houses. The property directly across the street of 33^{rd} Avenue North is occupied by a three-family house (adjacent to another three-family house, itself).

ANALYSIS

The existing pattern of development on this block is a mixture of 1-3 unit houses. The Community Character Manual lists R6-A as a potentially appropriate zone tool for T4 NM. In this context, the requested R6-A zone would continue the existing pattern of development and maintain the urban neighborhood character. Therefore staff recommends approval of the request.

FIRE MARSHAL RECOMMENDATION Approve

Item #34 Council District School District Requested by

Staff Reviewer Staff Recommendation

Zone Change 2023Z-017PR-001

25 – Pulley 08 – O'Hara Block Sett Studio LLC, applicant; Abbott Land 3600 LLC, owner.

Shane *Defer to the February 23, 2023, Planning Commission meeting.*

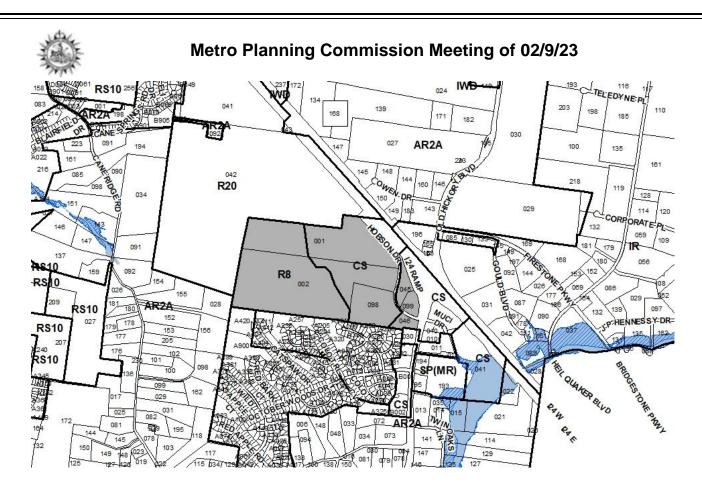

APPLICANT REQUEST Zone change from R20 to R10.

Zone Change

A request to rezone from One and Two-Family Residential (R20) to One and Two-Family Residential (R10) zoning for properties located at 3600 Abbott Martin Road, approximately 100 feet south of Burlington Place (4.29 acres).

STAFF RECOMMENDATION

Staff recommends deferral to the February 23, 2023, Planning Commission meeting.

Item #35	Planned Unit Development 188-84P-005
Project Name	I-24 Limited Section of Century South PUD
,	(Revision)
Council District	33 - Lee
School District	06 - Bush
Requested by	Gresham Smith, applicant; Century South Associates,
	LLC, Nishith Jobalia & Nayan Patel, owners.
Deferrals	This item was deferred at the January 12, 2023, Planning Commission meeting. No public hearing was held.
Staff Reviewer	Elliott
Staff Recommendation	Approve with conditions.

APPLICANT REQUEST Revise preliminary plan for a portion of a Planned Unit Development.

Revise Preliminary PUD

A request to revise a portion of a Planned Unit Development for properties located at Hobson Drive (unnumbered), approximately 200 feet west of Muci Drive (140.7 acres), zoned Commercial Service (CS) and One and Two-Family Residential (R8), to permit 460 residential units and 315,100 square feet of nonresidential uses.

Existing Zoning

<u>Commercial Service (CS)</u> is intended for retail, consumer service, financial, restaurant, office, self-storage, light manufacturing and small warehouse uses.

<u>One and Two-Family Residential (R8)</u> requires a minimum 8,000 square foot lot and is intended for single-family dwellings and duplexes at an overall density of 5.79 dwelling units per acre including 25 percent duplex lots.

<u>Planned Unit Development Overlay District (PUD)</u> is an alternative zoning process that allows for the development of land in a well-planned and coordinated manner, providing opportunities for more efficient utilization of land than would otherwise be permitted by the conventional zoning provisions of this title. The PUD district may permit a greater mixing of land uses not easily accomplished by the application of conventional zoning district boundaries, or a framework for coordinating the development of land with the provision of an adequate roadway system or essential utilities and services. In return, the PUD district provisions require a high standard for the protection and preservation of environmentally sensitive lands, well-planned living, working, and shopping environments, and an assurance of adequate and timely provision of essential utilities and streets.

APPROVED PLAN

The subject section of the PUD, referred to as Phase 3, is approximately 141 acres and is currently approved for 359,000 square feet of non-residential land uses and 460 multi-family residential units. The approved plan includes a public street that intersects Old Hickory Boulevard and extends north

Proposed Site Plan

and parallel to I-24 and ultimately connects through other portions of the Century South PUD and up to Old Franklin Road. The approved plan also includes a new public street that extends to the west and makes a connection with the adjacent phase to the west and to the north. Otherwise, the plan includes private drives and surface parking that draw access from these two public roads. The non-residential land uses are located near Old Hickory Boulevard and the residential land uses are more interior to the site.

REQUEST DETAILS

This is a request to revise the preliminary PUD for Phase 3 of the Century South PUD. The application proposes to modify the site plan layout of the non-residential and multi-family residential land uses as well as the public street locations. The plan retains the same street connections currently approved and makes minor adjustments to the street layout. The application does not propose to modify the unit counts of any land uses. The application does not require concurrence by the Metro Council and the Planning Commission is the final reviewing authority for this application.

PLAN DETAILS

The proposed plan modifies the site plan to adjust the layout and building forms for this approximately 141-acre section of the Century South PUD. The plan proposes to maintain the two public streets and the associated connection points that are included in the currently approved plan. The proposed plan includes four development phases and the first phase includes the entirety of the public street connection from Old Hickory Boulevard to the north property boundary, setting up for the future extension of this roadway ultimately to Old Franklin Road.

The four phases of development for this portion of the PUD are referred to as 3A, 3B, 3C, and 3D. A fifth phase, 3E, is identified, however no development is proposed and this portion of the property is left as natural open space.

Phase 3A

Phase 3A includes the public street stemming from Old Hickory Boulevard and running parallel to I-24 as well as a first portion of the public street that extends west. The land use of this phase is limited to 300 multi-family residential units with surface vehicle parking.

Phase 3B

Phase 3B includes the remainder of the public street infrastructure associated with this PUD and completes the public street network provided with Phase 3 of the Century South PUD. The land use of this phase is limited to 160 townhome units. The townhomes are permitted to be a maximum of 4 floors in 50' and include garage parking in combination with driveway parking.

Phase 3C

Phase 3C is the portion of property between I-24 and the new public street that runs parallel, and the site plan shows the retail land uses to be located in this phase. The plan provides large retail buildings to the rear, surface parking in front of these large buildings, and some smaller out-parcel type buildings that front onto the new public street.

A cemetery is known to exist in this area and the plans show the anticipated boundary of the cemetery for buffering purposes. This is shown on the site plan and this feature would be preserved with the development of the site as required by Tennessee state law. Staff is requesting that a Ground Penetrating Radar survey be conducted and the findings submitted with the first final site plan application within Phase 3 considering the proximity of the public street to this cemetery area. Additionally, staff is requesting a public access easement be provided to allow access to the cemetery once the property is developed.

Phase 3D

Phase 3D is the final development phase proposed with this application and is the property adjacent to Old Hickory Boulevard. A mixture of land uses are proposed including hotel, restaurant, fast-food, office, and retail. The 100-foot building setback along the southern property line is being maintained from the currently approved plan and a cross section included in the plans shows how these subdivision to the south will be buffered from this area.

ANALYSIS

Section 17.40.120.F. permits the Planning Commission to approve "minor modifications" under certain conditions.

F. Changes to a Planned Unit Development District.

1. Modification of Master Development Plan. Applications to modify a master development plan in whole or in part shall be filed with and considered by the planning commission according to the provisions of subsection A of this section. If approved by the commission, the following types of changes shall require concurrence by the metropolitan council in the manner described:

- a. Land area being added or removed from the planned unit development district shall be approved by the council according to the provisions of Article III of this chapter (Amendments);
- b. Modification of special performance criteria, design standards, or other requirements specified by the enacting ordinance shall be authorized by council ordinance;
- c. A change in land use or development type beyond that permitted by the specific underlying zoning district shall be authorized only by council ordinance; or
- d. An increase in the total number of residential dwelling units above the number last authorized by council ordinance or, for a PUD district enacted by council ordinance after September 1, 2006, an increase in the total number of residential dwelling units above the number last authorized by council ordinance or above the number last authorized by the most recent modification or revision by the planning commission; or
- e. When a change in the underlying zoning district is associated with a change in the master development plan, council shall concur with the modified master development plan by ordinance.
- f. Any modification to a master development plan for a planned unit development or portion thereof that meets the criteria for inactivity of Section 17.40.120.H.4.a.

The proposed plan does not meet any of the criteria above for requiring concurrence by the Metropolitan Council. The application proposes to modify the site plan layout and building forms of the approved preliminary plan and is consistent with the concept of the council approved plan.

FIRE MARSHAL RECOMMENDATION

Approve

• Second point of access is required for any multi-family development of 200 units or more. Maximum grade for fire apparatus access routes/ roads shall not exceed 10%.

METRO HISTORIC ZONING STAFF

Due to concerns about unmarked burials of the Pasquiet Cemetery, particularly in overgrown areas near the edges of what MHC staff was able to survey and map in August 2022, MHC recommends GPR to confirm the boundaries of the cemetery and proceeding with caution when conducting any site preparation activity near the cemetery. Additional recommendations to support the preservation and protection of the cemetery include: 1) Construction fence at the 10 ft buffer line (or greater) during construction to be replaced by a permanent fence during or after construction; 2) A metal sign, not to exceed 6 square feet, noting the name and date of the cemetery at the cemetery entrance; and 3) A 5' wide public access easement (can consult with MHC on location).

STORMWATER RECOMMENDATION

Approve with conditions

• Must comply with all regulations in the Stormwater Management Manual at the time of final submittal.

WATER SERVICES RECOMMENDATION

Approve with conditions

• Approved as a Preliminary PUD only. Public and/or private Water and Sanitary Sewer construction plans must be submitted and approved prior to Final Site Plan/SP approval. The approved construction plans must match the Final Site Plan/SP plans. The required capacity fees must also be paid prior to Final PUD approval, a minimum of 30% of capacity & 100% of DAPARC fees must be paid in order to receive approval. (See Capacity fee Permit #'s T2022042001 & T2022042006).

NDOT RECOMMENDATION

Approve with conditions

• With final: Include proposed public roadway construction drawings (profiles, grades, drainage). Roadway construction drawings shall comply with NDOT Subdivision Street Design Standards. Callout roadway sections, (access and ADA) ramps, sidewalks, curb & gutter, etc. per NDOT detail standards. Provide detail section with plan set. Show 'Now Entering Private Drive' signage where applicable off public roads. Provide internal stop control at intersections. Provide stopping sight distance exhibits at any relevant intersections and accesses off public roads. Note: A private hauler will be required for waste/recycle disposal. Comply w/ NDOT traffic comments and phase conditions of the PUD. New North-South collector road section: Prior to final PUD submittal, coordinate with NDOT on final North-South collector roadway section.

TRAFFIC AND PARKING RECOMMENDATION

Approve with conditions

• Due to the absence of an explicit phasing plan associated with the overall PUD, the sequence of off-site improvements shall be determined upon approval of finalized PUD

plans. Shared responsibility of each improvement's implementation shall also be agreed upon by land owners within the PUD prior to final plan approval.

- The nomenclature for each section of the overall PUD shall be as follows; (the Northern portion [Phase 1A & 1B], the Middle portion [Phase 2A, 2B, 2C, & 2D], and the Southern portion [3A, 3B, 3C, & 3D].
- The following improvements shall be completed:

a. Old Hickory Boulevard and Firestone Parkway: The northbound approach of Old Hickory Boulevard shall be widened to convert the existing northbound right turn lane into a through lane, and a northbound right turn lane with at least 100 feet of storage. The additional northbound receiving lane shall be constructed in coordination with this improvement and shall extend 175 feet north of Firestone Parkway. Westbound dual left turn lanes shall be striped in at the intersection. b. Old Hickory Boulevard and I-24 Westbound Ramps: Old Hickory Blvd shall be modified at the I-24 WB Ramps to accommodate a SB right turn lane utilizing the existing shoulder. The right turn lane shall have at least 150 feet of storage. Old Hickory Boulevard over I-24 shall be widened to include a secondary northbound left turn with at least 130 feet of storage. The I-24 WB On-Ramp shall be widened to provide a second receiving lane that extends 225 feet west of Old Hickory Boulevard and shall be associated with the construction of the northbound dual left turn lanes. The I-24 WB Off-Ramp shall be widened at Old Hickory Boulevard to include a secondary left turn lane with at least 150 feet of storage.

c. Old Hickory Boulevard and I-24 Eastbound Ramps: Old Hickory Boulevard over I-24 shall be widened to include a secondary southbound left turn with at least 130 feet of storage. The I-24 EB On-Ramp shall be widened to provide a second receiving lane that extends 225 feet east of Old Hickory Boulevard and shall be associated with the construction of the southbound dual left turn lanes. Old Hickory Boulevard shall be widened at the I-24 EB Ramps to include a northbound right turn lane with at least 150 feet of storage.

d. Old Hickory Boulevard and the Proposed Access Drive/Muci Drive: Old Hickory Boulevard at the proposed access shall be widened to include an additional southbound through lane, a southbound right turn lane with at least 150 feet of storage, and a southbound left turn lane with at least 100 feet of storage. A signal shall be installed at the intersection of Old Hickory Boulevard and the proposed access. Old Hickory Boulevard shall be widened at the proposed access to include a northbound left turn lane with at least 150 feet of storage. The site access along Hobson Drive shall be constructed with one entering and three exiting lanes. The secondary left turn lane shall be hatched until the intersection is signalized. The left turn lanes shall include at least 350 feet of storage. Old Hickory Boulevard shall be widened to include a second southbound through lane that ties into the existing left turn lane at the intersection with October Woods Drive. This improvement shall be associated with the construction of the secondary southbound through lane at the intersection of Old Hickory Boulevard and the proposed site access. Northbound Old Hickory Boulevard shall be striped to include a northbound left turn lane into Gilroy Church of Christ and shall be associated with the construction of the northbound left turn lane at the proposed access.

e. Old Franklin Road and Proposed Access Drive: A traffic signal shall be installed at the intersection of Old Franklin Road and the Proposed Access Drive, including pedestrian improvements.

