Project Description: New multi-family residential building. 4-stories, 134 units and 5,712 sqft of Retail.

Start Date: 6/27/24 End Date: 4/29/26 Project Length: 22 months

Describe Type of Closure: Close Far left lane from Humphrey St. to Rains Ave. Would request to close for duration of project. 4th Ave is 3 lanes and 1 way. Only closing far left lane.

Provide Reasons why Project cannot be completed without closures and what other

options were considered (attach documents as needed): Building is being

constructed almost to property line, sidewalk extension and widening, curb + gutter, loading + unloading materials.

Not possible to construct or load/unload without putting employees in harms way. There are also utility taps (2)

and 11 Fiber Optic lines (all separate companies) that need to be relocated from poles to underground. If separate

lane closures were obtained it would still require closing for duration
