

GALLATIN PIKE VISION

S 5th Street to Eastland Avenue

The vision for Main Street and Gallatin Pike, from S. 5th Street to Eastland Avenue, creates a low-speed multimodal street that provides safe and comfortable spaces for all modes. The concepts include dedicated bus lanes and protected bicycle lanes along the curb. The end result is a street that is a destination for businesses, residents and visitors and not a high-speed thoroughfare.

Concept A

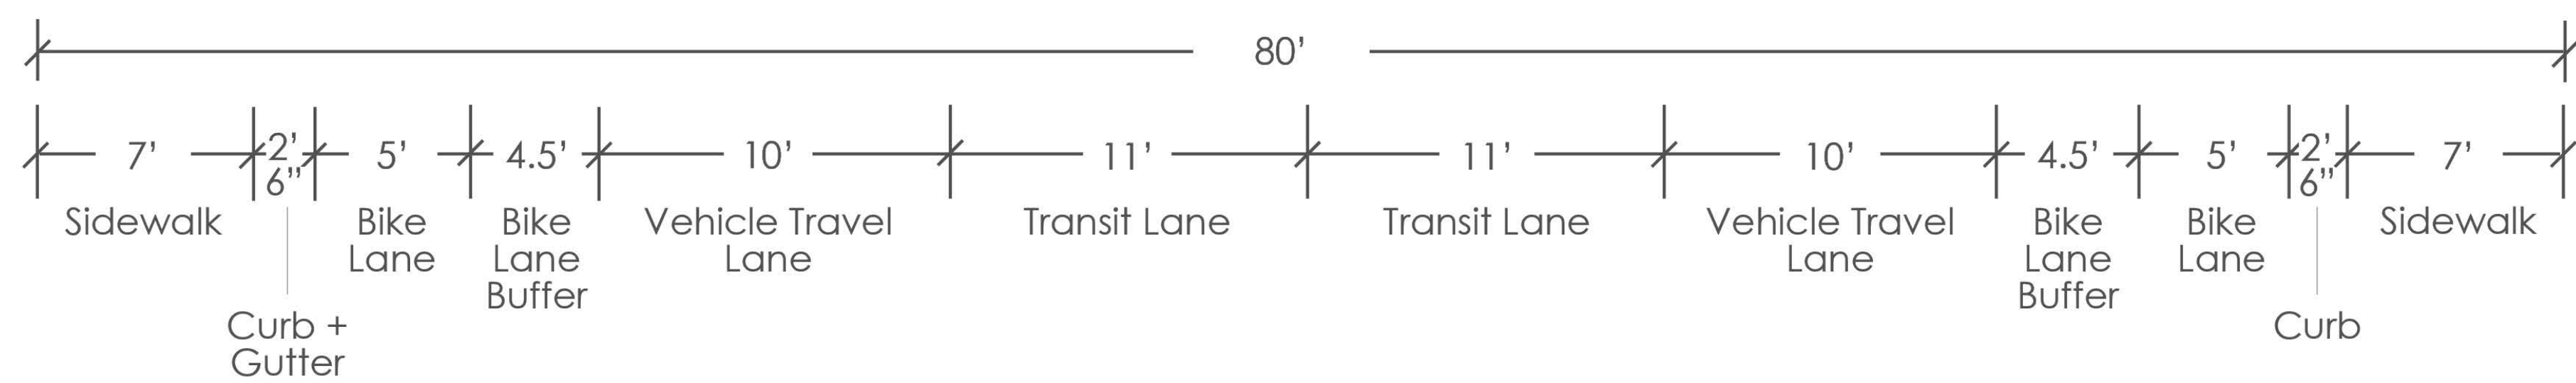

Medians provide an opportunity for landscaping and restrict left turns in certain locations.

Both bike lanes and pedestrian crossings are signaled.

Concept B

Level boarding platforms provide easier boarding opportunities.

Bike lane protection transitions to striping at stations

Raised medians provide additional opportunity for landscaping, traffic calming and pedestrian crossings.

Landscaped barriers provide bike lane protection from travel lanes