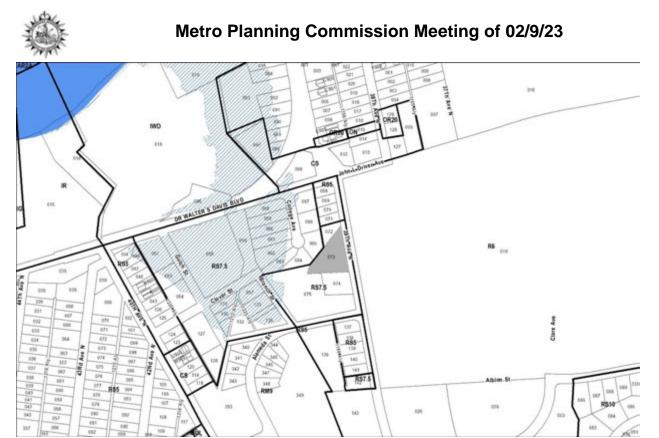

- Without a full north-south roadway connection from Old Franklin Road to Old Hickory Boulevard through the PUD, full build-out of this portion of the PUD may not be permitted. A traffic access study may be required with each Final PUD.
- A traffic study to assess off-site intersections may be required prior to a Final PUD approval.
- Minor modifications may be made by NDOT to the required conditions of approval based on the findings and recommendations of future supplemental analyses related to this PUD.
- Phase 2A-2D (Barge Design) of the PUD will be conditioned to install a signal at the intersection of Old Franklin Road prior to full buildout of the development. It should be noted that an analysis for the signal should be completed at the end of Phase 2A, 2B, & 2C, to determine when it shall be constructed. The full connection to Old Hickory Boulevard will be required before full buildout of Phase 2 in order to accommodate this developments full density.
- At the time a connection is made to Old Hickory Boulevard, additional analysis shall be made to identify how the conditioned improvements (iii. [a] iii. [d]) must be prioritized.

STAFF RECOMMENDATION

Staff recommends approval with conditions.

CONDITIONS

- 1. A Ground Penetrating Radar survey shall be submitted with the first final site plan application for Phase 3 of the Century South PUD to identify and buffer the boundary of the known cemetery in Phase 3C.
- 2. A public access easement shall be provided in Phase 3C prior to the approval of the associated final site plan application.
- 3. This approval does not include any signs. Signs in planned unit developments must be approved by the Metro Department of Codes Administration except in specific instances when the Metro Council directs the Metro Planning Commission to review such signs.
- 4. The requirements of the Metro Fire Marshal's Office for emergency vehicle access and adequate water supply for fire protection must be met prior to the issuance of any building permits.
- 5. If the PUD final site plan or final plat indicates that there is less acreage than what is shown on the approved preliminary plan, the final site plan shall be appropriately adjusted to show the actual total acreage, which may require that the total number of dwelling units or total floor area be reduced.
- 6. Prior to or with any additional development applications for this property, the applicant shall provide the Planning Department with a corrected copy of the preliminary PUD plan.

2021S-183-001 RESUBDIVISION OF PART OF LOT 40 PLAN OF CLIFTON Map 091-04, Parcel(s) 073 08, North Nashville 21 (Brandon Taylor)

Item #36	Final Plat 2021S-183-001
Project Name	Resubdivision of Part of Lot 40 Plan of Clifton
Council District	21 – Taylor
School District	01 – Gentry
Requested by	Dale and Associates, applicant; 39 th Avenue Partners LLC, owner.
Deferral	This item was deferred at the January 12, 2023, Planning Commission meeting. No public hearing was held.
Staff Reviewer	Shane
Staff Recommendation	Approve with conditions.

APPLICANT REQUEST Final plat to create three single-family residential lots.

<u>Final Plat</u>

A request for final plat approval to create three lots on property located at 39th Avenue North (unnumbered), approximately 230 feet south of John L. Driver Avenue, zoned Single-Family Residential (RS7.5) (0.69 acres).

SITE DATA AND CONTEXT

Location: 230 feet south of John L. Driver Avenue on the west side of 39th Avenue North.

Street Type: The site has frontage along 39th Avenue North. The street is classified as a local street.

Approximate Acreage: 0.69 acres or 30,056.4 square feet.

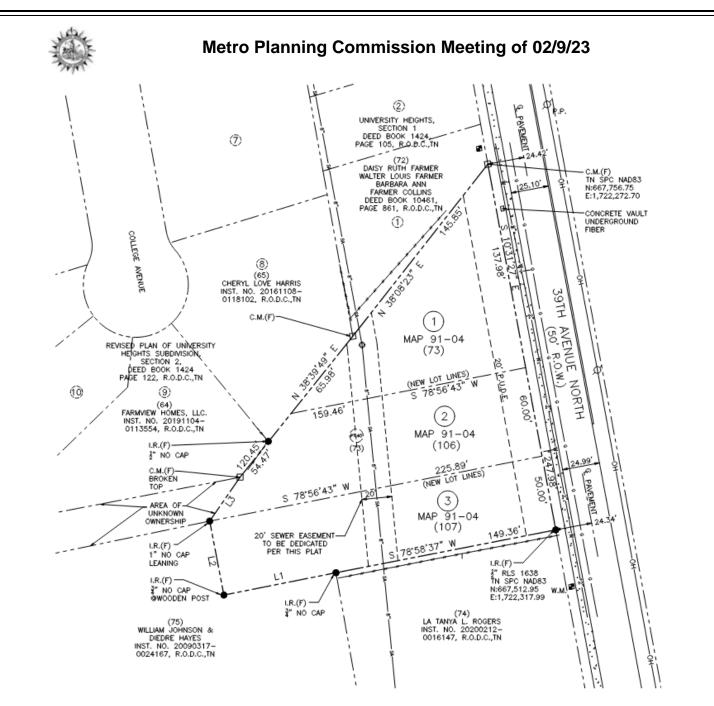

Parcel/Site History: The property (Tax Map 091-04, Parcel 073) is comprised of a portion of Lot 40 on the Plan of Clifton, as of record in book 21, page 35, recorded in 1858.

Zoning History: The zoning is RS7.5. The RS7.5 zoning district was established in 2006. Prior to the RS7.5 zoning, the parcel was zoned R6.

Existing land use and configuration: One parcel consisting of vacant residential land.

Surrounding land use and zoning:

North: Single-Family Residential (RS7.5) South: Single-Family Residential (RS7.5) East: Institutional (R6) West: Single-Family Residential (RS7.5)

Proposed Plat

Zoning: Single-Family Residential (RS7.5) Min. lot size: 7,500 square feet Max. height: 3 stories Min. street setback: 40' Min. rear setback for all properties: 20' Min. side setback for all properties: 5' Maximum Building Coverage: 0.45

PROPOSAL DETAILS Number of lots: Three (3)

Lot sizes: Lot 1: 10,956.67 sq. ft. Lot 2: 11,626.97 sq. ft. Lot 3: 11,284.31 sq. ft.

Access: All lots have direct access to 39th Avenue North.

Subdivision Variances or Exceptions Requested: None.

APPLICABLE SUBDIVISION REGULATIONS

Volume III of NashvilleNext, the General Plan for Nashville and Davidson County, contains the Community Character Manual (CCM) which establishes land use policies for all properties across the county. The land use policies established in CCM are based on a planning tool called the Transect, which describes a range of development patterns from most to least developed.

Prior versions of Subdivision Regulations for Nashville and Davidson County contained a uniform set of standards that were applied Metro-wide. This did not take into account the diverse character that exists across the County. In order to achieve harmonious development within the diversity of development patterns that exist in Nashville and Davidson County, the Planning Commission has adopted the current Subdivision Regulations. The Subdivision Regulations incorporate the General Plan policies by including rules or standards for each specific transect. This allows policies of the General Plan to be followed through application of the varying Subdivision Regulations to reflect the unique characteristics found in the different transects. The site is within the T3 Suburban Neighborhood Maintenance (T3 NM) policy. For sites within the T3 transect, the conventional regulations found in Chapter 3 are utilized.

3-1 General Requirements

This subdivision is required to meet the standards of Chapter 3. Staff finds that all general requirements are met.

3-2 Monument Requirements

Permanent monuments, in accordance with this section of the regulations, shall be placed in all subdivisions when new streets are to be constructed.

3-3 Suitability of the Land

Not applicable to this case. Based on available data, this site does not contain FEMA floodway or floodplain, steep slopes as identified on Metro's topographical maps, rock formations, problem soils, sinkholes, other adverse earth formations or topography, utility easements, or other features which may be harmful to the safety, health, and general welfare of the inhabitants of the land and surrounding areas.

3-4 Lot Requirements

All proposed lots comply with the minimum lot size of the RS7.5 zoning district. Any development proposed on the resulting lots will be required to meet the bulk standards and all other applicable regulations of RS7.5 zoning at the time of building permit.

3-5 Infill Subdivisions

In order to ensure compatibility with the General Plan, the Commission has adopted specific regulations applicable to infill subdivisions, defined as residential lots resulting from a proposed subdivision within the R, R-A, RS, and RS-A zoning districts on an existing street. If a proposed infill subdivision meets all of the adopted applicable regulations, then the subdivision is found to be harmonious and compatible with the goals of the General Plan. An exception to the compatibility criteria may be granted by the Planning Commission for a SP, UDO or cluster lot subdivision by approval of the rezoning or concept plan.

3-5.2 Criteria for Determining Compatibility for policy areas designated in the General Plan as Neighborhood Maintenance, except where a Special Policy and/or a Designated Historic District exists. The following criteria shall be met to determine compatibility of proposed infill lots to surrounding parcels.

- *a. All minimum standards of the zoning code are met.* All proposed lots meet the minimum standards of the zoning code.
- b. Each lot has street frontage or meets the requirements of Section 3-4.2.b for fronting onto an open space or meets the requirements of Sections 4-6.3 or 5-3.1 fronting onto an open space.

All lots have frontage along 39th Avenue North.

- c. The resulting density of lots does not exceed the prescribed densities of the policies for the area. To calculate density, the lot(s) proposed to be subdivided and the surrounding parcels shall be used. For a corner lot, both block faces shall be used. The T3 NM policy that applies to this site does not specifically identify an appropriate density; however, the policy supports the underlying RS7.5 zoning district and its prescribed density.
- *d. The proposed lots are consistent with the community character of surrounding parcels as determined below:*
 - 1. Lot frontage is either equal to or greater than 70% of the average frontage of surrounding parcels or equal to or greater than the surrounding lot with the least amount of frontage, whichever is greater. For a corner lot, only the block face to which the proposed lots are to be oriented shall be used.

All lots meet the minimum lot frontage requirement. The minimum frontage width requirement per this section is 39.66 feet. The frontage width for Lot 1 is 137.98 feet; the frontage width for Lot 2 is 60 feet; and the frontage width for Lot 3 is 50 feet.

2. Lot size is either equal to or greater than 70% of the lot size of the average size of surrounding parcels or equal to or larger than smallest surrounding lot, whichever is greater. For a corner lot, only the block face to which the proposed lots are to be oriented shall be used.

All lots meet the minimum lot size requirement. The minimum lot size

requirement per this section is approximately 0.14 acres, or 6,098.40 square feet. Lot 1 is approximately 0.25 acres (10,956.67 square feet); Lot 2 is 0.27 acres (11,626.97 square feet); and Lot 3 is 0.26 acres (11,284.31 square feet).

- 3. Where the minimum required street setback is less than the average of the street setback of the two parcels abutting either side of the lot proposed to be subdivided, a minimum building setback line shall be included on the proposed lots at the average setback. When one of the abutting parcels is vacant, the next developed parcel shall be used. For a corner lot, both block faces shall be used. New homes will be required to meet the contextual setback standards per the Metro Zoning Code.
- 4. Orientation of proposed lots shall be consistent with the surrounding parcels. For a corner lot, both block faces shall be evaluated.
 The orientation of the proposed lots is consistent with the surrounding parcels along 39th Avenue North.
- *e. The current standards of all reviewing agencies are met.* All agencies have recommended approval or approval with conditions.

The proposed subdivision meets all requirements of subsections a, b, c, d and e and is therefore found to be harmonious and compatible with the goals of the General Plan. Subsection f of this section of the Subdivision Regulations applies only in instances where a subdivision fails to meet subsection d and is therefore not applicable to this case.

3-5.5 Infill Subdivision Frontage Not applicable to this case.

3-5.6 Reasonable Conditions

Staff is not proposing any special conditions.

3-6 Blocks

Not applicable to this case. This proposal is for an infill subdivision. No new blocks are being created.

3-7 Improvements

Construction plans for any required private improvements (private stormwater, water and sewer lines and connections) will be reviewed at the time of building permit.

3-8 Requirements for Sidewalks and Related Pedestrian and Bicycle Facilities

Not applicable to this case. Sidewalks are required only in association with new streets. The proposed subdivision is located on an existing street. Sidewalk requirements will be reviewed at the time of building permit, pursuant to Section 17.20.120 of the Zoning Code.

3-9 Requirements for Streets

Not applicable to this case. The proposal is for an infill subdivision located on an existing street. No new streets are proposed.

3-10 Requirements for Dedication, Reservations, or Improvements

39th Avenue North is classified as a local street. No dedications, reservations, or improvements are required.

3-11 Inspections During Construction

Construction plans for any required private improvements (private stormwater, water and sewer lines and connections) will be reviewed at the time of building permit.

3-12 Street Name, Regulatory and Warning Signs for Public Streets Not applicable to this case. No new streets are proposed.

3-13 Street Names, Regulatory and Warning Signs for Private Streets Not applicable to this case. No new streets are proposed.

3-14 Drainage and Storm Sewers

Drainage and storm sewer requirements are reviewed by Metro Stormwater. Metro Stormwater has reviewed the proposed plat and found it to comply with all applicable standards of this section. Stormwater recommends approval.

3-15 Public Water Facilities

Public Water is provided to this site by Metro Water Services. Water Services has reviewed this plat and has recommended approval.

3-16 Sewerage Facilities

Public sewer is available to this site from Metro Water Services. Water Services has reviewed the plat and found it to be in compliance with all requirements of this section.

3-17 Underground Utilities

Not applicable to this case. Utilities in subdivisions are required to be located underground whenever a new street is proposed. No new streets are proposed.

PLANNING STAFF COMMENTS

The proposed subdivision meets the standards of the Metro Subdivision Regulations. Future development will be required to meet the standards of the Metro Zoning Code in regards to setbacks, sidewalks, etc. Staff recommends approval with conditions.

POLICY CONSIDERATIONS

A recent appeals court decision (Hudson et al v. Metro) upheld a lower court decision which outlined that the Planning Commission has the authority to determine whether a concept plan complies with the adopted General Plan (NashvilleNext). Per the Court, the Planning Commission may not evaluate each concept plan to determine whether it is harmonious generally but may consider policy. Policy information is provided below for consideration.

The Community Character Manual (CCM) policy applied to the site is Suburban Neighborhood Maintenance (T3 NM). T3 areas are predominately residential areas with neighborhoods featuring shallow and consistent setbacks and closer building spacing. T3 NM areas within the suburban

transect are intended to maintain the general character of suburban areas while providing enhanced housing choice and connectivity.

Moderate levels of connectivity with street networks and sidewalks are a key feature of T3 NM areas. Lot sizes within the broader policy can vary and zoning districts ranging from RS40 to RS7.5 are supported depending on context.

COMMENTS FROM OTHER REVIEWING AGENCIES

FIRE MARSHAL RECOMMENDATION Approve

STORMWATER RECOMMENDATION Approve

NASHVILLE DOT RECOMMENDATION

Approve with conditions

• New driveway connections or access points will require a permit from the Public Works Department. Adequate sight distance must be provided per AASHTO for new driveway connections.

TRAFFIC AND PARKING RECOMMENDATION Approve

WATER SERVICES RECOMMENDATION

Approve with conditions

• Attached is a copy of the above-referenced subdivision (uploaded by Planning on November 29, 2022) on which we have noted our comments and recommend approval. Approval is contingent on construction and completion of MWS Project #'s 22WL0008. A bond amount of \$111,000.00 is assigned to 22WL0008.

STAFF RECOMMENDATION

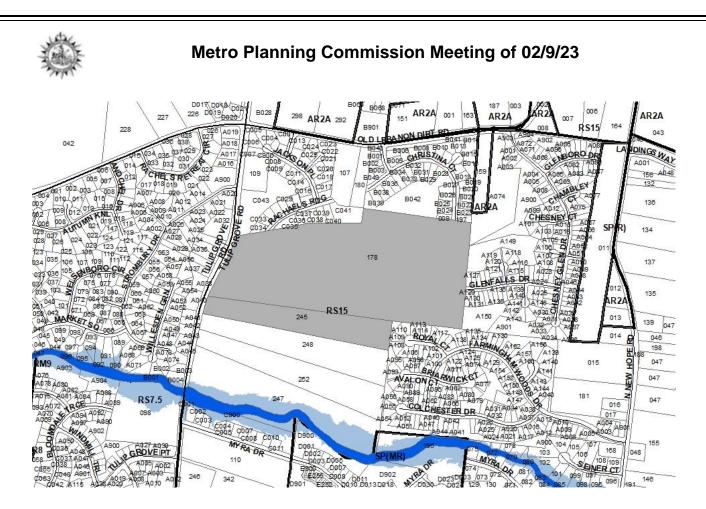

Staff recommends approval with conditions.

CONDITIONS

- 1. Each lot shall be limited to single-family residential uses only.
- 2. Comply with all conditions and requirements of Metro reviewing agencies.
- 3. Pursuant to 2-4.7 of the Metro Subdivision Regulations, the approval shall expire if the plat is not recorded with the Register of Deeds within one year of the Planning Commission's approval.

RECOMMENDED ACTION

Motion to approve proposed subdivision Case No. 2021S-183-001 with conditions based upon finding that the subdivision complies with the applicable standards of the Metro Subdivision Regulations, Metro Zoning Code, and other applicable laws, ordinances and resolutions as noted in the staff report, subject to all of the staff recommended conditions.

2022S-079-001 WILLAMSON HOMESTEAD Map 086, Parcel(s) 178, 245 14, Donelson - Hermitage - Old Hickory 12 (Erin Evans)

Item #37	Concept Plan 2022S-079-001
Project Name	Williamson Homestead
Council District	12 – Evans
School District	04 – Nabaa-McKinney
Requested by	Crenshaw Land Surveying, applicant; Albert Jones ET UX and Schell Brothers Nashville, LLC, owners.
Deferrals	This item was deferred at the January 12, 2023, Planning Commission meeting. No public hearing was held.
Staff Reviewer Staff Recommendation	Elliott <i>Approve with conditions.</i>

APPLICANT REQUEST Concept plan approval to permit 99 single-family lots.

Zone Change

A request for concept plan approval to create 99 residential lots on properties located at 1053 and 1061 Tulip Grove Road, approximately 950 feet south of Old Lebanon Dirt Road, zoned Single-Family Residential (RS15) (45.44 acres).

SITE DATA AND CONTEXT

Location: The site is located on the east side of Tulip Grove Road, south of Old Lebanon Dirt Road. Rachaels Ridge, Christina Court, and Glenfalls Drive all stub into the site from existing subdivisions. Central Pike is just under a mile to the south.

Street Type: The site has frontage onto Tulip Grove Road which is classified as an Arterial Boulevard in the Major and Collector Street Plan.

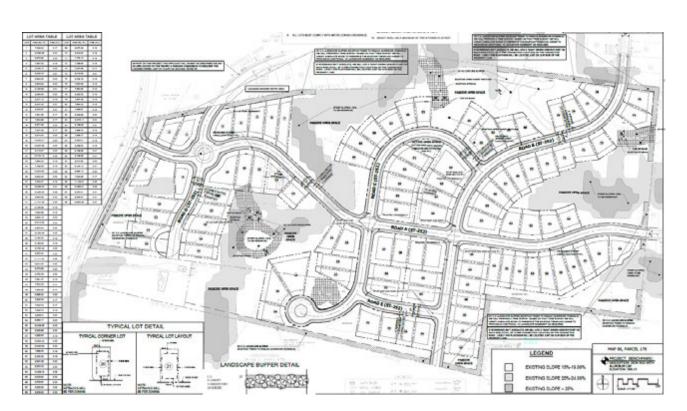

Approximate Acreage: The proposed area for subdivision is approximately 45.44 acres or 1,979,336 square feet.

Parcel/Site History: This site is comprised of two parcels. The northern parcel has existed since at least 1969 and the southern parcel has existed since 1978.

Zoning History: The property is zoned RS15 and this zoning has existed since 1998, when it was rezoned from R15.

Existing land use and configuration: The site contains two single-family residential land uses.

Proposed Concept Plan

Surrounding land use/zoning:

North: Residential/Single-Family Residential (RS15) South: Residential/Single-Family Residential (RS15) East: Residential/Single-Family Residential (RS15) West: Residential/Single-Family Residential (RS15)

Zoning: Single-Family Residential (RS15) Min. lot size: 15,000 square feet Max. height: 3 stories Min. front setback: 20' Min. rear setback: 20' Min. side setback: 10' Maximum Building Coverage: 0.35

PROPOSAL DETAILS

This proposal is for subdivision development under existing zoning entitlements. No rezoning is proposed with this application. This proposal utilizes the by-right Cluster Lot Option standards of Section 17.12.090 of the Metro Zoning Code.

Number of lots: 99 single-family lots.

Lot sizes: Lot sizes range from 0.17 acres (7,500 square feet) to 0.41 acres (18,068 square feet).

Access: Access is proposed from Tulip Grove Road as well as from the three stub streets that are being extended into this development. These stub street connections include Rachaels Ridge, Glenfalls Drive, and Christina Court.

APPLICABLE SUBDIVISION REGULATIONS

Volume III of NashvilleNext, the General Plan for Nashville and Davidson County, contains the Community Character Manual (CCM) which establishes land use policies for all properties across the county. The land use policies established in CCM are based on a planning tool called the Transect, which describes a range of development patterns from most to least developed. Prior versions of Subdivision Regulations for Nashville and Davidson County contained a uniform set of standards that were applied Metro-wide. This did not consider the diverse character that exists across the County. In order to achieve harmonious development within the diversity of development patterns that exist in Nashville and Davidson County, the Planning Commission has adopted the current Subdivision Regulations. The Subdivision Regulations incorporate the General Plan policies by including rules or standards for each specific transect. This allows policies of the General Plan to be followed through application of the varying Subdivision Regulations to reflect the unique characteristics found in the different transects. The site is within the Suburban Neighborhood Evolving (T3 NE) policy. For T3 NE, the conventional regulations found in Chapter 3 are utilized.

This proposal meets Chapter 3 of the Subdivision Regulations and utilizes the cluster provisions allowed by the Zoning Code.

CLUSTER LOT OPTION Plan Requirements (Section 17.12.090.A)

The concept plan establishes that clustering is proposed and displays the layout of all lots and common areas. This cluster lot proposal includes only single-family lots. The concept plan delineates the alternative lot sizes to be employed and describes the land areas required to satisfy open space requirements.

Minimum Area Required to be Eligible (Section 17.12.090.B)

The minimum area within the cluster lot subdivision shall be no less than ten times the minimum lot area for the base zoning district. The site is zoned RS15 and requires a minimum 15,000 sq. ft. lot size so the site would need to be a minimum of 150,000 sq. ft. to be eligible. The site contains approximately 2,013,778 sq. ft. and exceeds the minimum area requirement to be eligible to utilize the cluster lot option.

Maximum Lot Yield (Section 17.12.090.E)

The Cluster Lot Option includes specific standards for calculation of maximum lot yield within a cluster lot subdivision that ensure that the maximum number of lots does not exceed what is permitted by the existing base zoning. The Zoning Code specifies that the lot yield shall be based on the gross acreage of the site, minus 15 percent of areas reserved for streets, and then division of the remaining 85 percent of the gross area by the minimum lot size of the base zoning district.

The gross area of this site is approximately 45.44 acres or 1,979,336 sq. ft. The minimum lot size of the existing zoning district, RS15, is 15,000 sq. ft.

1,979,336 sq. ft. x 0.15 = 296,900 sq. ft. (15% of the gross site area reserved for streets) 1,979,336 sq. ft. - 296,900 sq. ft. sq. ft. = 1,682,435 sq. ft. (85% of the gross area remaining to yield lots)

1,682,435 sq. ft. / 15,000 sq. ft. = 112 lots

Open Space Requirements (Section 17.12.090.D)

A minimum of 15 percent of the gross land area of each phase is required to be provided as open space in a cluster lot subdivision. The proposed concept plan includes only one phase. The total open space provided is approximately 17.69 acres or 39% of the site. The proposed open space exceeds the minimum requirement.

Alternative Lot Sizes (Section 17.12.090.C)

Lots within a cluster lot subdivision may be reduced in area the equivalent of two smaller base zone districts. The subject site is zoned RS15 and a reduction of two base zone districts would be down to the RS7.5 zone district. The RS7.5 zoning district requires a minimum lot size of 7,500 sq. ft. The smallest lot proposed in this subdivision exceeds the minimum 7,500 sq. ft. lot size requirement.

Perimeter lots oriented to an existing street are required to be at least ninety percent of the minimum lot size of the actual zoning of the property. This application does not include any perimeter lots

oriented to an existing street. The lots near Tulip Grove Road have an open space parcel with a landscape buffer separating these parcels from the roadway.

Minimum lot size for perimeter lots not oriented to an existing subdivision depend on the abutting residential zoning district and the buffering that is provided on site. Lots may be reduced in size the equivalent of one zoning district (RS15 to RS10) with the installation of a standard B landscape buffer yard located within common open space or reduced the equivalent of two zoning districts (RS15 to RS7.5) with the installation of a standard C landscape buffer yard located within common open space. As proposed, all lots abutting a residential zoning district either meet the minimum lot size requirement or include a standard C landscape buffer.

The bulk standards of the zoning district which most closely resembles the alternative lot sizes chosen for any given phase of the development shall be employed for that phase of the subdivision. As proposed, this concept plan meets this requirement. Bulk standards will be applied with individual building permits.

Landscape Buffer Yard Requirements (Article IV)

When incompatible zoning districts abut, the Zoning Code requires landscape buffer yards between the incompatible districts. The zoning districts abutting the northern and eastern property lines are zoned RS15. The adjacent lots to the north, south, and the east are similar in size to the proposed lots; therefore, a buffer is technically not required on those sides. The plan provides a buffer yard along all property boundaries except in locations where steep slopes or other environmental features exist and these areas will be left in their vegetated natural state.

Hillside Development Standards (Section 17.28.030)

In general, lots created under the cluster lot option shall be clustered on those portions of the site that have natural slopes of less than 20% grade. Areas with natural slopes that are 25% or greater shall be placed outside of building envelopes and preserved to the greatest extent possible. The Planning Commission may authorize lots with natural slopes 25% or greater subject to the concept plan demonstrating that the lots can meet the critical lot standards. These standards generally require building envelopes to be outside of the areas with 25% or steeper slopes. It is important to note that the Subdivision Regulations also includes hillside development standards. The proposed plan clusters lots on the portions of the site with slopes less than 20% grade, consistent with the hillside development standards and the cluster lot option.

Floodplain/Floodway Development Standards (Section 17.28.40)

In general, new development should stay outside or have limited encroachment into areas designated as floodplain or floodway. This site is not located within floodplain or floodway.

Recreational Facilities (Section 17.12.090.G)

This section establishes the requirements for recreational facilities in subdivisions utilizing the cluster lot option. Recreational facilities are required for cluster lot subdivisions that contain 25 or more residential units. One facility is required for cluster lot subdivisions with 25 to 99 units. An additional facility is required for every 100 units in excess of 99. Recreational facilities can include, but are not limited to playgrounds, swimming pools, ball fields, gazebos, picnic areas and

walking trails. The plan identifies the necessary recreational facilities within common open space for a cluster lot subdivision of this scope.

SUBDIVISION REGULATIONS – CHAPTER 3

3-1 General Requirements

This subdivision is required to meet on standards of Chapter 3. Staff finds that all standards are met.

3-2 Monument Requirements

Does not apply to concept plans. Monuments will be set after final plat approval.

3-3 Suitability of the Land

Staff finds that the land is suitable for development consistent with this section.

3-4 Lot Requirements

All proposed lots comply with the minimum lot size of the zoning code. Any development proposed on the resulting lots will be required to meet the bulk standards and all other applicable regulations of the RS15 zoning district and cluster lot requirements at the time of building permit.

3-5 Infill Subdivisions

In order to ensure compatibility with the General Plan, the Commission has adopted specific regulations applicable to infill subdivisions, defined as residential lots resulting from a proposed subdivision within the R, R-A, RS, and RS-A zoning districts on an existing street. If a proposed infill subdivision meets all of the adopted applicable regulations, then the subdivision is found to be harmonious and compatible with the goals of the General Plan.

Not applicable. No lots are proposed on an existing street.

3-6 Blocks

All proposed block lengths meet the distance requirements as established in the subdivision regulations.

3-7 Improvements

Construction plans for any required public or private improvements (stormwater facilities, water and sewer, public roads, etc.) will be reviewed with the final site plan.

3-8 Requirements for Sidewalks and Related Pedestrian and Bicycle Facilities

Sidewalks are required in association with new streets. The proposed subdivision includes new public streets and sidewalks are provided consistent the Metro local street standard.

3-9 Requirements for Streets

All streets as shown on the concept plan meet the minimum requirements for a public street. Additionally, the Subdivision Regulations Section 3-9.4.d indicates that all streets shall be properly integrated with the existing and proposed system of streets. Rachaels Ridge, Christina Court, and Glenfalls Drive were all constructed as stub streets, intended to extend

in the future to provide for an interconnected street network. They were not built as permanent dead end streets.

3-10 Requirements for Dedication, Reservations, or Improvements

Right-of-way and easements for this project will be dedicated with final plat.

3-11 Inspections During Construction

This section is applicable at the time of construction, which for this proposed subdivision, will occur only after issuance of a building permit approved by Metro Codes and all other reviewing agencies.

3-12 Street Name, Regulatory and Warning Signs for Public Streets

NDOT will require the review and approval of streets with the submittal of the final site plan. Street names for new streets will be reserved at that time.

3-13 Street Names, Regulatory and Warning Signs for Private Streets Not applicable to this case. The concept plan does not propose any new private streets.

3-14 Drainage and Storm Sewers

Drainage and storm sewer requirements are reviewed by Metro Stormwater. Metro Stormwater has reviewed the proposed concept plan and found it to comply with all applicable standards of this section. Stormwater recommends approval.

3-15 Public Water Facilities

Metro Water Services has reviewed this proposed concept plan for water and has recommended approval.

3-16 Sewerage Facilities

Metro Water Services has reviewed this proposed concept plan for sewer and has recommended approval with conditions.

3-17 Underground Utilities

Utilities are required to be located underground whenever a new street is proposed. The concept plan notes all new utilities will be placed underground as required.

Subdivision Variances or Exceptions Requested: No variances or exceptions to the Subdivision Regulations are requested with this application.

PLANNING STAFF COMMENTS

The proposed subdivision meets the standards of the Subdivision Regulations and Zoning Code. Future development will be required to meet the standards of the Metro Zoning Code regarding setbacks, etc. Staff recommends approval with conditions as the proposed subdivision meets the requirements of the Zoning Code and Subdivision Regulations.

Street connectivity is an important concept in planning and is supported by Nashville Next An adequate street network benefits the entire community by connecting neighborhoods and provides

shorter and safer routes for pedestrians and cyclists. It provides alternate routes for emergency vehicles such as fire, ambulance and police which can reduce response time. An interconnected network can alleviate traffic congestion by redistributing traffic across a wider street network.

Additionally, the applicant held a community meeting for this project and as a result of the meeting, the applicant has identified some impact mitigation features that are being proposed with this plan. These include extra landscaping and buffering standards, a commitment to apply to the Traffic & Parking Commission to reduce the speed limit of a proposed street extension, and a subdivision monument sign at the street connection of Rachaels Ridge Drive.

POLICY CONSIDERATIONS

A recent appeals court decision (Hudson et al v. Metro) upheld a lower court decision which outlined that the Planning Commission has the authority to determine whether a concept plan complies with the adopted General Plan (NashvilleNext). Per the Court, the Planning Commission may not evaluate each concept plan to determine whether it is harmonious generally but may consider policy. Policy information is provided below for consideration.

The Community Character Manual (CCM) policy applied to the site is primarily Suburban Neighborhood Evolving (T3 NE) with Conservation policy recognizing sensitive environmental features such as steep slopes and water features. T3 areas are predominately residential areas with neighborhoods featuring shallow and consistent setbacks and closer building spacing. T3 NE areas with the suburban transect are intended to provide greater housing choice and improved connectivity. Conservation policy areas are intended to keep undisturbed environmentally sensitive land features in a natural state and remediate environmentally sensitive features that have been disturbed when new development or redevelopment takes place.

Moderate to high levels of connectivity with street networks and sidewalks are a key feature of T3 NE areas. The policy speaks to vehicular connections with new development providing for multiple route options to destinations, reducing congestion on primary roads. Lot sizes within the broader policy can vary and zoning districts ranging from RS7.5 up to RM20-A are supported depending on context.

FROM OTHER REVIEWING AGENCIES

FIRE MARSHAL RECOMMENDATION

Approve with conditions

• Limited building detail, and/ or building construction information provided. Construction must meet all applicable building and fire codes. Any additional fire code or access issues will be addressed during the construction permitting process. Future development or construction may require changes to meet adopted fire and building codes.

STORMWATER RECOMMENDATION

Approve with conditions

• Concept Plan AWC: Must comply with all regulations in the Stormwater Management Manual at the time of final submittal.

NASHVILLE DOT RECOMMENDATION Approve with conditions

- Final construction plans and road grades shall comply with the design regulations established by the Nashville Department of Transportation, NDOT. Slopes along roadways shall not exceed 3:1.
- Roundabout design to conform to FHWA and AASHTO standards and striping per MUTCD. For reference, see the geometric design reference source prepared by FHWA Turner-Fairbank Highway Research Center - Roundabouts: An Informational Guide. Identity the splitter islands / pedestrian crossing.

TRAFFIC AND PARKING RECOMMENDATION Approve

WATER SERVICES RECOMMENDATION Approve with conditions

• Approved as a Concept Plan only. Public and/or private water and sanitary sewer construction plans must be submitted and approved prior to Final Site Plan/SP/Plat approval. The approved construction plans must match the Final Site Plan/SP/Plat plans. Submittal of an availability study is required before the Final SP can be reviewed. Once this study has been submitted, the applicant will need to address any outstanding issues brought forth by the results of this study. A minimum of 30% of W&S Capacity must be paid before issuance of building permits.

STAFF RECOMMENDATION

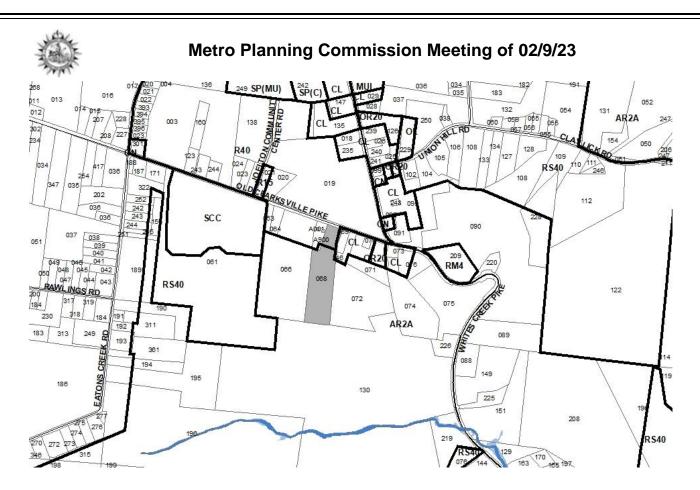

Staff recommends approval with conditions.

CONDITIONS

- 1. Comply with all conditions and requirements of Metro agencies.
- 2. The requirements of the Metro Fire Marshal's Office for emergency vehicle access and adequate water supply for fire protection must be met prior to the issuance of any building permits.
- 3. The applicant shall submit an application to the Traffic & Parking Commission to consider reducing the speed limit of Rachaels Ridge Drive and the proposed connection and extension to 15 MPH. The results of this application shall be provided to Planning prior to approval of the final site plan application.

RECOMMENDED ACTION

Motion to approve proposed subdivision Case No. 2022S-079-002 based upon finding that the subdivision complies with the applicable standards of the Metro Subdivision Regulations, Metro Zoning Code, and other applicable laws, ordinances and resolutions as noted in the staff report, subject to all of the staff recommended conditions.

Deferrals	This item was deferred from the October 27, 2022, November 10, 2022, and the December 8, 2022, Planning Commission meetings. No public hearing was held.
Staff Reviewer Staff Recommendation	Swaggart Approve with conditions including an exception from Section 3-4.2.d. to allow a flag lot.

APPLICANT REQUEST Request for final plat to create two residential lots.

<u>Final Plat</u>

A request for final plat approval to create two lots on property located at 3525 Old Clarksville Pike, approximately 606 feet west of Whites Creek Pike, zoned Agricultural and Residential (AR2A), (9.05 acres).

SITE DATA AND CONTEXT

Location: The property is located in Joelton. It is on the south side of Old Clarksville Pike and is just west of the intersection with Whites Creek Pike.

Street type: Old Clarksville Pike is rural mixed-use collector (T2-M-CA-2) with approximately 50 feet of right-of-way.

Approximate Acreage: 9.05 acres or 394,218 square feet.

Parcel/Site History: This site is comprised of a single parcel. The parcel was created by deed in 1950.

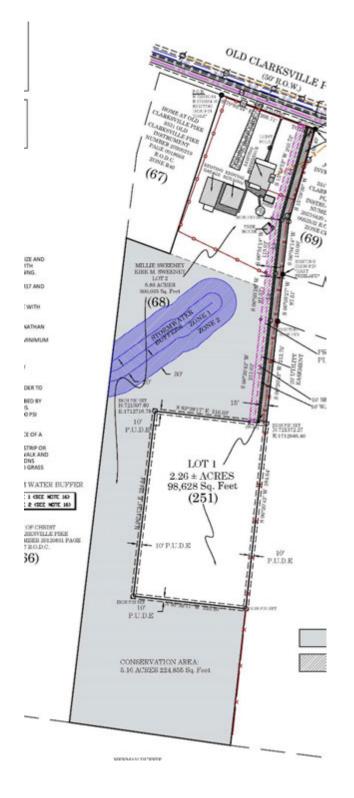

Zoning History: This site has been zoned AR2a and R40 since at least 1974.

Existing land use and configuration: The site is developed with a single-family use. The existing residential structure will be retained.

Bulk Standards:

<u>Front Portion</u> One and Two-family Residential (R40) Min. lot size: 40,000 square feet Min. street setback: 40' Min. rear setback: 20' Min. side setback: 15'

Proposed Plat

Max. building coverage: 0.25 Max. height: 3 stories

<u>Rear Portion</u> Agricultural and Residential (AR2a) Min. lot size: 2 acres Min. street setback: N/A (no road frontage) Min. rear setback: 20' Min. side setback: 20' Max. building coverage: 0.20 Max. height: 3 stories

Surrounding land use and zoning:

- North: Joelton Elementary (R40)
- South: Mobile Home (AR2a)
- East: Strip Shopping Center (CL)
- West: Single-Family (R40)

PROPOSAL DETAILS

This proposal is for subdivision development under existing zoning entitlements. No rezoning is proposed with this application.

Number of lots: 2

Lot sizes: Lot 1 is 2.26 acres (98,628 sq. ft.); Lot 2 is 6.89 acres (300,035 sq. ft.)

Access: Access is proposed from Old Clarksville Pike. The existing house on Lot 2 will maintain the existing drive and a new drive will serve Lot 1.

APPLICABLE SUBDIVISION REGULATIONS

Volume III of NashvilleNext, the General Plan for Nashville and Davidson County, contains the Community Character Manual (CCM) which establishes land use policies for all properties across the county. The land use policies established in CCM are based on a planning tool called the Transect, which describes a range of development patterns from most to least developed.

Prior versions of Subdivision Regulations for Nashville and Davidson County contained a uniform set of standards that were applied Metro-wide. This did not take into account the diverse character that exists across the County. In order to achieve harmonious development within the diversity of development patterns that exist in Nashville and Davidson County, the Planning Commission has adopted the current Subdivision Regulations. The Subdivision Regulations incorporate the General Plan policies by including rules or standards for each specific transect. This allows policies of the General Plan to be followed through application of the varying Subdivision Regulations to reflect the unique characteristics found in the different transects. The property is in a Rural Neighborhood Center (T2 NC) and Conservation (CO) policy area. While the property is in a Rural Transect, the Rural Regulations found in Chapter 4 of the Subdivision Regulations do not apply to T2 NC and Chapter 3 of the Subdivision Regulations apply.

3-1 General Requirements

Staff finds that all standards are met.

3-2 Monument Requirements

Permanent monuments, in accordance with this section of the regulations, shall be placed in all subdivisions when new streets are to be constructed. Due to the slopes on the site, but

3-3 Suitability of the Land

While there are some steep slopes on the property, building envelopes are provided outside of these areas. The plat also places the areas with steep slopes within a conservation area.

3-4 Lot Requirements

Both lots comply with the minimum lot size of the Zoning Code. Any development proposed on the resulting lots will be required to meet the bulk standards and all other applicable regulations of R40 and AR2a zoning at the time of building permit.

3-5 Infill Subdivisions

In order to ensure compatibility with the General Plan, the Commission has adopted specific regulations applicable to infill subdivisions, defined as residential lots resulting from a proposed subdivision within the R, R-A, RS, and RS-A zoning districts on an existing street. If a proposed infill subdivision meets all of the adopted applicable regulations, then the subdivision is found to be harmonious and compatible with the goals of the General Plan.

N/A. Compatibility requirements do not apply to T2 NC.

3-6 Blocks

This application does not propose to create any new blocks.

3-7 Improvements

Construction plans for any required public or private improvements (stormwater facilities, water and sewer, public roads, etc.) will be reviewed with any required final site plan.

3-8 Requirements for Sidewalks and Related Pedestrian and Bicycle Facilities Sidewalks will be requirements will be reviewed at the time of building permit pursuant to Section 17.20.120 of the Zoning Code.

3-9 Requirements for Streets

This application does not propose to create any new streets,

3-10 Requirements for Dedication, Reservations, or Improvements Right of way dedication is not required.

3-11 Inspections During Construction

This section is applicable at the time of construction, which for this proposed subdivision, will occur only after issuance of a building permit approved by Metro Codes and all other reviewing agencies.

- **3-12** Street Name, Regulatory and Warning Signs for Public Streets No new streets are proposed.
- **3-13** Street Names, Regulatory and Warning Signs for Private Streets Not applicable to this case. The proposal does not include private streets.

3-14 Drainage and Storm Sewers

Drainage and storm sewer requirements are reviewed by Metro Stormwater. Metro Stormwater has reviewed the proposed plat and found it to comply with all applicable standards of this section. Stormwater recommends approval.

3-15 **Public Water Facilities**

Metro Water Services has reviewed the plat for water and has recommended approval.

3-16 Sewerage Facilities Metro Water Services has reviewed the plat for sewer and has recommended approval.

3-17 Underground Utilities N/A

Subdivision Variances or Exceptions Requested

Yes. Lot 1 is a flag lot. Section 3-4.2.d. of the Regulations generally does not permit flag lots; however, the regulations allow the Commission to grant exceptions. A variance is not required. As proposed, staff finds that the proposed flag lot meets the requirements for the Commission to grant an exception to permit Lot 1 as a flag lot.

PLANNING STAFF COMMENTS

With the exception of the flag lot, the proposed subdivision meets the standards of the Metro Subdivision Regulations and the standards of the Metro Zoning Code. Staff recommends approval with conditions including an exception from Section 3-4.2.d. to allow the proposed flag lot.

COMMENTS FROM OTHER REVIEWING AGENCIES

FIRE MARSHAL RECOMMENDATION Approve

STORMWATER RECOMMENDATION Approve

NASHVILLE DOT RECOMMENDATION Approve with conditions

- Driveway connections must be permitted by the Nashville Department of Transportation and conform with Metro Code requirements.
- Traffic conditions to be set at the time of building permit approval for individual lots. (Traffic studies, driveway distances, access sight triangles, etc.)

TRAFFIC AND PARKING RECOMMENDATION Approve

WATER SERVICES RECOMMENDATION Approve

STAFF RECOMMENDATION

Staff recommends approval with conditions including an exception from Section 3-4.2.d. to allow the proposed flag lot.

CONDITIONS

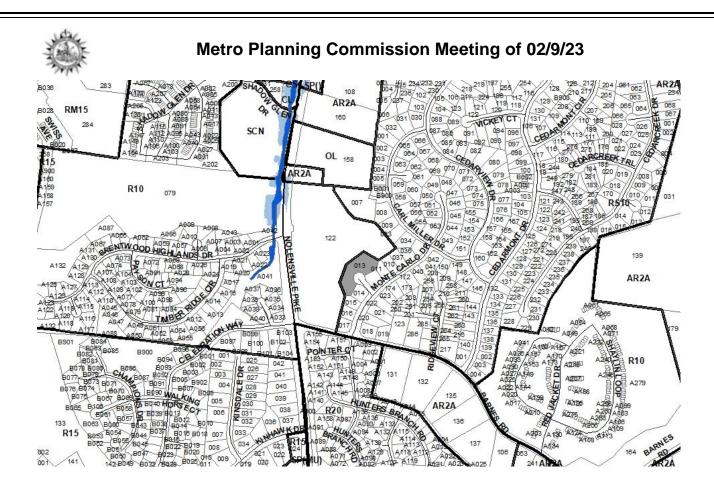

- 1. Comply with all conditions and requirements of Metro reviewing agencies.
- 2. The requirements of the Metro Fire Marshal's Office for emergency vehicle access and adequate water supply for fire protection must be met prior to the issuance of any building permits.

RECOMMENDED ACTION

Motion to approve proposed subdivision Case No. 2022S-247-001 based upon finding that the subdivision complies with the applicable standards of the Metro Subdivision Regulations, Metro Zoning Code, and other applicable laws, ordinances and resolutions as noted in the staff report, subject to all of the staff recommended conditions.

Requested by

Concept Plan 2023S-007-001 Monte Carlo Estates 31 – Rutherford 02 – Elrod Carlson Consulting Engineers, Inc., applicant; Facilities Development Group LLC, owner.

Staff Reviewer	
Staff Recommendation	

Elliott *Approve with conditions*.

APPLICANT REQUEST Concept Plan to permit the removal of reserve status and to create a two lot subdivision.

Concept Plan

A request for concept plan approval to create two lots on property located at Monte Carlo Court (unnumbered), at the current terminus of Monte Carlo Court (1.33 acres), zoned Single-Family Residential (RS10).

Zoning

<u>Single-Family Residential (RS10)</u> requires a minimum of 10,000 square foot lot and is intended for single-family dwellings at a density of 3.7 dwelling units per acre. RS10 would permit a maximum of 5 lots.

SITE DETAILS

The site is located midblock along Monte Carlo Drive, north of Barnes Road. The site is approximately 1.3 acres in size and is identified as a reserve parcel located at the end of unimproved public right-of-way. A reserve parcel is a parcel identified on the plat as not a building site. When identified as a reserve parcel, it may include a reason for the reserve status, such as lack of utility lines to the property. In this case, the plat did not include a reason for the reserve status. The site has sloped areas towards the north and rear of the site.

PLAN DETAILS

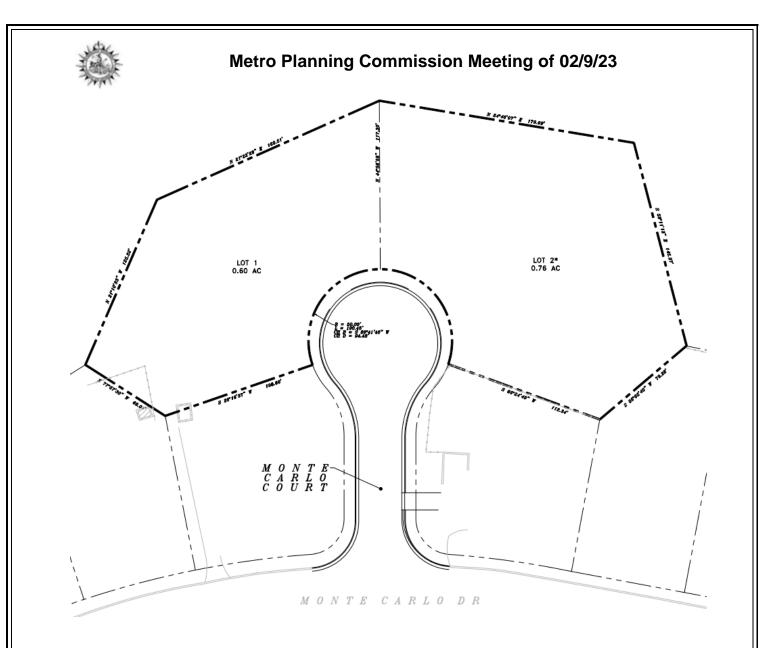

The application proposes to create two lots and improve the Monte Carlo Court right-of-way with a standard cul-de-sac. The applicant has received a Sidewalk Waiver allowing for a payment in-lieu of building the sidewalks. Lot 2 has steep slopes as defined in the Metro Zoning Code at the rear of the site so this lot is labeled as a critical lot. Otherwise, the development of the lots will be regulated by the Zoning code.

ANALYSIS

This application is to create two lots and to remove the reserve parcel status. It was evaluated against two provisions within the Subdivision Regulations: (1) Criteria for Compatibility; and (2) Criteria for Removing Reserve status.

Compatibility

The proposal to create two lots is not required to meet the compatibility standards in the Subdivision Regulations. Compatibility standards are defined in Section 3-5 and are applied in

Proposed Lot Layout

certain areas on an existing street. Monte Carlo Court is platted, but not constructed; therefore, it is not considered an existing street for purposes of this evaluation. Although meeting the compatibility standards for Section 3-5 is not required for this application, the Planning Commission's review of the reserve status does require an evaluation of how the proposal fits within the character of the surrounding neighborhood. This evaluation is below. Staff utilized compatibility standards for lot frontage and size, as noted below.

Reserve Status

The original plat does not include a reason why the reserve status was added to this parcel. Removal of the reserve status requires Planning Commission approval. Section 2.8-1 of the Subdivision Regulations establishes criteria for determining whether to remove the reserve status:

- The parcel fits into the character of the area and is consistent with the general plan. The existing lots along Monte Carlo Drive range from 11,900 square feet to 14,442 square feet. The proposed lots on Monte Carlo Court range from approximately 26,000 square feet to 33,000 square feet. Staff finds the proposed lots are generally consistent with the existing lots on Monte Carlo Drive, and the pattern of potential future development and lot sizes are generally consistent with the neighboring residential context.
- 2) That all minimum standards of the Zoning Code are met. Staff Comment: The proposed lots meet the minimum standards of the RS10 zoning district.
- 3) That the parcel has street frontage or meets the requirements of Section 3-4.2.b or meets the requirements of Sections 3-4.2.b, 3-4.3.c, 4-6.3, or 5-3.1. Staff comment: The lots will have frontage on Monte Carlo Court.
- 4) The current standards of all reviewing agencies are met. Staff Comment: All agencies have approved the plat.

Staff finds the proposed concept plan and removal of reserve status is consistent with the community character.

FIRE MARSHAL RECOMMENDATION Approve

STORMWATER RECOMMENDATION Approve with conditions

• Must comply with all regulations in the Stormwater Management Manual at the time of final submittal.

WATER SERVICES RECOMMENDATION

Approved with conditions

• Approved as a Concept Plan only. Public and/or private water and sanitary sewer construction plans must be submitted and approved prior to Final Site Plan/SP approval. The approved construction plans must match the Final Site Plan/SP plans. Submittal of an availability study is required before the Final SP can be reviewed. Once this study has been submitted, the applicant will need to address any outstanding issues brought forth by the results of this study. A minimum of 30% of W&S Capacity must be paid before issuance of building permits.

NASHVILLE DOT RECOMMENDATION Approved with conditions

- In-lieu of sidewalk construction payment should be assessed at the time of building permit application for cost of construction. ZW 20220080816
- With relocation of neighboring parcel's drive, previous access is to be closed and curb and gutter to be built on Monte Carlo Drive.
- A bond will be required for new public infrastructure. This will be assessed after road construction plan approval.

TRAFFIC & PARKING RECOMMENDATION Approve

STAFF RECOMMENDATION

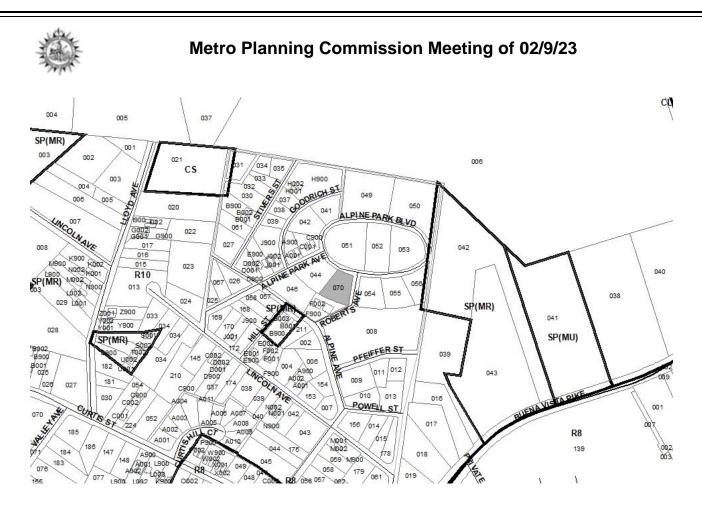

Staff recommends approval with conditions as the request meets the Subdivision Regulations.

CONDITIONS

1. Comply with all conditions of reviewing agencies.

Staff Reviewer Staff Recommendation Final Plat 2023S-013-001 3220 Alpine Park Boulevard 02 – Toombs 01 – Gentry Clint Elliott Survey, applicant; C & H Properties LLC, owner.

Anthony Disapprove unless the Planning Commission makes an exception to the frontage requirement.

APPLICANT REQUEST Request for final plat approval to create two lots.

<u>Final Plat</u>

A request for final plat approval to create two lots on property located at 3220 Alpine Park Boulevard, at the southwest corner of Alpine Park Boulevard and Roberts Avenue, zoned One and Two-Family Residential (R10) (0.51 acres).

SITE DATA AND CONTEXT

Location: The site consists of one property located along the south side of Alpine Park Boulevard and west side of Roberts Avenue right-of-way.

Street Type: The site has frontage on Alpine Park Boulevard, which is classified as a local street.

Approximate Acreage: 0.51 acres or approximately 22,400 square feet.

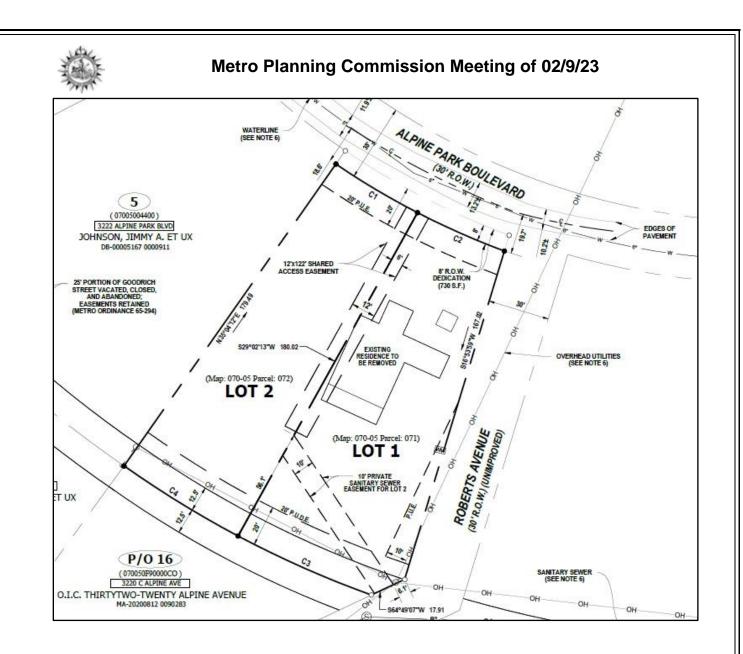

Parcel/Site History: This site consists of one parcel, Lot 1 of Alpine Terrace Subdivision. The parcel was created in 1919.

Zoning History: The property has been zoned R10 since 1974.

Existing Land Use: The property is currently used for single-family residential.

Surrounding Land Use and Zoning:

- North: Vacant/R10
- South: Two-Family Residential/R10
- East: Vacant/R10
- West: Single-Family Residential/R10

Proposed Final Plat

Zoning: One and Two-Family Residential (R10) Min. lot size: 10,000 square feet Max. building coverage: 0.40 Min. rear setback: 20' Min. side setback: 5' Max. height: 3 stories Min. street setback: Contextual per Zoning Code

PROPOSAL DETAILS Number of lots: 2

Lot sizes: Lot 1 - 0.27 acres (11,656 square feet); Lot 2 - 0.23 acres (10,021 square feet)

Access: Access to both lots is provided from Alpine Park Boulevard. A shared access easement for a shared drive is shown on the plat.

Subdivision Variances or Exceptions Requested: The applicant seeks an exception from Section 3-5.3.c.1. of the Subdivision Regulations, which requires lots within the T3 Suburban Neighborhood Evolving policy area to have minimum frontage of 50 feet. The plat shows frontages of approximately 46 feet for each lot.

APPLICABLE SUBDIVISION REGULATIONS

Volume III of NashvilleNext, the General Plan for Nashville and Davidson County, contains the Community Character Manual (CCM) which establishes land use policies for all properties across the county. The land use policies established in CCM are based on a planning tool called the Transect, which describes a range of development patterns from most to least developed.

Prior versions of Subdivision Regulations for Nashville and Davidson County contained a uniform set of standards that were applied Metro-wide. This did not take into account the diverse character that exists across the County. In order to achieve harmonious development within the diversity of development patterns that exist in Nashville and Davidson County, the Planning Commission has adopted the current Subdivision Regulations. The Subdivision Regulations incorporate the General Plan policies by including rules or standards for each specific transect. This allows policies of the General Plan to be followed through application of the varying Subdivision Regulations to reflect the unique characteristics found in the different transects. The site is within the Suburban Neighborhood Evolving (T3 NE) policy. For T3 NE, the conventional regulations found in Chapter 3 are utilized.

3-1 General Requirements

This subdivision is required to meet the standards of Chapter 3. Staff finds that all standards are met, except for the infill compatibility standard, which is discussed below.

3-2 Monument Requirements

Complies. Monuments will be set after plat approval.

3-3 Suitability of the Land

Staff finds that the land is suitable for development consistent with this section.

3-4 Lot Requirements

All lots comply with the minimum standards of the zoning code. Any development proposed on the resulting lots will be required to meet the bulk standards and all other applicable regulations of R10 zoning at the time of building permit.

3-5 Infill Subdivisions

In order to ensure compatibility with the General Plan, the Commission has adopted specific regulations applicable to infill subdivisions, defined as residential lots resulting from a proposed subdivision within the R, R-A, RS, and RS-A zoning districts on an existing street. If a proposed infill subdivision meets all of the adopted applicable regulations, then the subdivision is found to be harmonious and compatible with the goals of the General Plan. An exception to the compatibility criteria may be granted by the Planning Commission for a SP, UDO or cluster lot subdivision by approval of the rezoning or concept plan.

- 3-5.3 Criteria for Determining Compatibility for policy areas designated in the General Plan as Neighborhood Evolving and/or Special Policies, except within Designated Historic Districts:
 - *f. All minimum standards of the zoning code are met.* Complies. All lots meet the minimum standards of the zoning code.
 - g. Each lot has street frontage or meets the requirements of Section 3-4.2.b for fronting onto an open space or meets the requirements of Sections 4-6.3 or 5-3.1 fronting onto an open space.

Complies. Both lots have frontage on Alpine Park Boulevard, an existing public street.

- *h.* Each lot oriented to an existing street shall meet minimum lot frontage requirements as follows:
 - 1. Within T3 Suburban Neighborhood Evolving policy areas, each lot oriented to an existing street shall have a minimum frontage of 50 feet. Lots oriented to the terminus of an existing permanent dead-end shall have a minimum frontage of 35 feet.

Does not comply. Each lot has approximately 46 feet of frontage on Alpine Park Boulevard.

2. Within T4 Urban Neighborhood Evolving policy areas, each lot oriented to an existing street shall have a minimum frontage of 40 feet. Lots oriented to the terminus of an existing permanent dead-end shall have a minimum frontage of 35 feet.

Not applicable. This site is not located within a T4 Urban Neighborhood Evolving policy area.

As proposed, the lots do not have 50 feet of frontage along Alpine Park Boulevard as required by Section 3-5.3.c.1. of the Subdivision Regulations. Both lots have approximately 46 feet of frontage. The Subdivision Regulations allow the Planning Commission to grant an exception to the minimum frontage requirement by considering: the development pattern of

the area; any unique geographic, topographic, and environmental factors; and other relevant information.

Staff reviewed the dimensions of other parcels in the area to determine whether the proposed 46-foot frontage would be in character with the neighborhood. No other parcel on the block face or along the entirety of Alpine Park Boulevard has a frontage of less than 90 feet. Looking more broadly, parcels along Alpine Park Avenue have a minimum frontage of 51 feet with the exception of the corner lot at Alpine Park Avenue and West Street, which has frontage on three streets including 35 feet of frontage on Alpine Park Avenue. Staff finds that the two proposed 46-foot lots are not consistent with the character of the area and, therefore, an exception to the minimum lot frontage requirement is not appropriate.

3-6 Blocks

Not applicable. No new blocks are being created.

3-7 Improvements

No public infrastructure or improvements are required with this subdivision. Construction plans for any required private improvements (private stormwater, water and sewer lines and connections) will be reviewed at the time of building permit.

3-8 Requirements for Sidewalks and Related Pedestrian and Bicycle Facilities

Not applicable. Sidewalks are required only in association with new streets. The proposed subdivision is located on existing streets. Sidewalks may be required at the time of building permit pursuant to Section 17.20.120 of the Zoning Code.

3-9 Requirements for Streets

Not applicable. No new streets are proposed.

3-10 Requirements for Dedication, Reservations, or Improvements

An eight-foot right-of-way dedication along Alpine Park Boulevard is required per the MCSP and is shown on the plat.

3-11 Inspections During Construction

This section is applicable at the time of construction, which for this proposed subdivision, will occur only after issuance of a building permit approved by Metro Codes and all other reviewing agencies.

- **3-12** Street Name, Regulatory and Warning Signs for Public Streets Not applicable. No new streets are proposed.
- **3-13** Street Names, Regulatory and Warning Signs for Private Streets Not applicable. No private streets are proposed.

3-14 Drainage and Storm Sewers

Drainage and storm sewer requirements are reviewed by Metro Stormwater. Metro Stormwater has reviewed the proposed concept plan and found it to comply with all applicable standards of this section. Stormwater recommends approval.

3-15 Public Water Facilities

Metro Water Services has reviewed this proposed concept plan for water and has recommended approval.

3-16 Sewerage Facilities

Metro Water Services has reviewed this proposed concept plan for sewer and has recommended approval.

3-17 Underground Utilities

Utilities are required to be located underground whenever a new street is proposed. The concept plan notes all new utilities will be placed underground as required.

PLANNING STAFF COMMENTS

Staff recommends disapproval unless the Planning Commission grants an exception to the frontage requirement.

POLICY CONSIDERATIONS

A recent appeals court decision (Hudson et al v. Metro) upheld a lower court decision which outlined that the Planning Commission has the authority to determine whether a concept plan complies with the adopted General Plan (NashvilleNext). Per the Court, the Planning Commission may not evaluate each concept plan to determine whether it is harmonious generally but may consider policy. Policy information is provided below for consideration.

The Community Character Manual (CCM) policy applied to the site is Suburban Neighborhood Evolving (T3 NE). T3 areas are intended to provide a thoughtful transition from the least dense natural and rural environment to the denser urban environments. T3 NE areas within the Suburban transect are intended to include moderate-density residential and institutional land uses and moderate setbacks and spacing between buildings. Moderate to high levels of connectivity with street networks, sidewalks, bikeways, and mass transit are a feature of T3 NE areas. The policy supports a variety of building types including houses, low and mid-rise townhouses, and low and mid-rise flats. Lot sizes within the policy area can vary, and zoning districts ranging from RS7.5 up to RM-20A are supported depending on context.

COMMENTS FROM OTHER REVIEWING AGENCIES

FIRE MARSHAL RECOMMENDATION Approve

STORMWATER RECOMMENDATION Approve

NASHVILLE DOT RECOMMENDATION Approve

TRAFFIC AND PARKING RECOMMENDATION Approve with conditions

- Shared access between lot 1 and 2 per plat.
- Traffic conditions to be set at the time of building permit approval for individual lots. (Traffic studies, driveway distances, access sight triangles, etc.)

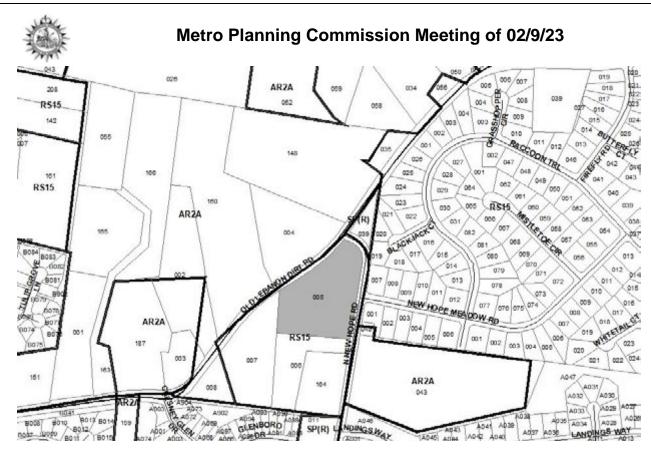

WATER SERVICES RECOMMENDATION Approve

STAFF RECOMMENDATION

Staff recommends disapproval unless the Planning Commission grants an exception to the frontage requirement.

CONDITIONS (if approved)

- 1. Comply with all conditions and requirements of Metro reviewing agencies
- 2. Pursuant to 2-4.7 of the Metro Subdivision Regulations, the approval shall expire if the plat is not recorded with the Register of Deeds within one year of the Planning Commission's approval.
- 3. Add the following note: No parking is permitted between the primary structure and street. Hard surfaces for vehicular access shall be limited to 16 feet wide on a shared access easement located between the primary structure and the street.
- 4. Designate both lots as critical lots. Add an asterisk to each lot and label each as a Critical Lot. Add the following note: Lots are designated as critical lots and are subject to hillside standards established in Section 17.28.030 of the Metro Zoning Code.

Lewis Staff recommends approval with conditions and exceptions to 4-2.5.1.b for Lot 8, and exceptions to 4-2.5 for Lot 10.

APPLICANT REQUEST Request for final plat approval to shift lot lines and create one lot.

<u>Final Plat</u>

A request for final plat approval to shift lot lines and create one lot on properties located at 3252, 3256 and 3258 Greer Road, at the corner of Greer Road and Timber Trail, zoned Agricultural/Residential (AR2a), (12.27 acres).

SITE DATA AND CONTEXT

Location: The site is located on the south and east side of Greer Road, along the county edge.

Street type: The site has frontage on Greer Road, a local road with an existing right-of-way width of approximately 35 feet.

Approximate Acreage: 12.27 acres or approximately 534,481.2 square feet.

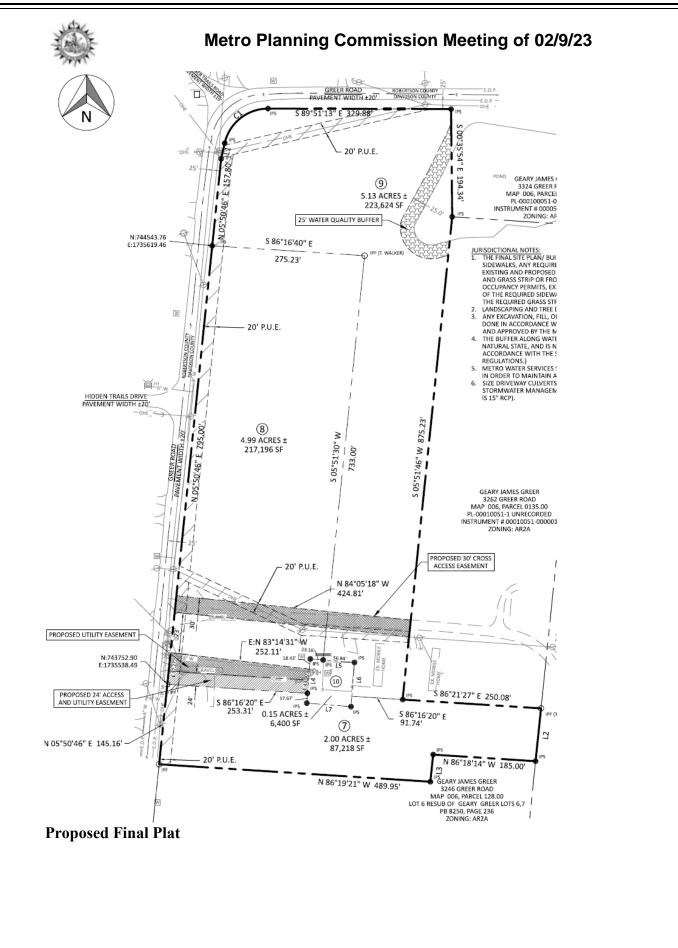

Parcel/Site History: This site is comprised of three lots. Lot 7 was created by plat in 1993 (Book 8250, Page 236). Lots 8 and 9 were created by deed in 1996 (Instrument 10051-1).

Zoning History: The parcel has been zoned AR2a since 1974.

Existing land use and configuration: Lots 7, 8, and 9 have frontage along Greer Road.

Surrounding land use and zoning:

- North: Outside of Metro Zoning Boundaries
- South: Agricultural/Residential (AR2a)
- East: Agricultural/Residential (AR2a)
- West: Outside of Metro Zoning Boundaries

Zoning: Agricultural/Residential (AR2a) Min. lot size: 2 acres Max. building coverage: 0.20 Min. rear setback: 20' Min. side setback: 20' Max. height: 3 stories Min. street setback: 40 feet per zoning, or contextual (to be determined by Metro Codes at the time of building permit)

PROPOSAL DETAILS

Number of lots: Four lots consisting of three existing lots and one new lot. Lots 7, 8, and 9 are existing lots with proposed lot line adjustments in order to create the new Lot 10. Lot 10 is a proposed utility lot to be used by White House Utility District (WHUD). Utility districts are not required to meet the zoning or subdivision regulations based on previous court rulings.

Lot sizes: Proposed lot areas are as follows: Lot 7, 2.0 acres (87,218 sf); Lot 8, 4.99 acres (217,196 sf); Lot 9, 5.13 acres (223,624 sf); Lot 10, 0.15 acres (6,400 sf). All lots have frontage along Greer Road with the exception of Lot 10, as noted below.

Access: Access to lots 7, 8, and 9 is available from Greer Road. Proposed Lot 10 does not have frontage along Greer Road and would be accessed by a 24 foot wide access and utility easement from Greer Road.

Subdivision Variances or Exceptions Requested: See below for exceptions required.

APPLICABLE SUBDIVISION REGULATIONS

Volume III of NashvilleNext, the General Plan for Nashville and Davidson County, contains the Community Character Manual (CCM) which establishes land use policies for all properties across the county. The land use policies established in CCM are based on a planning tool called the Transect, which describes a range of development patterns from most to least developed.

Prior versions of Subdivision Regulations for Nashville and Davidson County contained a uniform set of standards that were applied Metro-wide. This did not take into account the diverse character that exists across the County. In order to achieve harmonious development within the diversity of development patterns that exist in Nashville and Davidson County, the Planning Commission has adopted the current Subdivision Regulations. The Subdivision Regulations incorporate the General Plan policies by including rules or standards for each specific transect. This allows policies of the General Plan to be followed through application of the varying Subdivision Regulations to reflect the unique characteristics found in the different transects. The site is located within the Rural Maintenance (T2 RM) policy. In order to achieve harmonious development, the Planning Commission has adopted Subdivision Regulations that include standards for specific transects. For sites within the T2 Rural transect, the regulations found in Chapter 4 are utilized.

There are several subdivision options in the Rural Subdivision Regulations. This proposal utilizes the Countryside Character Design - Open Alternative option as described in Section 4-2.5.a.1 of the subdivision regulations.

4-2. Development Standards

4-2.1. Identification of Primary Conservation Land. Prior to design of any subdivision plan with new streets or joint access easement, Primary Conservation Land shall be identified and, subject to the provisions of Sections 4-2.2 and 4-2.3, preserved from any disturbance.

Complies. There are no features on this site that require the identification and preservation of Primary Conservation Land.

4-2.2. Preservation of Conservation Land. Unless an exception is granted under Section 4-2.3, all Primary Conservation Areas shall be preserved and set aside through an appropriate means such as conservation easements and/or open space. Complies. See 4-2.1.

4-2.3 Development Footprint. The remaining land outside of the boundary of the Primary Conservation Land shall be designated as the Development Footprint. Complies. No Primary Conservation Land identified.

4-2.4 Building Placement. In subdivisions without new streets or joint access easements, any subdivision application shall note proposed building envelopes. Not applicable. This final plat proposes a new joint access easement.

4-2.5 Rural Character Design

- a. Countryside Character Option. This option may be used for any rural character subdivision. It is intended to maintain a natural, open rural character by minimizing the visual intrusion of development along primary roadways through the use of setbacks, building placement, existing vegetation and natural topographic features that obscure the view of development from the street.
 - 1. Open Alternative Street frontage without existing vegetative or topographical screening. For purposes of this section, "surrounding parcels" is defined as the five R, RS, AR2a, or AG parcels oriented to the same block face on either side of the parcel proposed for subdivision, or to the end of the same blockface, whichever is less. If there are no surrounding parcels, the screened alternative shall be used.
 - a. Building Setback along existing public streets. The required building setback shall be varied between lots. Where the minimum required street setback is less than the average of the street setback of the two parcels abutting either side of the lot(s) proposed to be subdivided, a minimum building setback line shall be included on the proposed lots at the average setback of the abutting parcels. When one of the abutting parcels is vacant, the next developed parcel shall be used. For a corner lot, both block faces shall be used. Where the majority of the abutting parcels are not developed, the minimum building setback shall be two times the amount of lot frontage. However, in no instance shall the minimum building setback be greater than 1,000 feet.
 Based on the surrounding properties, the building setback for Lot 9 is 124.5 feet. The building setback for lots 7 and 8 is 61.8. The proposed Lot 10 is not intended to be used as a utility lot.

b. Lot Depth along existing public streets. The minimum depth for lots along existing public streets shall be the building setback required by Section 4- 2.5(a) plus 300 feet.

The minimum lot depth for Lot 9 is 424.5 feet. The proposed lot depth is 875 feet. This standard is met. The minimum required lot depth for lots 7 and 8 is 361.8 feet. The proposed depth of lot 7 is over 500 feet and the proposed depth of lot 8 is 275.23. The proposed depth of lot 8 does not meet this standard. The proposed Lot 10 is not required to meet this standard.

- c. Lot size along existing public streets.
 - 1. Individual lot sizes shall vary in size to reflect the rural character.
 - 2. The minimum lot size is either equal to or greater than 70% of the lot size of the average size of the surrounding parcels or equal to or larger than smallest of the surrounding parcels, whichever is greater.
 - 3. Flag lots shall not be included in the analysis.

The minimum lot size for Lot 9 is 3.3 acres, and the proposed lot size is 5.13 acres. The minimum lot size for lots 7 and 8 is 2.00 acres. The proposed lot size of Lot 7 is 2.00 acres and of Lot 8 is 4.99 acres. Lot 10 is proposed at 6,400 square feet, but it not required to meet this standard, nor the minimum lot size standard of the zoning district.

- d. Lot frontage abutting existing public streets. Lot frontage is either equal to or greater than 70% of the average frontage of the surrounding parcels or equal to or greater than the smallest of the surrounding parcels, whichever is greater. The minimum lot frontage for Lot 9 is 213.5 feet and the proposed frontage is over 300 feet. The minimum lot frontage required for lots 7 and 8 is 110 feet. The proposed frontage is 145 feet and 795 feet, respectively. This standard is met. Lot 10 does not have frontage along an existing street and is accessed via an easement through lots 7 and 8.
- e. Street lights. Within the USD, street lighting shall be low intensity and shall be projected downward with illumination that shields light from being emitted upwards toward the night sky or on surrounding natural areas. Within the GSD, no private street lights are permitted.

The parcel is located within the GSD. No street lights would be required.

- f. Cluster lot option. Development through the Countryside (Open Alternative) Character Option may utilize the provisions of Cluster Lot Option (Section 17.12.090 of the Zoning Code) within the Development Footprint area, excluding lots abutting existing public streets. Smaller lot sizes may be appropriate with the application of a Specific Plan (SP) zoning district that addresses building height, architecture, landscaping, building placement and detailed grading plan. Not applicable. The cluster lot option is not used with this final plat.
- c. Public Road Frontage. The Planning Commission may approve up to ten lots within a Rural Character subdivision without direct frontage on a public street provided there is a joint access easement to the lots.

The proposed Lot 10 does not have frontage along a public road, however it is intended to be used as a utility lot, with an access easement.

- d. Preservation of Tree Canopy. Prior to any land disturbance within the Development Footprint, a tree survey shall be undertaken and all recommended canopy trees on the Urban Forestry Recommended and Prohibited Tree and Shrub List that are 12" or greater in diameter shall be identified. No such identified trees shall be removed unless the tree is within the designated building envelope as designated on the final plat or approved for removal by the Urban Forester due to condition, disease or damage. The site has limited tree canopy.
- e. Street Design. A primary objective of Rural Character Subdivisions is to maintain an open space and environmental network through the uninterrupted connection of Conservation Land. Buildings are often located and oriented on the land to reflect the natural features of the land, and not a standardized streetscape. When creating any new roads in rural policy areas, roads that complement the rural character of existing rural corridors by using a two-lane rural cross section with swale and reflective striping (ST-255) shall be required. It is anticipated that road connectivity in these subdivisions may be less than other parts of the County. However, road connections may be required whenever necessary to further the overall rural character of the area. No new roads are proposed.
- f. Private streets as defined in Section 3-9 3 of these regulations (Requirements for Streets) are appropriate as needed to maintain the rural character of proposed subdivision. No private streets are proposed.
- g. Drainage and Storm Sewers. The storm water system within a subdivision shall be designed in accordance with the requirements of Section 3-14 of these regulations and the requirements of the Metropolitan Stormwater Management Regulations. Use of rural appropriate or light impact storm-water management designs is encouraged. Metro Stormwater has recommended approval of the plat.
- h. Public Water Facilities. The public water system shall be designed in accordance with the requirements of Section 3-15 of these regulations and the requirements of the Metropolitan Department of Water Services.
 Lot 10 is intended to be used by White House Utility District (WHUD) and the lots are served by WHUD. WHUD has provided a letter of approval.
- *i.* Utilities. All utilities shall be located underground in accordance with the provisions of Section 3-17 of these regulations.
- *j.* Sewerage Facilities. All sewerage facilities shall be designed in accordance with the requirements of Section 3-16 of these regulations.
- k. Areas of Common Sewage Disposal for Individual Sewage Disposal Systems. The location of all operating parts of the individual sewage disposal systems or other sewage disposal system approved by Metro Water Services, situated in lands held in common and any easements shall be shown on the final subdivision plat.
- 1. Lands Set Aside. Land that is dedicated for use for a sanitary sewer disposal, whether for a public system or an individual sewage disposal system or other sewage disposal system approved by Metro Water Services, or land that is dedicated for conventional stormwater management devices, that require a disturbance to the land, shall be set aside for such purposes and not included as Conservation Lands.

PLANNING STAFF COMMENTS

There are several standards that are not met with the proposed plat: proposed depth of Lot 8, and all standards for the proposed Lot 10. The proposed Lot 10 is to be used by White House Utility District for a new water tower. Utility districts are not required to meet the zoning or subdivision regulations based on previous court rulings.

Future development will be required to meet the standards of the Metro Zoning Code in regard to setbacks, building standards, etc. In order to approve this subdivision, the Planning Commission will need to approve a variance to the minimum lot depth, lot size, and the standards for Lot 10, including section 4-2.5.c for public road frontage.

Section 4-2.5.c Public Road Frontage. The Planning Commission may approve up to ten lots within a Rural Character subdivision without direct frontage on a public street provided there is a joint access easement to the lots. An access and utility easement is provided for Lot 10.

The T2 regulations are intended to maintain a natural, open rural character by minimizing the visual intrusion of development along the primary roadways through the use of setbacks and building placement, existing vegetation and natural topographical features that obscure the view of development from the street. For this specific site, there are limited amounts of existing vegetation and topographical features. However, an existing variation in lot sizes, shapes, and configuration exists along Greer Road and would be maintained with the proposed plat.

POLICY CONSIDERATIONS

A recent appeals court decision (Hudson et al v. Metro) upheld a lower court decision which outlined that the Planning Commission has the authority to determine whether a subdivision complies with the adopted General Plan (NashvilleNext). Per the Court, the Planning Commission may not evaluate each subdivision to determine whether it is harmonious generally but may consider policy. Policy information is provided below for consideration.

NashvilleNext includes a Community Character Manual (CCM) which established character areas for each property within Metro Nashville. The community character policy applied to this property is T2 RM (Rural Maintenance). The intent of T2 RM is to maintain the general character of rural neighborhoods as characterized by their development pattern, varying setbacks, building form, and land uses. Additionally, T2 RM should balance maintaining the existing rural development patterns with new development. The creation of Lot 10 for utility services does not largely affect the previously established lots, especially from meeting the standards of the T2 subdivision regulations. The other existing lots, 7, 8, and 9 have been existing in the rural context for many years.

If the Commission can find that the proposed final plat is meeting the intent of the T2 RM policy and supports the creation of the utility lot, the Commission could place greater weight to this portion of the adopted General Plan (Nashville Next), and the Commission may approve the subdivision.

COMMENTS FROM OTHER REVIEWING AGENCIES

FIRE MARSHAL RECOMMENDATION Approve

STORMWATER RECOMMENDATION Approve

NASHVILLE DOT RECOMMENDATION Approve with conditions

• In regard to access, any driveway connections must be permitted by the Nashville Department of Transportation and conform with Metro Code requirements.

TRAFFIC AND PARKING RECOMMENDATION Approve

WATER SERVICES RECOMMENDATION

• Water provided by White House Utility District. A letter of approval from WHUD has been provided.

STAFF RECOMMENDATION

Staff recommends approval with conditions and exceptions to 4-2.5.1.b for Lot 8, and exceptions to 4-2.5 for Lot 10.

CONDITIONS

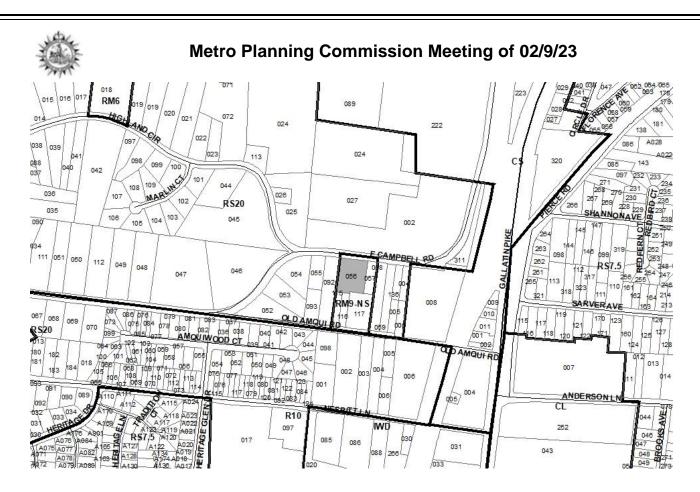

- 1. Add the following note to Lot 10 on the plat: Lot 10 is only to be used for utilities unless replatted.
- 2. Comply with all conditions and requirements of Metro reviewing agencies.
- 3. Pursuant to 2-4.7 of the Metro Subdivision Regulations, the approval shall expire if the plat is not recorded with the Register of Deeds within one year of the Planning Commission's approval.

RECOMMENDED ACTION

Motion to approve the proposed subdivision Case No. 2023S-019-001 including a variance to the lot depth requirement for Lot 8 and the subdivision standards for Lot 10, as the proposed lot 10 is used for utility services.

Anthony *Approve with conditions.*

APPLICANT REQUEST Request for final plat approval to create four lots.

<u>Final Plat</u>

A request for final plat approval to create four lots on property located at 117 East Campbell Road, approximately 230 feet north of Old Amqui Road, zoned Multi-Family Residential No Short-Term Rentals RM9-NS (0.92 acres).

SITE DATA AND CONTEXT

Location: The site consists of one property located along the south side of East Campbell Road.

Street Type: The site has frontage on East Campbell Road, which is classified as a local street.

Approximate Acreage: 0.92 acres or approximately 40,075 square feet.

Parcel/Site History: This site consists of one parcel, Lot 1 of East Campbell Road and Old Amqui Road Subdivision. The parcel was created in 2022.

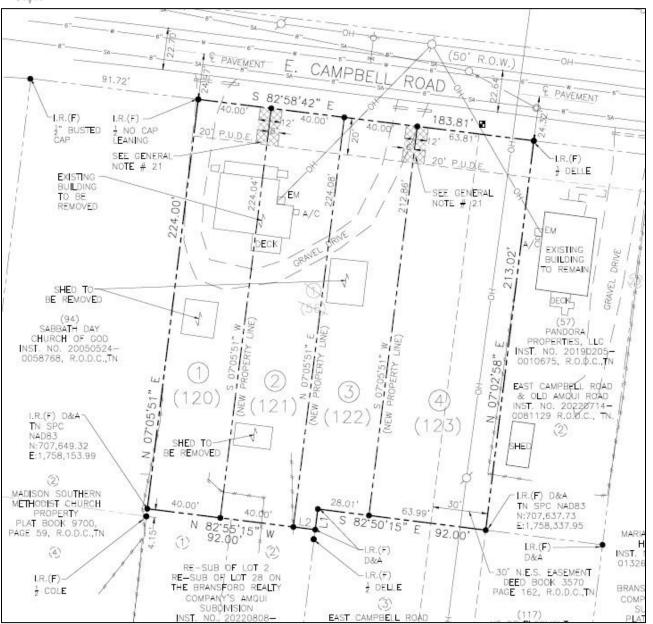

Zoning History: The property has been zoned RM9-NS since 2022.

Existing Land Use: The property is currently used for single-family residential.

Surrounding Land Use and Zoning:

- North: Government/RS20
- South: Single-Family/RM9-NS
- East: Single-Family/RM9-NS
- West: Religious Institution/RM9-NS

Proposed Final Plat

Zoning: Multi-Family Residential No Short-Term Rentals (RM9-NS) Min. lot size: 5,000 square feet Max. building coverage: 0.50 Min. rear setback: 20' Min. side setback: 5' Max. height: 3 stories Min. street setback: Contextual per Zoning Code

PROPOSAL DETAILS

Number of lots: 4 Lot sizes: Lots range in area from 8,648 square feet to 13,606 square feet.

Access: Access to all lots is provided from East Campbell Road. Shared drives are required. Lots 1 and 2 will share a drive, and lots 3 and 4 will share a drive.

Subdivision Variances or Exceptions Requested: None.

APPLICABLE SUBDIVISION REGULATIONS

Volume III of NashvilleNext, the General Plan for Nashville and Davidson County, contains the Community Character Manual (CCM) which establishes land use policies for all properties across the county. The land use policies established in CCM are based on a planning tool called the Transect, which describes a range of development patterns from most to least developed.

Prior versions of Subdivision Regulations for Nashville and Davidson County contained a uniform set of standards that were applied Metro-wide. This did not take into account the diverse character that exists across the County. In order to achieve harmonious development within the diversity of development patterns that exist in Nashville and Davidson County, the Planning Commission has adopted the current Subdivision Regulations. The Subdivision Regulations incorporate the General Plan policies by including rules or standards for each specific transect. This allows policies of the General Plan to be followed through application of the varying Subdivision Regulations to reflect the unique characteristics found in the different transects. The site is within the Suburban Mixed Use Corridor (T3 CM) policy. For T3 CM, the conventional regulations found in Chapter 3 are utilized.

3-1 General Requirements

This subdivision is required to meet the standards of Chapter 3. Staff finds that all standards are met.

3-2 Monument Requirements

Complies. Monuments will be set after plat approval.

3-3 Suitability of the Land

Staff finds that the land is suitable for development consistent with this section.

3-4 Lot Requirements

All lots comply with the minimum standards of the zoning code. Any development proposed on the resulting lots will be required to meet the bulk standards and all other applicable regulations of RM9-NS zoning at the time of building permit.

3-5 Infill Subdivisions

Not applicable. Infill regulations apply to proposed subdivisions within the R, R-A, RS, and RS-A zoning districts.

3-6 Blocks

Not applicable. No new blocks are being created.

3-7 Improvements

No public infrastructure or improvements are required with this subdivision. Construction plans for any required private improvements (private stormwater, water and sewer lines and connections) will be reviewed at the time of building permit.

3-8 Requirements for Sidewalks and Related Pedestrian and Bicycle Facilities

Not applicable. Sidewalks are required only in association with new streets. The proposed subdivision is located on an existing street. Sidewalks may be required at the time of building permit pursuant to Section 17.20.120 of the Zoning Code.

3-9 Requirements for Streets

Not applicable. No new streets are proposed.

- **3-10** Requirements for Dedication, Reservations, or Improvements No additional right-of-way is required.
- **3-11** Inspections During Construction

This section is applicable at the time of construction, which for this proposed subdivision, will occur only after issuance of a building permit approved by Metro Codes and all other reviewing agencies.

- **3-12** Street Name, Regulatory and Warning Signs for Public Streets Not applicable. No new streets are proposed.
- **3-13** Street Names, Regulatory and Warning Signs for Private Streets Not applicable. No private streets are proposed.

3-14 Drainage and Storm Sewers

Drainage and storm sewer requirements are reviewed by Metro Stormwater. Metro Stormwater has reviewed the proposed concept plan and found it to comply with all applicable standards of this section. Stormwater recommends approval.

3-15 Public Water Facilities

Water is provided by Madison Suburban Utility District. The district has provided an availability/capacity letter for this subdivision.

3-16 Sewerage Facilities

Metro Water Services has reviewed this proposed concept plan for sewer and has recommended approval with conditions.

3-17 Underground Utilities

Utilities are required to be located underground whenever a new street is proposed. The concept plan notes all new utilities will be placed underground as required.

PLANNING STAFF COMMENTS

With all staff conditions, the proposed four lots meet all zoning and subdivision requirements.

POLICY CONSIDERATIONS

A recent appeals court decision (Hudson et al v. Metro) upheld a lower court decision which outlined that the Planning Commission has the authority to determine whether a concept plan complies with the adopted General Plan (NashvilleNext). Per the Court, the Planning Commission may not evaluate each concept plan to determine whether it is harmonious generally but may consider policy. Policy information is provided below for consideration.

The Community Character Manual (CCM) policy applied to the site is Suburban Mixed Use Corridor (T3 CM). T3 areas are intended to transition from the least dense natural and rural environment to the denser urban environments. T3 CM areas within the Suburban transect are intended to enhance suburban mixed use corridors by encouraging a greater mix of higher density residential and mixed use development along the corridor. Moderate residential density residential and mixed use development with regularly spaced buildings built to the back edge of the sidewalk are features of T3 CM areas. Additionally, T3 CM areas are served by highly-connected street networks, sidewalks, and existing or planned transit. Lot sizes within the T3 CM policy area can vary; in addition to mixed use, office, and commercial zoning districts, residential zoning districts ranging from RM9-A up to RM20-A are supported depending on context.

COMMENTS FROM OTHER REVIEWING AGENCIES

FIRE MARSHAL RECOMMENDATION

Approve with conditions

• Limited building detail, and/ or building construction information provided. Construction must meet all applicable building and fire codes. Any additional fire code or access issues will be addressed during the construction permitting process. Future development or construction may require changes to meet adopted fire and building codes.

STORMWATER RECOMMENDATION Approve

NASHVILLE DOT RECOMMENDATION Approve with conditions

- Prior to recording change road name to 'East Campbell Road'
- Driveway connections must be permitted by the Nashville Department of Transportation and conform with Metro Code requirements.

TRAFFIC AND PARKING RECOMMENDATION Approve

WATER SERVICES RECOMMENDATION

Approve with conditions

- Water provided by Madison Suburban Utility District.
- Sewer Capacity fees must be paid prior to building permits approval for new lots.

STAFF RECOMMENDATION

Staff recommends approval with conditions.

CONDITIONS

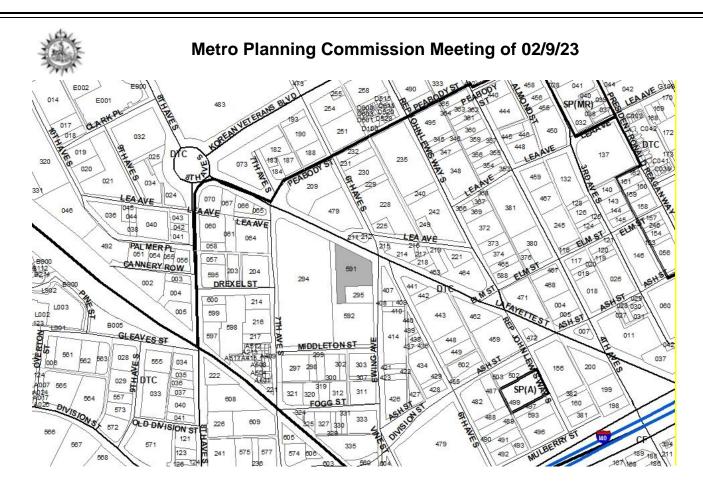

- 1. Comply with all conditions and requirements of Metro reviewing agencies
- 2. Pursuant to 2-4.7 of the Metro Subdivision Regulations, the approval shall expire if the plat is not recorded with the Register of Deeds within one year of the Planning Commission's approval.
- 3. Add "to be removed" notation on gravel driveways.
- 4. Add note: Lots do not satisfy minimum bulk standards for multifamily residential uses. Residential uses shall be limited to single-family and two-family dwellings.

RECOMMENDED ACTION

Motion to approve proposed subdivision Case No. 2023S-022-001 with conditions based upon finding that the subdivision complies with the applicable standards of the Metro Subdivision Regulations, Metro Zoning Code, and other applicable laws, ordinances and resolutions as noted in the staff report, subject to all of the staff recommended conditions.
